

2023 ESG in the Banking Industry Share Forum Series “Starting Strong”

June 6, 2023

Administrative

CPE regulations

KPMG is approved by NASBA to deliver CPE-worthy training

In order to receive CPE credit:

- attend for entire session
- participate in interactivity checks

Interactivity checks will appear in your media player, and may or may not be verbally addressed by presenters.

Participation is tracked, and failure to actively participate will result in denial of CPE credits.

Technical issues

- If you have any technical issues, please submit a question through the Questions & Answers panel and our producers will respond to you directly.

Content questions

- Submit all content questions through the Questions & Answers panel.

Agenda

Session 1 1 – 1:20 pm

01	ESG in the banking industry & SEC development update	12:00pm – 12:30pm	Alysha Horsley KPMG Audit
02	ESG internal controls over sustainability reporting	12:30pm – 1:00pm	Aila Pallera KPMG Internal Audit & Enterprise Risk
03	Global ESG landscape	1:00pm – 1:20pm	Yuval Ron KPMG Accounting Advisory Services Sean Stiso KPMG Accounting Advisory Services

Break 10 minutes

Session 2 1:30 – 2:30 pm

04	Perspectives on ESG as a Business Opportunity	1:30pm – 1:50pm	Dylan Roberts KPMG Strategy
05	ESG industry panel discussion	1:50pm – 2:30pm	Dylan Roberts KPMG Strategy

01

ESG in the banking industry & SEC development update

Alysha Horsley
KPMG Audit

Major shifts impacting ESG

Physical Risks

Economic consequences of a 3 to 4° global warming trajectory. Natural disasters as a risk for **credit, global operating business models, and investments.**

Consumer & Employee Sentiment

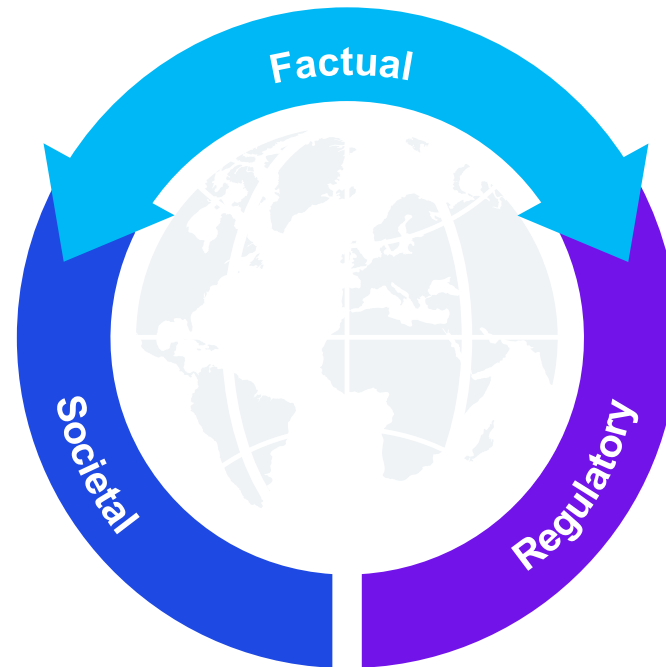

Social **pressure**, rising **purchasing power** and **growing wealth** of the young environmentally conscious **generations "Y" and "Z"**.

Capital Markets

Emergence of **ESG investment strategies** and increasing importance of **ESG-related reporting.**
Higher ESG score, lower **cost of capital**

Tax Acceleration

More countries adopting **Country by Country** reporting. Greater pressure to understand **total global tax footprint.**
The FASB's proposed ASU would require disclosure of income taxes paid (net of refunds received) to an individual jurisdiction when more than 5% of the total.

SEC Requirements

Anticipated **disclosure mandates for climate change, social, and cyber security data** in April 2023.

IRA

Signed into law in 2022, the **largest federal clean energy investment** in history is setting the course for how the nation produces energy and how businesses make decisions.

Banking Regulators

OCC, FDIC and FRB have each issued Climate Principles focused on **climate-related financial risks** for large banking organizations.

FRB's **climate risk pilot scenario analysis**

Global Policy Shifts

Formal adoption of **CSRD by EU** with standards still to be finalized

ISSB to require scope1, 2 and 3 GHG emissions

Biden administration is realizing more ambitious climate policies.

