

Responsive operations supply chain

KPMG Connected Enterprise for Life Sciences

For the Connected Enterprise, delivering on the brand promise means executing your provider strategy through an agile, consistent and operationally efficient supply system powered by advanced analytics.

» Providers and patients have higher expectations than ever before. And, with new start-ups offering faster experiences based on innovative business models, it's crucial for companies to embrace change to stay competitive. Building a responsive supply chain requires transformation in technology systems and a shift in corporate culture as well.

» KPMG has the right enterprise decision analytics, operating models and procurement services to help you transform your organization's processes. Connected Enterprise lets you create efficient, cost-saving opportunities across the value chain, so you can act with speed and agility. We can help you craft an outstanding, seamless experience for you and your suppliers, and reduce costs for your organization, too.

Key considerations

- Do you enable customers with an omni-channel experience?
- Do your fulfilment and delivery options allow customers to select their optimal mix of speed, service and price?
- Do you leverage Data & Analytics across the full value chain to drive enterprise improvement?
- Are your global and local inventories aligned with a flexible, distributed order management system?

How KPMG can help

- Designing, automating and creating a seamless supply chain process
- Providing enterprise decision analytics services to help guide enterprise efficiency, effectiveness and risk compliance
- Building digital operating models and value-stream analyses that help optimize the improvements required to drive "inside out" operational efficiency
- Powering responsive operations, a suite of integrated services and solutions designed to improve procurement effectiveness and responsiveness

A prescription for success

Teva Pharmaceutical Industries Ltd., the global pharmaceutical giant, serves 200 million patients per day in more than 60 countries. The organization had a number of component companies, but each had its own procurement systems, processes and platforms. Without centralized control, inefficiencies were inevitable. To standardize supply chain management across the entire enterprise, KPMG helped Teva unify its systems across a single, integrated platform. The next-generation, digitally enabled supply chain management system KPMG created now makes the process more transparent, more responsive, faster and less costly. It's a flexible, evolvable, transformed management system that can grow with the company.

We know how business works.

What does a Connected Enterprise look like?

The most successful organizations exhibit eight characteristics that span all aspects of the enterprise. The capabilities of front office, middle office and back office integrate seamlessly to support your brands, products and services, interactions and workforce.

Make the connection

Generate business value at every stage of your transformation journey

Build an insights-driven, digital and customer centric business

Empower and enable your people to align the organization for agility and performance

Engineer secure architectures to enable agile, high-speed innovation
