

Unleashing the power of SAP S/4HANA®

Revolutionizing and modernizing the utility industry

Utility companies are confronted with numerous challenges, including stakeholder demands, increased competition, climate concerns, decarbonization goals, and government incentives. The gap between supply and demand is widening, particularly with the growth of energy demand from data centers and the tech sector. They must navigate evolving compliance standards, state and federal regulations, and increased cyber risks.

To address these challenges, utility companies must invest in new technologies, such as smart grids, renewable energy sources, and demand response programs and modernize their grid infrastructure and business models to secure a sustainable and successful future.

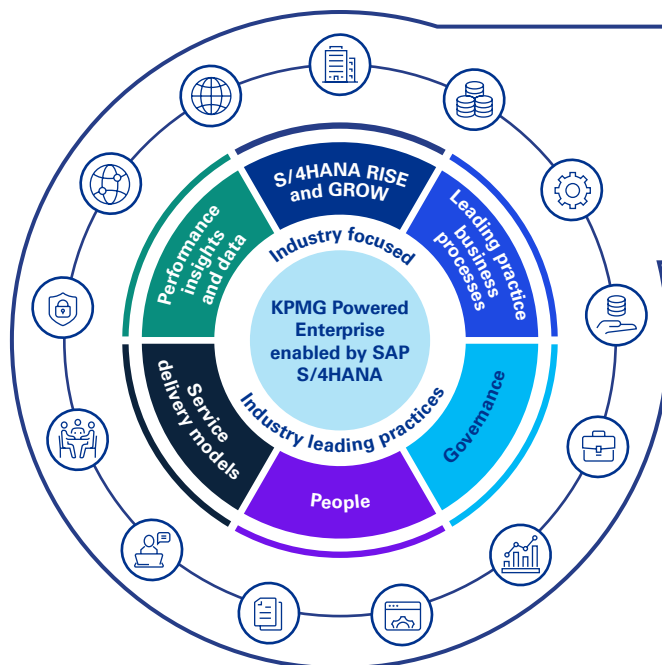

SAP S/4HANA provides a platform for sustainable, transformative change, delivering value to the businesses and stakeholders.

KPMG is helping utility companies to unleash the power of SAP S/4HANA through a business-led, cloud-first, platform-enabled approach.

The path to modernization

Unleashing the power of SAP S/4HANA with KPMG Powered Enterprise

KPMG Powered Enterprise is our **outcome-driven, functional transformation solution that aims to drive rapid transformation and efficient time-to-value for clients.** KPMG Powered Enterprise enabled by SAP is preconfigured, rooted in KPMG professionals' extensive knowledge of leading-practice business processes and operating model standards. It includes established delivery capabilities and SAP leading technologies to help drive sustainable change, enhanced performance, and lasting value. Through our deep industry and functional knowledge and extensive experience of managing SAP S/4HANA implementations, we deliver dynamic, agile, data-driven operating models that position businesses for growth and innovation.

Click any plus symbol on the diagram to find out what's in the Target Operating Model.

Efficient, scalable, risk-mitigated, industry-focused, six-tier, globally standard target operating model harnesses the value of SAP S/4HANA.

- Finance
- Work and asset management
- HR
- Procurement
- Supply chain
- Planning
- Tax

KPMG industry professionals can help you meet the future with confidence

As utility companies continue to balance a competing set of demands, our team of industry professionals has experience across the disciplines necessary for utility companies to reinvent themselves for the future. We can help organizations to create robust strategies, teams, and operating models that can quickly adapt in a rapidly evolving environment.

By focusing on technology and innovation, risk and resiliency, capital investments, and tax transformation, our teams can help you address some of your pressing challenges so you can better manage your costs, improve efficiencies, and have confidence in your decision-making.

Our teams help you to manage the challenges of:

Dynamic infrastructure needs

Supply chain

Regulators and regulations