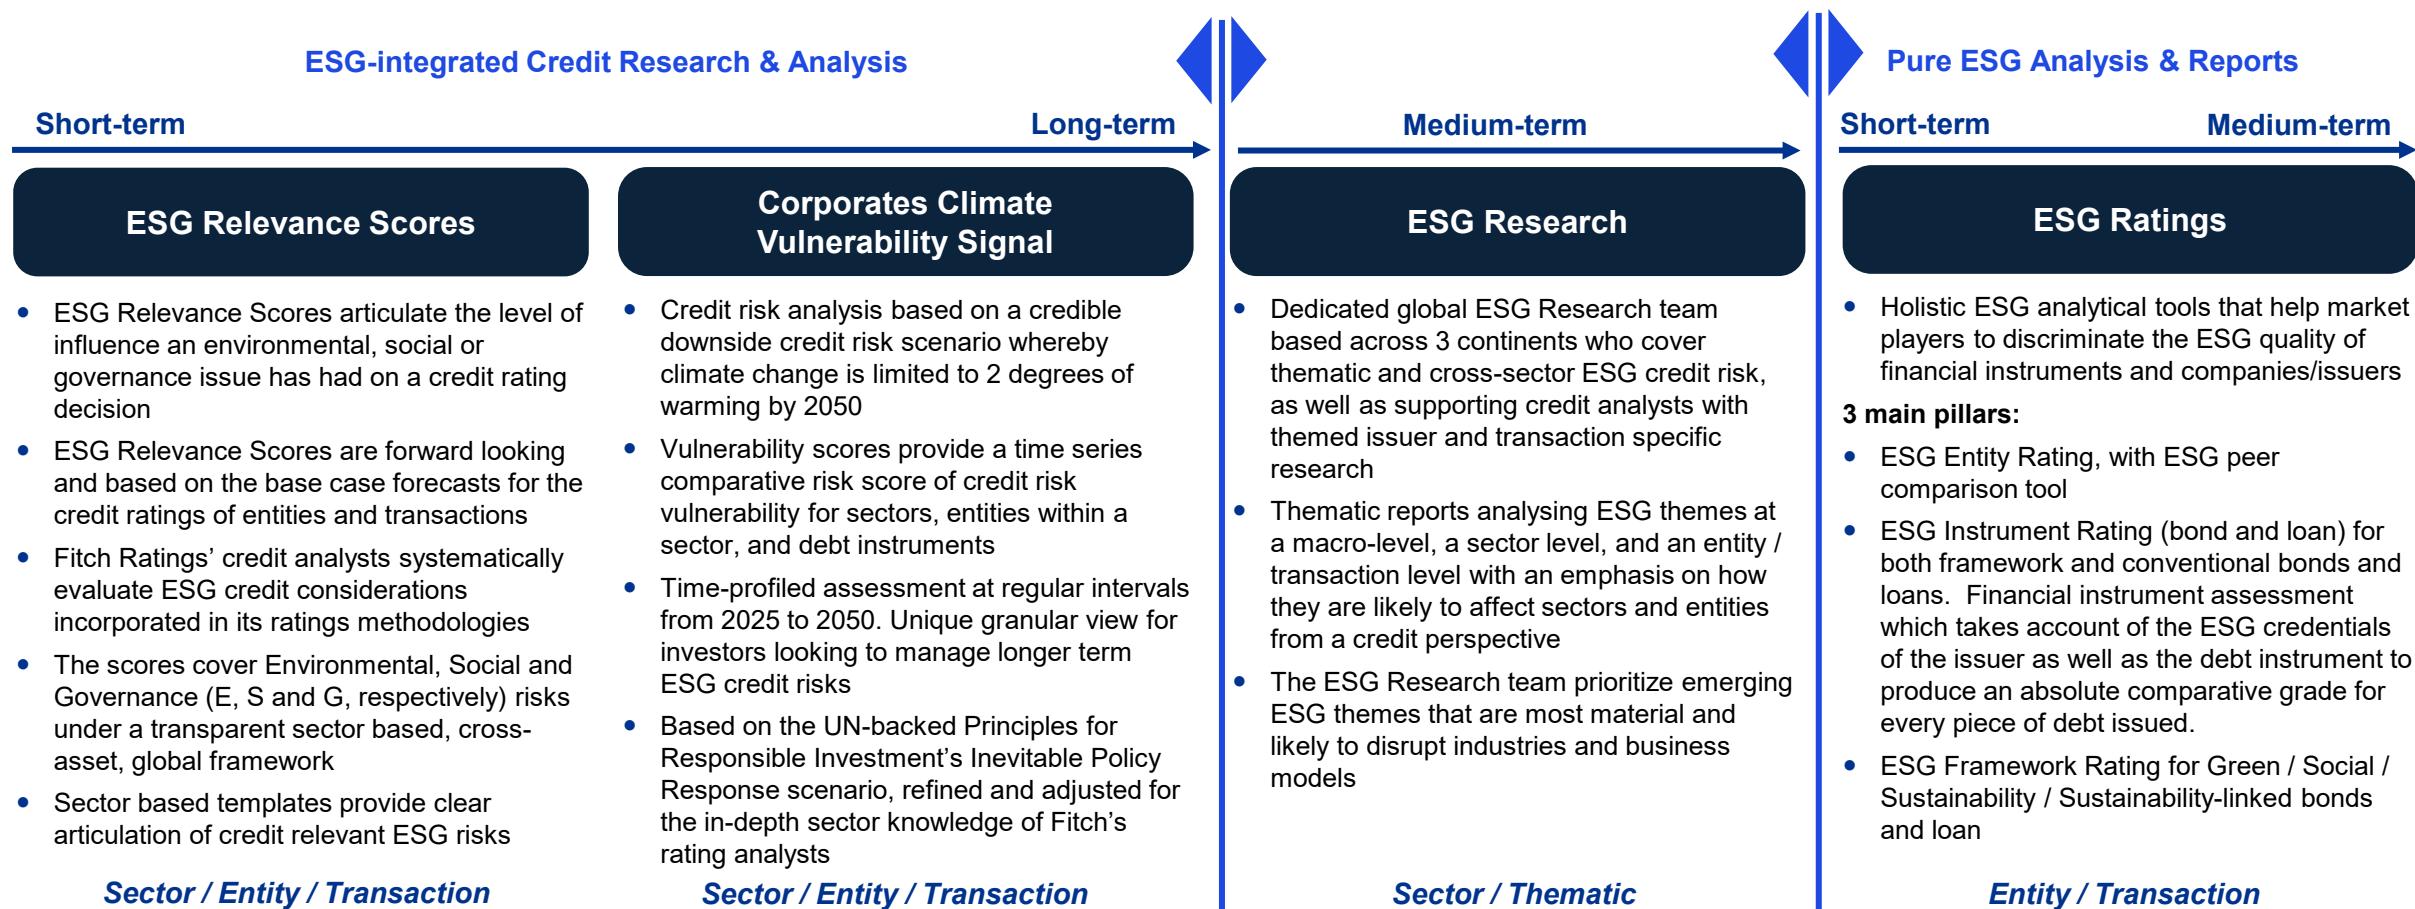

Bank Credit Ratings & ESG Risks

Mark Narron, Sr. Director, N. American Banks

June 6, 2023

Fitch Ratings and Sustainable Fitch ESG Solutions

Sustainable Fitch - ESG Rating Report

Reports are produced for each instrument, covering the entity and the bond framework, as well as additional sections on alignment with ICMA guidelines and UN SDGs

ESG Entity Rating

- We opine on the entity overall E,S,G profiles and its Business Activities.
- We refer to an internationally recognised taxonomy

