### Reimagining HR for the modern workforce

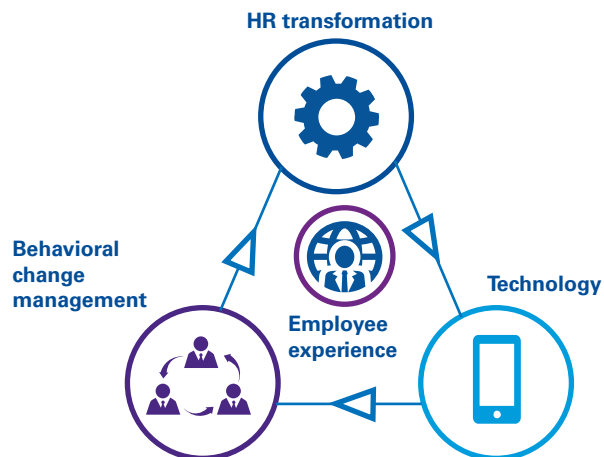

There probably has never been a time when HR has been under greater pressure to support workforce change. But with 60% of CHROs believing their function needs to modernize to stay relevant, such a transformation requires more than just implementing new technology.

#### Choose to lead transformation

Faced with changes in workforce demographics and expectations, an often undersupplied talent pool, masses of unstructured workforce-related data, and the emergence of digital labor, CHROs are faced with important questions:

- How can we help reshape the workforce?
- How can technology and process help deliver a purpose-led culture?
- How do we focus on “moments that matter” to employees and shape their experience?
- How do we use data and insights to shape people management?
- How do we continually drive efficiencies in HR processes?

**KPMG believes that successful HR transformation is built on three capabilities with employee experience at the heart:**
