

Al in Finance delivers significant value

SAP Al-driven finance transformation enabled by KPMG

Artificial intelligence (AI) can help finance organizations to gain a competitive advantage and stay ahead of customer and employee demands.

The use of generative AI, combined with machine learning and automation tools, can empower finance leaders to unlock business value, enhance user productivity, and improve profitability and revenues.

Al can help finance leaders to process, analyze, and gain meaningful insights from the vast amounts of unstructured data available within their finance ecosystem. This enables them to make better strategic decisions, leading to new growth opportunities and value.

Finance organizations continuously face challenges-the ever-evolving regulatory environment, the risks associated with adopting new technology, and the deep-rooted processes within the business-cause complexity and can often prevent leaders from pursuing change.

KPMG LLP and SAP are helping organizations unlock value during their SAP transformation by harnessing Al within the SAP stack to enhance productivity, profitability, and value.

KPMG can help you deliver business value

The combination of KPMG finance transformation knowledge along with experience in implementing SAP solutions helps organizations to fully utlize AI in their digital transformation.

Together, KPMG and SAP help to accelerate value and ensure success in your Al journey.

KPMG can help you activate SAP out-of-the-box functionality for SAP S/4HANA and SAP RISE

The SAP AI engines within SAP S/4HANA and SAP RISE integrate AI capabilities into all your finance processes, providing advanced automation, intelligent data insights, and powerful decision-making tools.

These capabilities can help your finance teams to focus on more value-added strategic tasks:

Deliver business

value

Intelligently match transactions

KPMG can help you focus on value creation and ROI

Utilizing our unmatched sector experience and a suite of finance AI use cases, we help finance leaders build a strategic AI roadmap and achieve a measurable return on investment (ROI).

From understanding your functional needs to helping ensure optimum data security and governance to empowering users, we unlock Al capabilities within your SAP stack. This leads to greater process efficiencies and improved user productivity. The combination of our risk management and governance capabilities, along with the KPMG Trusted Al Framework, allows us to implement safeguards to help ensure that your SAP Al model and financial data are ethical, reliable, and secure.

KPMG can help you deliver impactful business outcomes

Business led, cloud first, industry focused, platform enabled

KPMG understands the complexities associated with an SAP S/4HANA-enabled business transformation. We apply a business-first approach to an organization's move to SAP S/4HANA, starting with an in-depth understanding of the strategic imperatives driving your need for change.

Our tested methodologies, SAP accelerators, the KPMG Powered Enterprise Framework, and our Trusted AI offering enable us to help businesses unleash the power of SAP S/4HANA and succeed faster with their transformation.

By implementing an SAP Al-driven finance transformation, organizations can access reliable financial insights to accelerate growth and create value.