ESG Framework Rating

- We opine on the bond structuring features and Use of Proceeds
- We check the UoP with the ICMA principles
- We distinguish between main GSS bonds categories

ESG Instrument (bond or loan) Rating

- We can analyse ESG credentials for both GSS bonds and conventional bonds via the ESG Instrument Rating

Corporates
Utilities - Non US
Global

Entity Analysis

Business Activities

Company Material Core Contributions	Environmental	Social	ESG Rating
Solar Power	<ul style="list-style-type: none"> Clear support to a transition to a net-zero emissions economy Fictional Entity avoids business that uses best practice standards Company is actively performing best practices in the longer term Solar PV technology is eligible for EU taxonomy alignment and exempt from CAJG Microchip assessment. 	<ul style="list-style-type: none"> We find generation of electricity to be neutral from a social perspective, regardless of the source of generation. However, legal proceedings have commenced against the company by people affected by one of the windfarm projects. We will partially reflect this in our social alignment assessment. Although exempt from CAJG Microchip assessment for the EU taxonomy, these wind farms have a very low solar CAJG Microchip profile. 	2
Wind Power	<ul style="list-style-type: none"> Moving towards placing out fossil fuel business, Fictioal Entity is aiming to increase the size of wind in the portfolio, in addition to solar where it is already focused. Supporting ecosystem to be protected. Although exempt from CAJG Microchip assessment for the EU taxonomy, these wind farms have a very low solar CAJG Microchip profile. 	<ul style="list-style-type: none"> We find generation of electricity to be neutral from a social perspective, regardless of the source of generation. However, legal proceedings have commenced against the company by people affected by one of the windfarm projects. We will partially reflect this in our social alignment assessment. 	2

It represents 81% of overall revenue.

It represents 4% of overall revenue.

Framework Analysis

Use of Proceeds – Eligible Projects

Company Material Core Contributions	Environmental	Social	ESG Rating
Solar Generation and other renewable energy	<ul style="list-style-type: none"> Investment activities related to development, construction and installation of solar arrays. Investments can be related to solar panels, transformers, inverters, cables, transmission assets and any other element relating to the completion of a solar array. To ensure limited negative impacts on surroundings, environmental impact assessments are conducted by specialists before new arrays are constructed. Other renewable energy production types. 	<ul style="list-style-type: none"> Not applicable 	4

Source: Sustainable Fitch, based on Fictional Entity GmbH Sustainability Issues, 2020

Use of Proceeds – Other Information

Company Material Core Contributions	Environmental	Social
ESG Rating 2	<ul style="list-style-type: none"> To finance the acquisition, development and construction of new eligible projects. To renovate and upgrade existing eligible projects. Eligible projects may include projects finished or taken into operation up to 12 months prior to approval for green bond financing by Fictional Entity's sustainability committee. Eligible projects mean a selected pool of projects based on which are put by Fictional Entity that promote the transition to low-carbon and climate resilient growth and a sustainable economy as determined by Fictional Entity. Fictional Entity will not finance fossil energy generation projects through green bonds. 	<ul style="list-style-type: none"> Fictional Entity uses at least 70% of proceeds are intended for new investments with a shortbook instead of one year. Clear evaluation and identification of "non-financial" assets. Clear definition of the criteria for asset selection, even though no targets are assigned to the specific assets.

Source: Sustainable Fitch

Evaluation and Selection

Company Material Core Contributions	Environmental	Social
ESG Rating 1	<ul style="list-style-type: none"> Eligible projects will be evaluated, selected and prioritised by Fictional Entity's sustainability and finance departments in addition to the operational departments per selection. Prioritised projects will be presented to the joint committee on a quarterly basis for final approval of allocation of green bond proceeds. Proceeds from the green bonds will be used exclusively for eligible projects and that are evaluated to deliver long-term positive net environmental effects. 	<ul style="list-style-type: none"> Long-term need to make carbon-intensive energy sources to reduce climate change and achieve UN targets. According to the Fictional Entity, the lowest projects will be selected via additional strategic criteria aligned with the World Bank's Environment, Health and Safety Guidelines, and with particular focus on the main challenges such as: 1) sustainable financing (sustainable raw material and mining process, including transport and land use); 2) competition with food.

Fitch ESG Relevance Scores Defined

Score	Relevant to Sector	Relevant to Issuer	Material to Rating	Description
5	Yes	Yes	Key Rating Driver	<ul style="list-style-type: none"> Highly relevant to the rating. A Key Rating Driver
4	Yes	Yes	Rating Driver	<ul style="list-style-type: none"> Moderately relevant to the rating. Not a Key Rating Driver by itself, but has a moderate impact on the rating in combination with other factors
3	Yes	Yes	Minimal	<ul style="list-style-type: none"> Minimally relevant to the rating. Either has a very low impact or is actively managed in a way that results in no impact on the entity rating
2	Yes	No	No	<ul style="list-style-type: none"> Irrelevant to the entity rating but relevant to the sector
1	No	No	No	<ul style="list-style-type: none"> Irrelevant to the entity rating and irrelevant to the sector

Fitch Ratings - Social Relevance Examples

ESG Relevance Scores – Social Issues Assessed

Social (S)		
General issues	Sector-specific issues	Reference
Human Rights, Community Relations, Access & Affordability	n.a.	n.a.
Customer Welfare – Fair Messaging, Privacy & Data Security	Fair lending practices, pricing transparency, repossessions/foreclosure/collection practices, consumer data protection, legal/regulatory fines stemming from any of the above.	Operating Environment, Risk Profile, Asset Quality
Labour Relations & Practices	Impact of labour negotiations, including board/employee compensation and composition.	Business Profile, Earnings & Profitability, Capitalisation & Leverage, Funding
Employee Wellbeing	n.a.	n.a.
Exposure to Social Impacts	Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core activities.	Business Profile, Earnings & Profitability

Source: Fitch Ratings

GSEs

Freddie Mac and Fannie Mae are US government sponsored entities that play a core role in the US housing finance market. Both have an ESG.RS of '4[+]' for 'Human Rights, Community Relations, Access & Affordability' as their public policy missions are key ratings drivers relevant to Fitch's view on the US sovereign's propensity to provide support.

