

KPMG Powered Evolution

Drive future transformation

Enabled by ServiceNow

A path to sustained advantage

How do you effect lasting change that goes beyond your successful ServiceNow go-live? You need to be equipped to realize lasting value from your functional transformation investment by leveraging data-driven insights to create value, using your operating model to mitigate risk, and take full advantage of SaaS/platform features and enhancements. All while your project team moves on to the next big thing.

The challenge

Evolving organizational changes, disruptive technologies, process improvements, and new market opportunities are likely to pose further challenges as your business moves forward.

Failing to keep up could lead to your ServiceNow platform becoming tomorrow's legacy system and your current leading practices lagging future advancements.

Retaining and fully utilizing the skilled resources required for your transformation can be a challenge. Important new releases for your ServiceNow platform are provided twice a year. These require an understanding of how they impact your current operations and need to be implemented efficiently. Maintaining a dedicated team with specific skills and know-how that is only periodically required is not cost effective for your business.

Deriving ongoing value from your transformation requires a more agile approach.
