

Unleashing the power of SAP S/4HANA®

Revolutionizing industries and transforming enterprises

An SAP S/4HANA–enabled business transformation with KPMG provides the opportunity for organizations to meet their future with confidence.

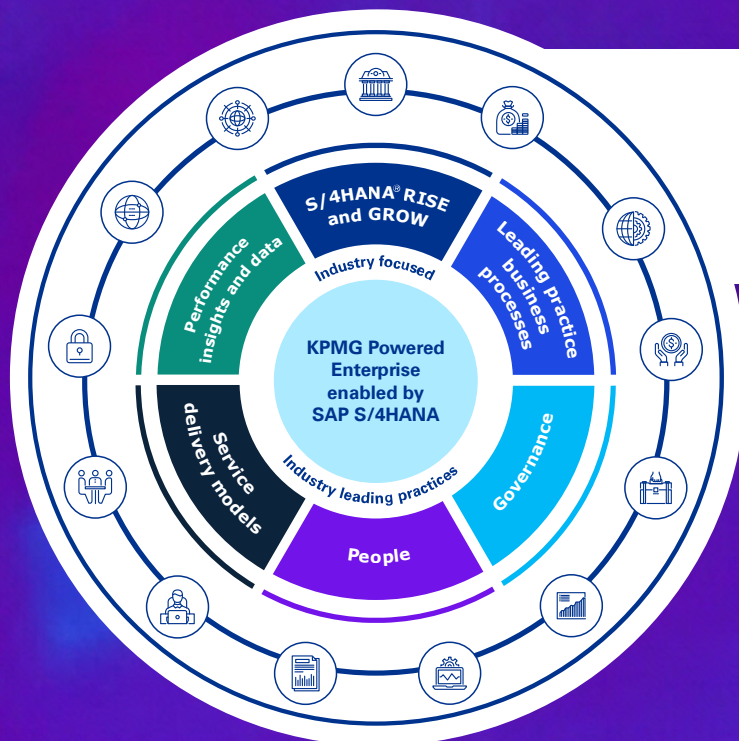

Businesses moving to SAP S/4HANA have the opportunity to create an environment for sustainable transformational change, improve performance, and deliver lasting value. This cloud-enabled platform enables organizations to benefit from greater efficiencies, automated and streamlined end-to-end business processes, meaningful insights to inform strategic decisions, and strengthened risk and compliance programs.

SAP S/4HANA can facilitate significant business improvements but, without the necessary expertise and guidance, a transformation of this size has the potential to be overly complex, expensive, and risky—which can lead to poorer than expected metrics and outcomes.

KPMG is helping businesses to unleash the power of SAP S/4HANA—through a business-led, technology-enabled, cloud-first, industry-focused, and platform-enabled approach.

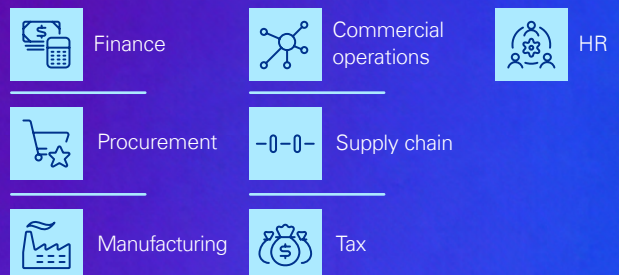

⚡ Unleashing the power of SAP S/4HANA with KPMG Powered Enterprise enabled by SAP

KPMG Powered Enterprise is our **outcome-driven digital transformation solution that combines deep industry-focused business process knowledge, established delivery capabilities, and leading technologies** to help drive sustainable change, rising performance, and lasting value. Fueled by a winning combination of deep industry and functional knowledge and leading SAP business processes, we deliver dynamic, agile operating models that position businesses for growth and innovation.

+ Click any plus symbol on the diagram to find out what's in the Target Operating Model.

Efficient, scalable, risk-mitigated, industry-focused, six-tier, globally standard target operating model harnesses the value of SAP S/4HANA.

Business led, cloud first, industry focused, platform enabled

KPMG understands the complexities associated with a SAP S/4HANA-enabled business transformation. We apply a business-first approach to an organization's move to SAP S/4HANA, starting with a deep understanding of the strategic imperatives driving your need for change.

Valued for our ability to deliver enterprise-scale business transformation, our professionals bring a wealth of knowledge, skills, and experience to deliver a transformation solution—from the operational core of your business and across business processes toward consistent value generation.

Along with our tested methodologies, SAP accelerators, the KPMG Powered and Trusted Framework, and our Trusted AI offering enables us to help businesses unleash the power of S/4HANA and succeed faster with their transformation.

Unleash the power of SAP S/4HANA

Delivering of dynamic, agile operating models

Succeed faster

People, methodologies, and accelerators

Meet the future with confidence

Business led, cloud first, industry focused, platform enabled

Client success story

KPMG helped the largest global IT infrastructure services provider to simplify/streamline its business globally with SAP S/4HANA, enabling it to focus on providing excellent services to its clients.

KPMG played a pivotal role in helping our client separate from costly legacy applications while simplifying/streamlining and standardizing critical business processes and driving clarity through unified data. In order to meet a 24-month transitional services agreement (TSA) exit deadline from its parent company, a global KPMG team helped our client through a fit-for-purpose transformation of its front-, middle- and back-office functions such as Quote-to-Cash, Project Management, Labor Claiming, Finance & Accounting, Tax, and Procurement. More than 375 legacy systems and applications were replaced with a single global SAP S/4HANA private cloud instance on Azure in more than 65 countries, leveraging our KPMG Powered for SAP S/4HANA for the Professional Services industry assets. KPMG helped our client to successfully exit its TSA (within the 24-month TSA timeframe) while limiting operational disruptions, thus playing a pivotal role in helping our client separate from costly and complex legacy applications and processes, while streamlining critical processes and unifying data.

Why KPMG

By focusing on value and performance, we help organizations to solve some of their most pressing business challenges and successfully execute on their move to SAP S/4HANA. Our trusted experience in people and industry-focused technology-enabled business transformations, combined with the advanced capability of SAP's digital and cloud-based ecosystem, can help guide you to face the future with confidence.