Other US GSEs with similar positive ESG.RS are Farm Credit System, AgFirst Farm Credit Bank, Agribank, FCB, CoBank, ACB and Farm Credit Bank of Texas.

Fitch Governance Relevance Examples

ESG Relevance Scores – Governance Issues Assessed

Governance (G)		
General issues	Sector-specific issues	Reference
Management & Strategy	Operational implementation of strategy.	Business Profile
Governance Structure	Board independence and effectiveness, ownership concentration; protection of creditor/stakeholder rights, legal/compliance risks, business continuity, key person risk, and related-party transactions.	Business Profile
Group Structure	Organisational structure, appropriateness relative to business model, opacity, intra-group dynamics and ownership.	Business Profile
Financial Transparency	Quality and timing of financial reporting, and auditing process.	Business Profile

Source: Fitch Ratings

Governance Weaknesses

The ratings of Credit Suisse Group AG and Wells Fargo & Co. were affected by Fitch’s assessment of governance weaknesses, leading to ESG.RS scores of ‘4’ for Governance Structure and ‘Management & Strategy’, respectively.

Fitch Ratings - Environmental Relevance Examples

ESG Relevance Scores – Environmental Issues Assessed

Environmental

General issues	Sector-specific issues	Reference
GHG Emissions & Air Quality	Regulatory risks, emissions fines or compliance costs related to owned equipment, which could affect asset demand and profitability.	Operating Environment
Energy Management	Investments in or ownership of assets with below-average energy/fuel efficiency, which could reduce future valuation of these assets.	Risk Profile
Water & Wastewater Management	n.a.	n.a.
Waste & Hazardous Materials Management, Ecological Impacts	n.a.	n.a.
Exposure to Environmental Impacts	Impact of extreme weather events on assets and/or operations and corresponding risk appetite and management, catastrophe risk, credit concentrations.	Business Profile, Asset Quality

Source: Fitch Ratings

Severe Weather

A number of issuers operating in geographies more exposed to extreme weather events have ESG.RS of '3' for 'Exposure to Environmental Impacts.'

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

Copyright © 2022 by Fitch Ratings, Inc., Fitch Ratings Ltd. and its subsidiaries. 33 Whitehall Street, NY, NY 10004. Telephone: 1-800-753-4824, (212) 908-0500. Fax: (212) 480-4435. Reproduction or retransmission in whole or in part is prohibited except by permission. All rights reserved.

FRB proposed climate risk management principles

At a glance

- Principles follow closely with previous proposed guidance from the OCC and FDIC
- Topic areas include the following: Governance; Policies, procedures, and limits; Strategic planning; Risk management; Data, risk management, and reporting; and Scenario analysis
- Risk areas include the following: Credit risk; Liquidity risk; Other financial risk (interest rate risk and pricing risk); Operational risk; Legal/Compliance risk; and Other nonfinancial risks
- Only proposed guidance from U.S. prudential banking regulators to mention the connection between climate risk management and compensation strategies
- Emphasizes that any final guidance will be in the form of interagency guidance⁽¹⁾

(1) FRB, “Press Release” (December 2022)

FRB proposed general climate risk management principles

Governance	Policies, procedures, and limits	Strategic planning
Risk management	Data, risk measurement, and reporting	Scenario analysis

FRB proposed management areas

Credit risk	Liquidity risk	Other financial risk
Operational risk	Legal/ compliance risk	Other nonfinancial risk

Climate Risk: FRB's Pilot Scenario Analysis & Risk Management Practices

The FRB's Climate Scenario Analysis has two primary objectives: "to learn about large banking organizations' climate risk management practices and challenges and to enhance the ability of large banking organizations and supervisors to identify, measure, monitor, and manage these risks."

Physical risk:

- Effect on residential and CRE exposures over one-year horizon (2023)

Transition risk

- Effect on Corporate and CRE loan portfolios over a 10-year time horizon (2023-2032)

Qualitative Questions:

- Governance & risk management practices
- Measurement methodologies
- Results (risk metrics & data challenges)
- Lessons learned and future plans

Scenarios:

- For each scenario, calculate traditional credit risk parameters, such as probability of default, risk rating grade and loss given default for each loan

[Regulatory Insights | Climate Risk: FRB pilot scenario analysis](#)

ESG is ultimately a competitive advantage

Rising interest

from C-suite on ESG impact as **47% of Banking CEOs agree that ESG programs improve financial performance**, an 11% increase from last year⁽¹⁾

ESG story

Backed by **financial and non-financial information**

- **GHG emissions**
- **Diversity, equity and inclusion**
- **Governance**
- **Cyber**

Our approach to sustainable finance is to help our clients make the transition they seek. It is great business and great for society.”

- **Brian Moynihan, Bank of America CEO**⁽²⁾

02

ESG and Internal Controls

Aila Pallera

KPMG Internal Audit & Enterprise Risk

Agenda

1

The ESG Journey

2

ESG Internal Control Considerations

3

Internal Controls Over Sustainability Reporting

Robust reporting requires robust controls

The ESG Journey

Assess

Identify current state of ESG and prioritize critical areas

Initiative Inventory

Capture, align, and 'take credit' for existing ESG efforts

Maturity + Materiality

Evaluation of material topic areas related to ESG and current organizational maturity

Market Positioning

Assess ESG initiatives and ratings against select peers

Carbon Baseline

Establish process and execute on GHG emission measurement

SEC Proposal Diagnostic

Rapid assessment of current reporting against SEC climate disclosure proposal

Diversity, Equity, & Inclusion

Rapid assessment of DEI status and potential gaps

Design

Integration of current & future state into goals that feed strategy

Strategic Plan

Consideration of how ESG focus areas align with existing strategic plans or aspirations

Roadmap

Outline of potential, tangible steps to take for delivering on ESG focus areas

Target-setting

Setting of goals and discrete targets that will guide implementation of ESG tenets

