

Regulatory Affairs

Operational and Technology Consulting Services for Life Sciences Companies

Our goal is to help our clients improve efficiency within their Regulatory Affairs function by implementing process and technology changes. These transformational changes help Life Sciences companies bring products to market more quickly, while reducing compliance risk and enabling a sustainable approach to regulatory activities.

Business and operations consulting

- Operating model and process re-design
- Support preparing for regulatory mandates
- Support for compliance remediation activities
- Regulatory strategy enablement
- M&A and divestitures – pre & post deal support
- Data quality programs
- Program management
- Change management

Technology/digital enablement

- Technology roadmap and solution selection
- Business requirements definition
- Design of supporting processes, including data entry model and governance
- Global data collection/harmonization
- Cross-functional integration design
- Business scenario testing and UAT support
- Development of digital/automation tools for specific Regulatory use cases

Regulatory Affairs Focus Areas