Operationalize

Tangible initiatives to make progress against specific areas identified as ESG focal points

Decarbonization

Set net zero ambition, approach, timeline, and measurement. Model impacts (e.g., ROI)

Resilience & Capital Planning

Build ESG and the impacts of a changing climate into capital program choices

Financing

Adopt regulatory standards, financing options, and audit/tax implications

Diligence

Integrate ESG needs into M&A strategy, portfolio, cost operating model and target identification

Diversity, Equity, & Inclusion

Incorporate DEI principles like better governance & controls into decisions

Governance

Tightly integrate ESG into decision-making and evaluation methodologies

Measure & Report

Continuously review performance and future ESG-related decisions that need to be made

Carbon Accounting

Quantifies emissions and creates a robust reporting system fit for a wide variety of both internal and external uses

Reporting

Track ESG progress and any key adopted standards (SASB, TCFD, etc.)

Assurance

Independent assurance on ESG reporting

Project & Climate IQ

Highlights impact of climate change, resilience, and risk mitigation on the overall asset base along with the resulting shifts in macroeconomic landscape (e.g., demand and supply factors)

Technology Enablement, Data Sources, Control Infrastructure, Policy & Procedures, and Governance Framework

Program & Change Management

ESG Internal Control Considerations

Why internal controls in ESG is so important

Accelerating ESG compliance

- Aspects of SEC Climate Rule will be SOX relevant
- Attestation will be required for parts of the SEC climate rules
- Validation is already required for EU rules on climate disclosures and in several other country disclosures
- Assurance will become best practice as ESG progress and reporting evolves
- There are other areas of ESG not yet covered by the SEC; this could easily change

Increasing attention from bank examiners

- OCC, FDIC and FRB have issued draft principles for managing exposures to climate-related financial risk.
- Federal Reserve Board's pilot climate scenario analysis exercise.

Reliance by stakeholders

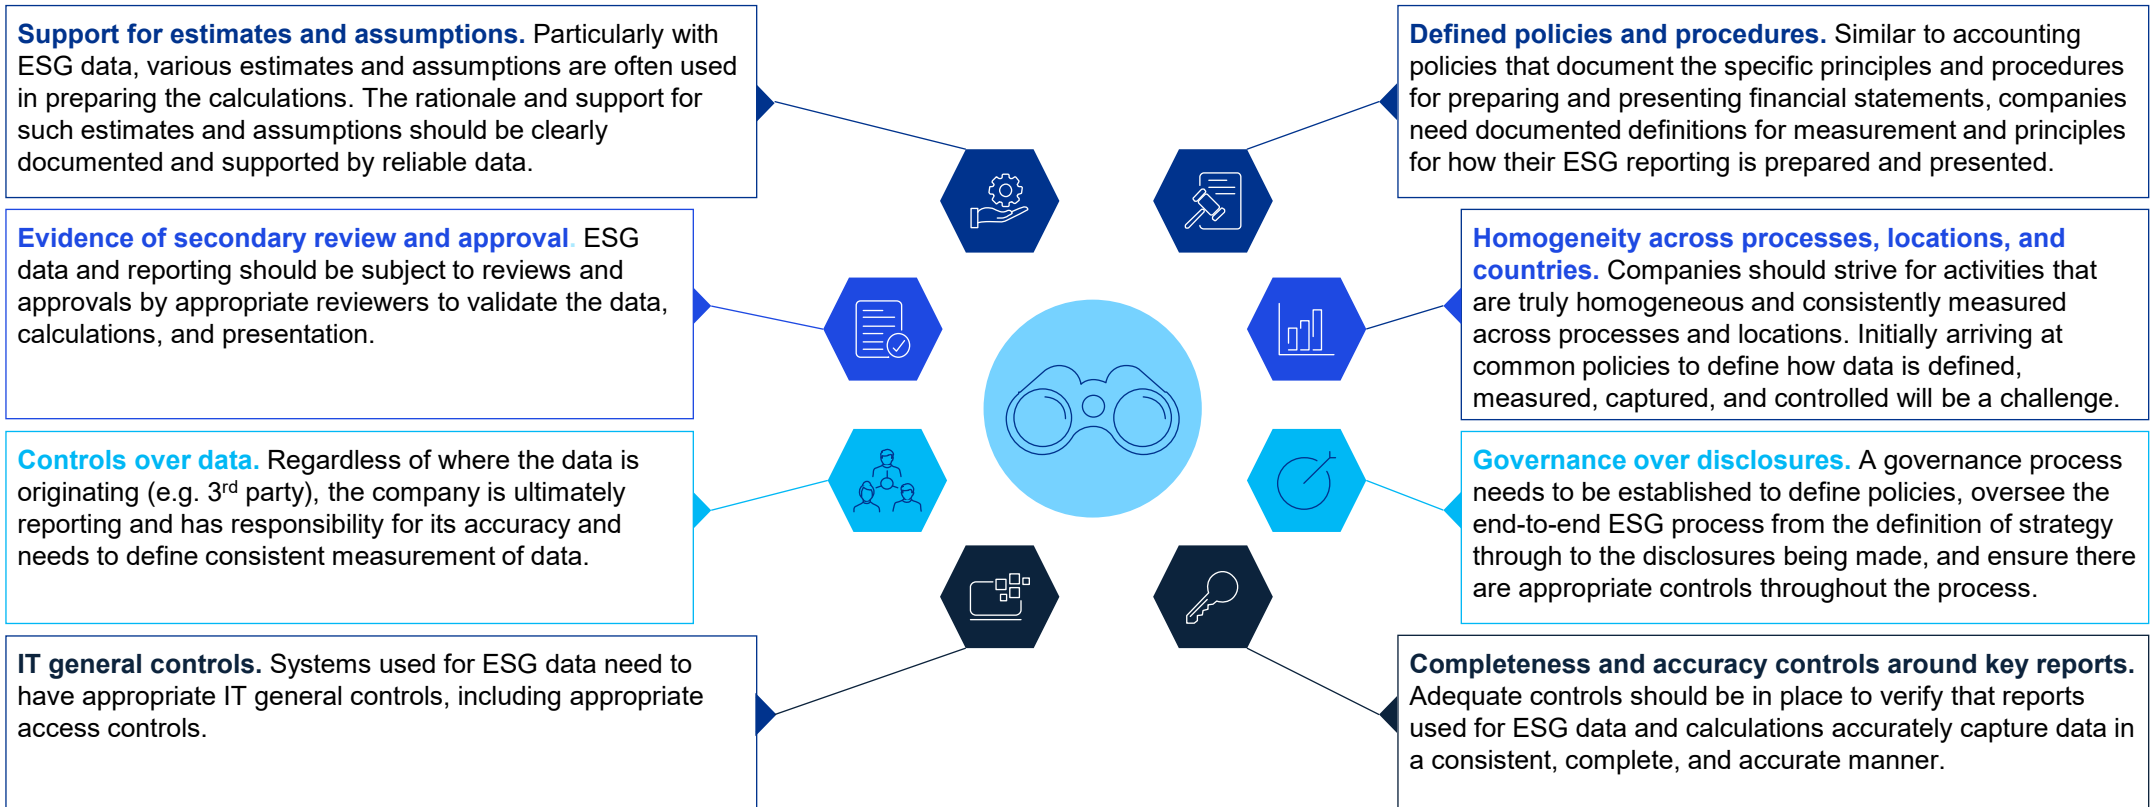

- Stakeholders and analysts will continue to rely on CSR reports as well as the 10k to compare companies on ESG areas outside of mandatory disclosures
- If stakeholders rely on that information, companies will need to put some diligence into validating the effectiveness of internal controls put in place to confirm the accuracy of these disclosures.
- Stakeholders will include investors, regulators, customers, vendors, lenders, etc.

Board and Executive leadership confidence

- Boards and Executive leadership are going to be asked about their strategy and goals involving ESG and progress towards those goals
- Assurance will be needed in order to give boards and management the confidence to speak to company progress with some degree of evidence supporting what is said

Focus areas as you consider internal controls over ESG reporting

Consider the following list of topics that are core elements of any risk and controls program and how they apply to ensuring strong internal controls around ESG reporting.

These are common topics and themes for those that have been involved with ICFR for the past 20 years, but applying those same concepts across a new set of non-financial controls for ESG is going to be a much different challenge.

ESG Controls Journey

Metric prioritization, documentation and assessment are critical elements of the ESG controls strategic journey banks are taking to mature their ESG control structure. Below is KPMG's view of this journey

An aerial photograph of a large concrete dam and reservoir. The water is a vibrant turquoise color, and the surrounding landscape is lush green with trees and grass. A semi-transparent blue rectangular overlay covers the middle portion of the image, containing white text. The text is arranged in four lines, with the first two lines being significantly larger than the last two.

Internal Controls Over Sustainability Reporting (ICSR)

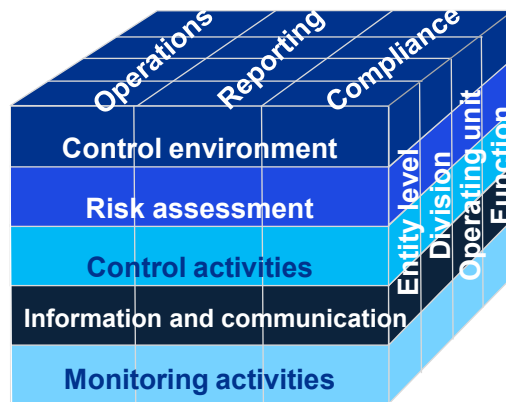

COSO Components and principles

For effective internal control:

Each of the five components and 17 relevant principles must be present and functioning

Points of focus are characteristics supporting achievement of control objectives

The five components must operate together in an integrated manner

<p>Control environment</p>	<ol style="list-style-type: none"> 1. Demonstrates commitment to integrity and ethical values 2. Exercises oversight responsibility 3. Establishes structure, authority, and responsibility 4. Demonstrates commitment to competence 5. Enforces accountability
<p>Risk assessment</p>	<ol style="list-style-type: none"> 1. Specifies suitable objectives 2. Identifies and analyzes risk 3. Assesses fraud risk 4. Identifies and analyzes significant change
<p>Control activities</p>	<ol style="list-style-type: none"> 1. Selects and develops control activities 2. Selects and develops general controls over technology 3. Deploys through policies and procedures
<p>Information and communication</p>	<ol style="list-style-type: none"> 1. Uses relevant information 2. Communicates internally 3. Communicates externally
<p>Monitoring activities</p>	<ol style="list-style-type: none"> 1. Conducts ongoing and/or separate evaluations 2. Evaluates and communicates deficiencies

Key considerations for each component

Control environment

- Evaluate the organizational structure and identify the areas most likely to be impacted by current and pending regulation
- Hire, train, and retain the right people with the right skills
- Establish and communicate the structure, roles, and responsibilities to all involved in ESG reporting
- Define realistic and attainable metrics that do not create undue pressure that could lead to fraudulent reporting

01

02

Risk Assessment

- Define sustainability reporting objectives in sufficient detail to form the basis for a thorough risk assessment
- Identify and analyze material risks to the achievement of sustainable reporting objectives
- Consider the potential risk of fraud in sustainability reporting during the risk assessment
- Continuously monitor for changes that could impact sustainability reporting objectives

03

Control Activities

- Design the ICSR program and controls to be scalable to achieve the desired level of assurance. Remember to design controls that address future commitments and not just current metrics. Using the ICSR program can be beneficial in supporting potential internal or external assurance needs
- Get control performers prepared with expectations prior to assurance requirements
- Develop and regularly update policies, procedures, and training to create tools to achieve ESG reporting objectives

05

Monitoring Activities

- Consider expanding the role of internal audit functions to include assurance of ICSR. Internal audit can assess the design, implementation, and effectiveness of ESG data controls prior to any external assurance
- Encourage the chief audit executive to collaborate with leadership to build an efficient, effective, risk based ICSR portfolio

04

Information and communication

- Consider how to integrate sustainability data capture and controls into any future system discussions to scale the technology environment appropriately
- Gauge the consistency, veracity, and completeness of the data for ICSR.
- Design and implement controls to mitigate the risk of inaccurate or missing ESG data

03

Global ESG landscape

Sean Stiso & Yuval Ron

KPMG Accounting Advisory Services

Snapshot: International ESG Reporting Regulations

KPMG has identified over 300 reporting requirements* that pertain to ESG reporting and disclosure in over 100 of the largest countries worldwide.

Given the Regulatory landscape, this number is likely to continue to increase as ESG topics continue to be added to the agenda’s of international regulatory bodies

Regulation Status*	Number	Percentage
Mandatory for Companies – Final	175	65%
Mandatory for Companies – Proposed	20	7%
Optional for Companies – Final	65	24%
Optional for Companies – Proposed	10	4%
Regulations with scoping requirements in Banking / Financial Services**		
	52	19%

*Some of the reporting requirements include plans from regulatory bodies to implement future ESG reporting requirements and are not included in the represented table.

** Please note – some Banking and financial services institutions may trigger other ESG reporting requirements if they trigger other reporting thresholds, such as being traded on a public exchange or have a certain amount of revenue each year.

Snapshot: ESG Reporting Regulations by Jurisdiction

Below represents a snapshot of the top 10 jurisdictions (by number of regulations) who have issued ESG requirements. As you can see from the chart, ESG reporting regulations are becoming prominent globally, with a majority centered in the European Union and United Kingdom.

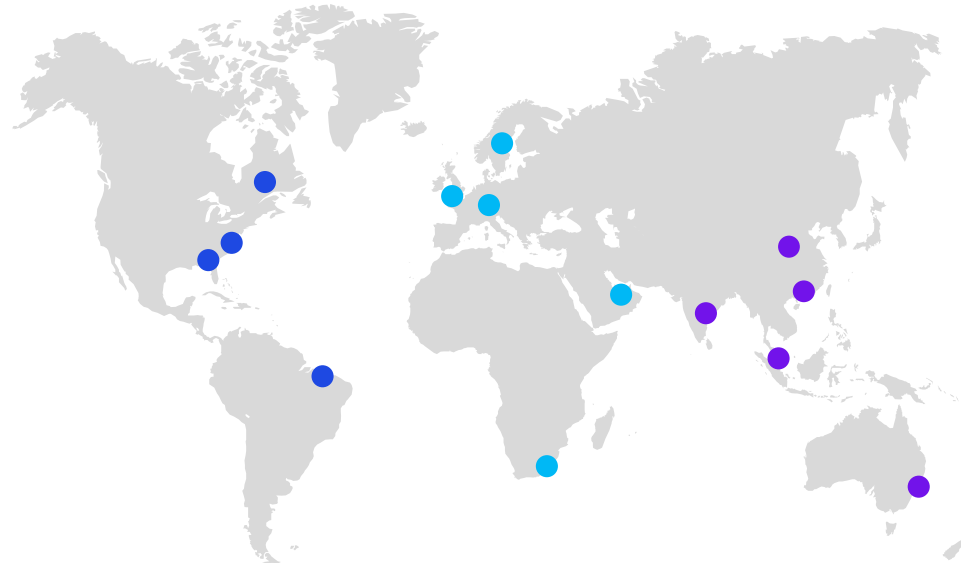

There are also several requirements that are specifically being developed for Banks and financial institutions. A majority of these are centered around assessing and managing climate-related risks within a Bank's risk management processes.

Regulation Status*	Number of Regulations	# Mandatory	# Finalized	# With scoping requirements specific to Banking / Financial Services*
United Kingdom	15	13	12	1
European Union	12	12	9	4
Hong Kong	10	9	10	3
Australia	10	4	10	1
United States of America	8	8	3	3
India	7	2	5	1
Canada	6	4	4	1
Switzerland	6	6	5	2
Norway	5	5	4	1
China	5	5	5	1

* Please note – some Banking and financial services institutions may trigger other ESG reporting requirements if they trigger other reporting thresholds, such as being traded on a public exchange or have a certain amount of revenue each year.

Other Financial Services Regulations around the world

Americas	
Climate Disclosures for Banks and Insurance Companies	Canada
Resolution BC No. 139/2021	Brazil
Enhanced Disclosures by Certain Investment Advisers and Companies about ESG Practices	United States
OCC Principles for Large Bank Climate Risk Management	United States

Asia Pacific	
Fund Manager Code of Conduct	Hong Kong
Environmental Risk Management Guidelines for Banks, Asset Managers, Insurers	Singapore
Regulations on Green Finance of Shenzhen Special Economic Zone	China
ESG Mutual Fund Schemes	India
CPG 229 – Climate Change Financial Risks	Australia

EMEA			
Green Taxonomy	United Kingdom	Regulation 28 of Pension Funds Act	South Africa
Securitizations Related Sustainability Disclosures	European Union	EBA Pillar III Disclosures (CRR)	European Union
CBB Circular – Climate Related Risks	Bahrain	SFDR – Disclosure of information related to sustainability	European Union
Sustainable Finance Act	Norway	EU Taxonomy	European Union

This is intended for illustrative purposes only and does not represent a complete population of global ESG regulations that may be applicable to banks.

The ESG regulatory landscape

Two ISSB proposals

- Investor focus
- General principles, including proposed requirement to report across all significant sustainability-related risks and opportunities (not just climate)
- To date, detailed guidance on climate only¹

Twelve EFRAG draft standards

- Multi-stakeholder focus, including investors
- Core principles for disclosure
- To date, granular requirements published for sustainability impacts, risks and opportunities

One SEC climate proposal

- Investor focus
- Detailed requirements to report on climate only

¹ Additional detailed guidance on other topics is planned for the future.

Perspectives on ESG as a Business Opportunity

Dylan Roberts
KPMG Strategy

Current state of play

ESG-related business opportunities and imperatives for banks

Bank focus on sustainable finance opportunities is growing – but is bipolar in nature

Large commitments and aggressive product strategies, focused on green bonds and project finance, from **Global Universal Banks** in the US and Europe

Barclays	£100BN green financing by 2030, £175MM equity in early-stage enviros. by 2025
Citi	\$1TR sustainable finance (50/50 environmental/social)
GS	\$750BN financing & investing on climate transition and inclusive growth
JPMC	\$2.5TR clean energy and sustainable finance financing 2021-2030
MS	\$1TR for sustainable solutions
Wells	\$500BN sustainable financing by 2030

Some, but significantly less, activity among mid-sized **Regionals and Superregionals**

PNC	\$20BN green financing by 2025
US Bank	\$50BN environmental finance by 2030

“All in” strategic commitment from **niche institutions** whose identity and strategy are completely or largely based on ESG

Amalgamated	“America’s Socially Responsible bank empowering organizations and individuals to advance positive social change”
Climate 1st:	“Bank like tomorrow depends on it. The status quo of inaction is no longer an option”\$50BN sustainable finance (50/50 environmental/social)
Forbright:	“A bank for a brighter future – accelerating the transition to a sustainable and clean energy economy”
Sunrise Banks	“The world’s most socially responsible bank”

Sustainability-linked loans and debt financing offer a number of potential benefits to banks

ESG and sustainability linked loans typically include incentives for the borrower to reach predetermined sustainability performance targets. ESG and sustainability-linked loans or SLLs, have become the second-largest and fastest-growing segment of ESG debt instruments¹. Global SLL sales increased from \$5.4 billion in 2017 to \$269.9 billion in August 2022.²

What's in it for lenders?

Lower cost of risk

Higher costs of ESG due-diligence and reporting are offset by a lower cost of risk. European members of the Global Alliance for Banking on Values had a **five-year average cost of risk of 25 basis points, 32% lower than the top 25 European banks** by assets in 2019.³

Regulatory and market alignment

While EU SFDR is not prescriptive about security type, bond frameworks are likely to impact Article 8 vs. 9 classification and associated inflows.

Customer attraction

SLL lenders attract more deposits than matched non-SLL lenders. **SLL lenders become more attractive to ESG conscious depositors, generating positive NPV growth.**⁴

Goodwill & marketing

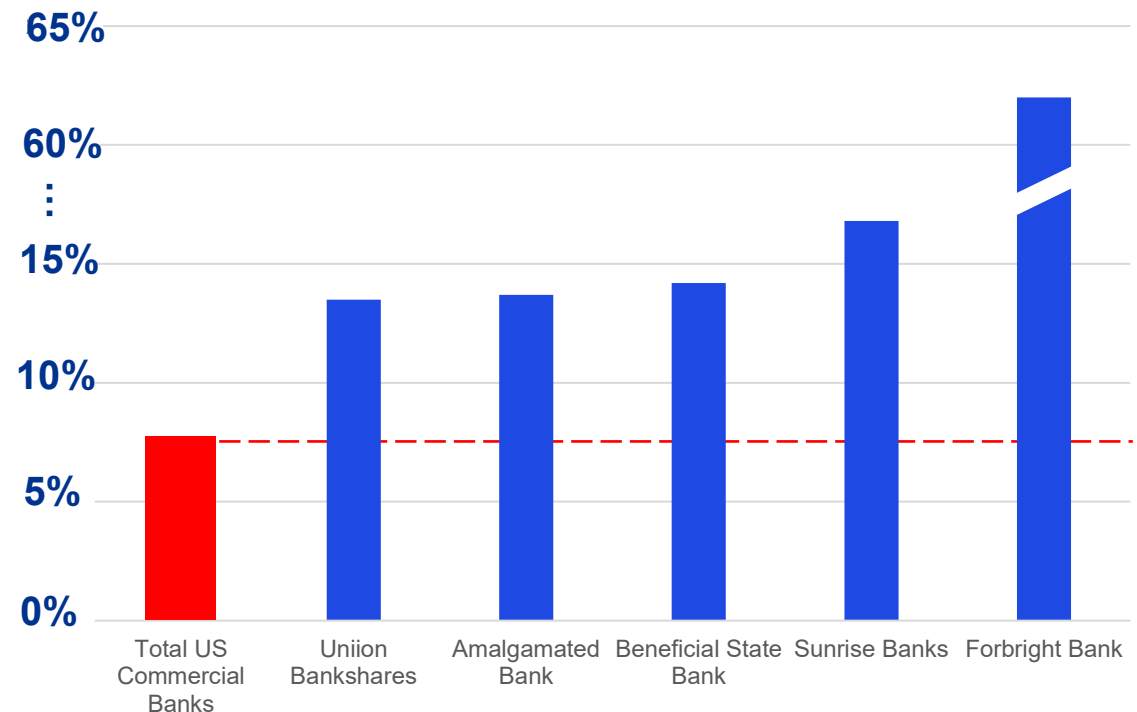

Leading banks see SLLs as an opportunity to **strengthen public trust.**⁵

Possible opportunities & initiatives

- Build-out of green financing product set (not “vanilla products with lower rates”)
 - Products with complex regulatory and tax considerations (e.g., Solar, RPACE)
 - Transition finance aimed at unlocking “hidden” commercial demand (e.g., clean energy and efficiency, CRE climate upgrades, clean fleet loans) - bundled with advisory offer/sales process
 - Standardized measurement and attestation frameworks and analytic support
- Enhanced. focused coverage of emerging green/transition segments
 - Dedicated coverage teams
 - Tailored U/W processes to account for segment age, growth characteristics
 - Establish securitization capability
 - Specialized pricing unit to facilitate trading
- Acquisition/partnership with mission-driven ESG banks with at-risk funding bases and/or with complementary footprints
- White-label or back-to-back products, syndications for smaller regional and community banks
