Agenda

Wrangling Your Data

- 15–20 Minutes

Integrated Tax Modeling

- 10–15 Minutes

Tax Reporting

- 10–15 Minutes

Generative AI Use Cases

- 10 Minutes

01

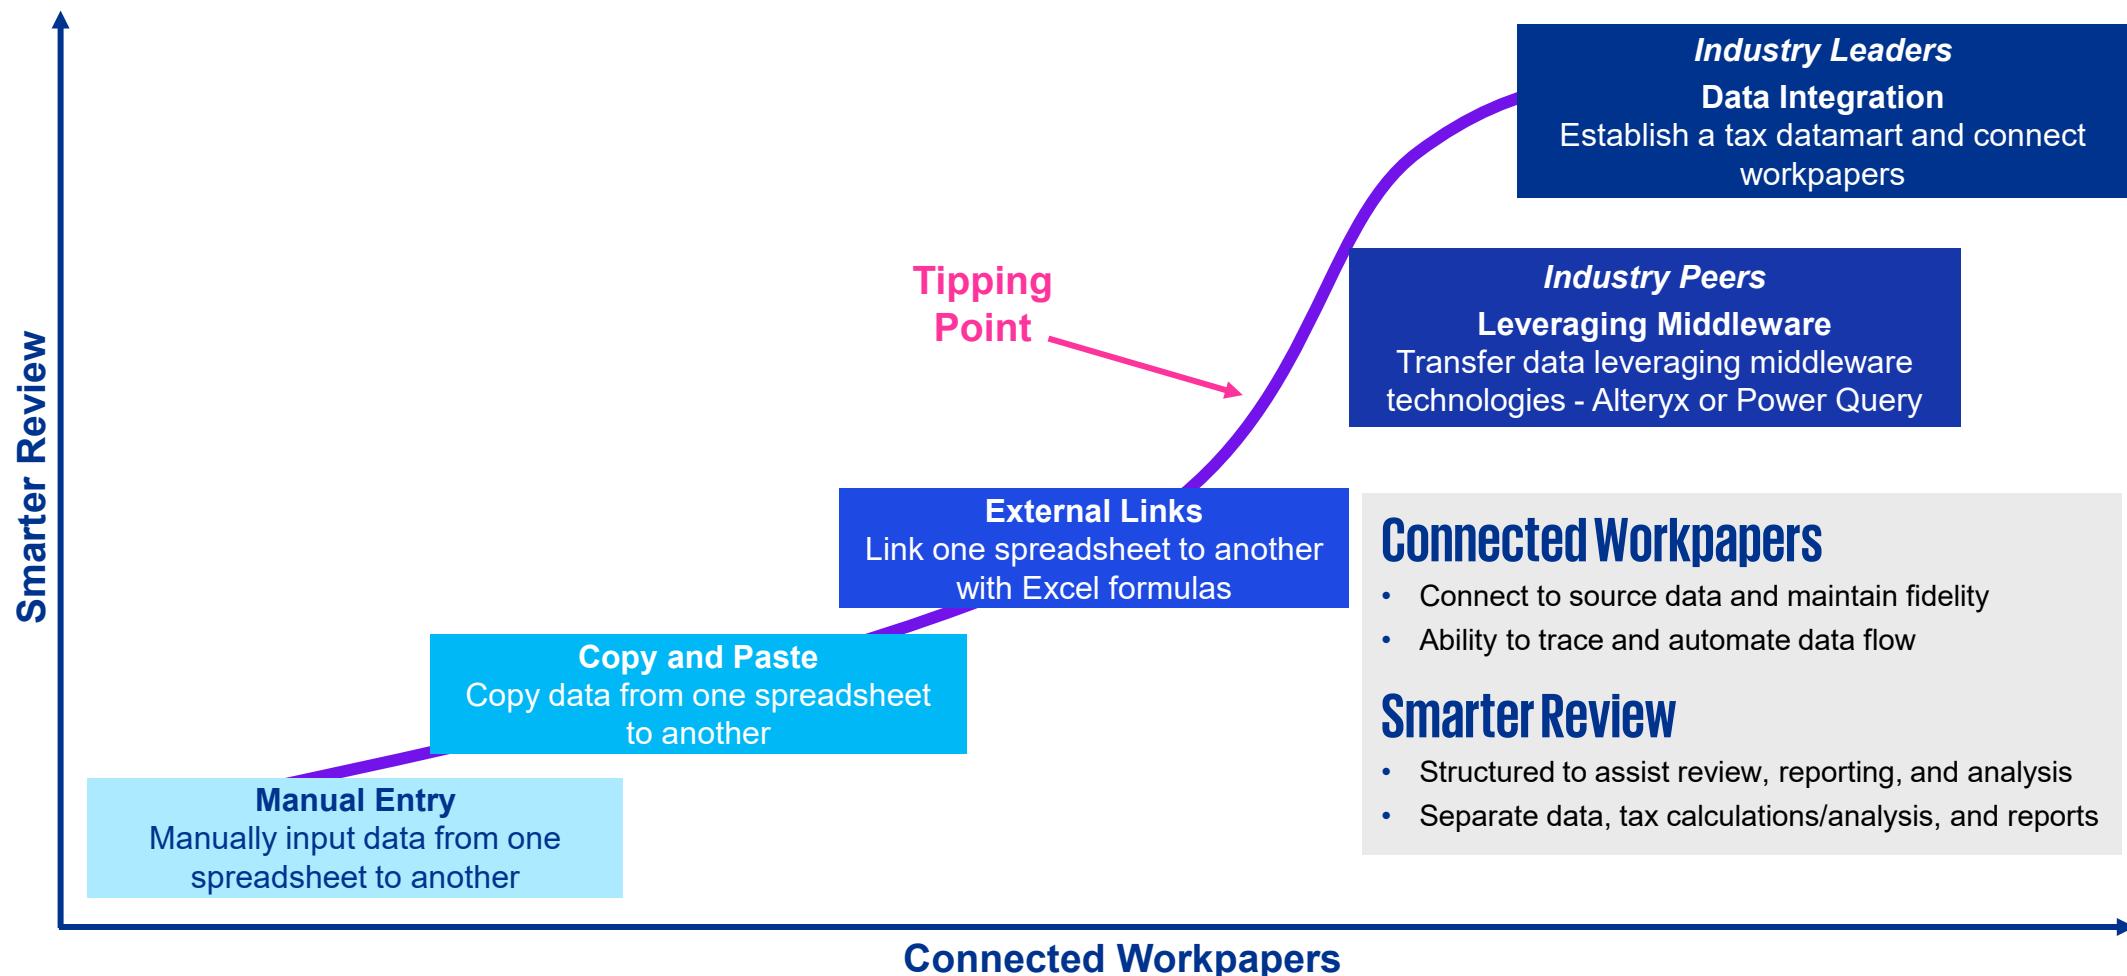

Wrangling your Data

Tax department challenges

Data integration with connected WPs and smarter review

Common data elements

Data Hierarchy

Once you have identified the data elements, create a mapping hierarchy that traces the requirements to their ultimate data source with the goal of ultimately building an automated process.

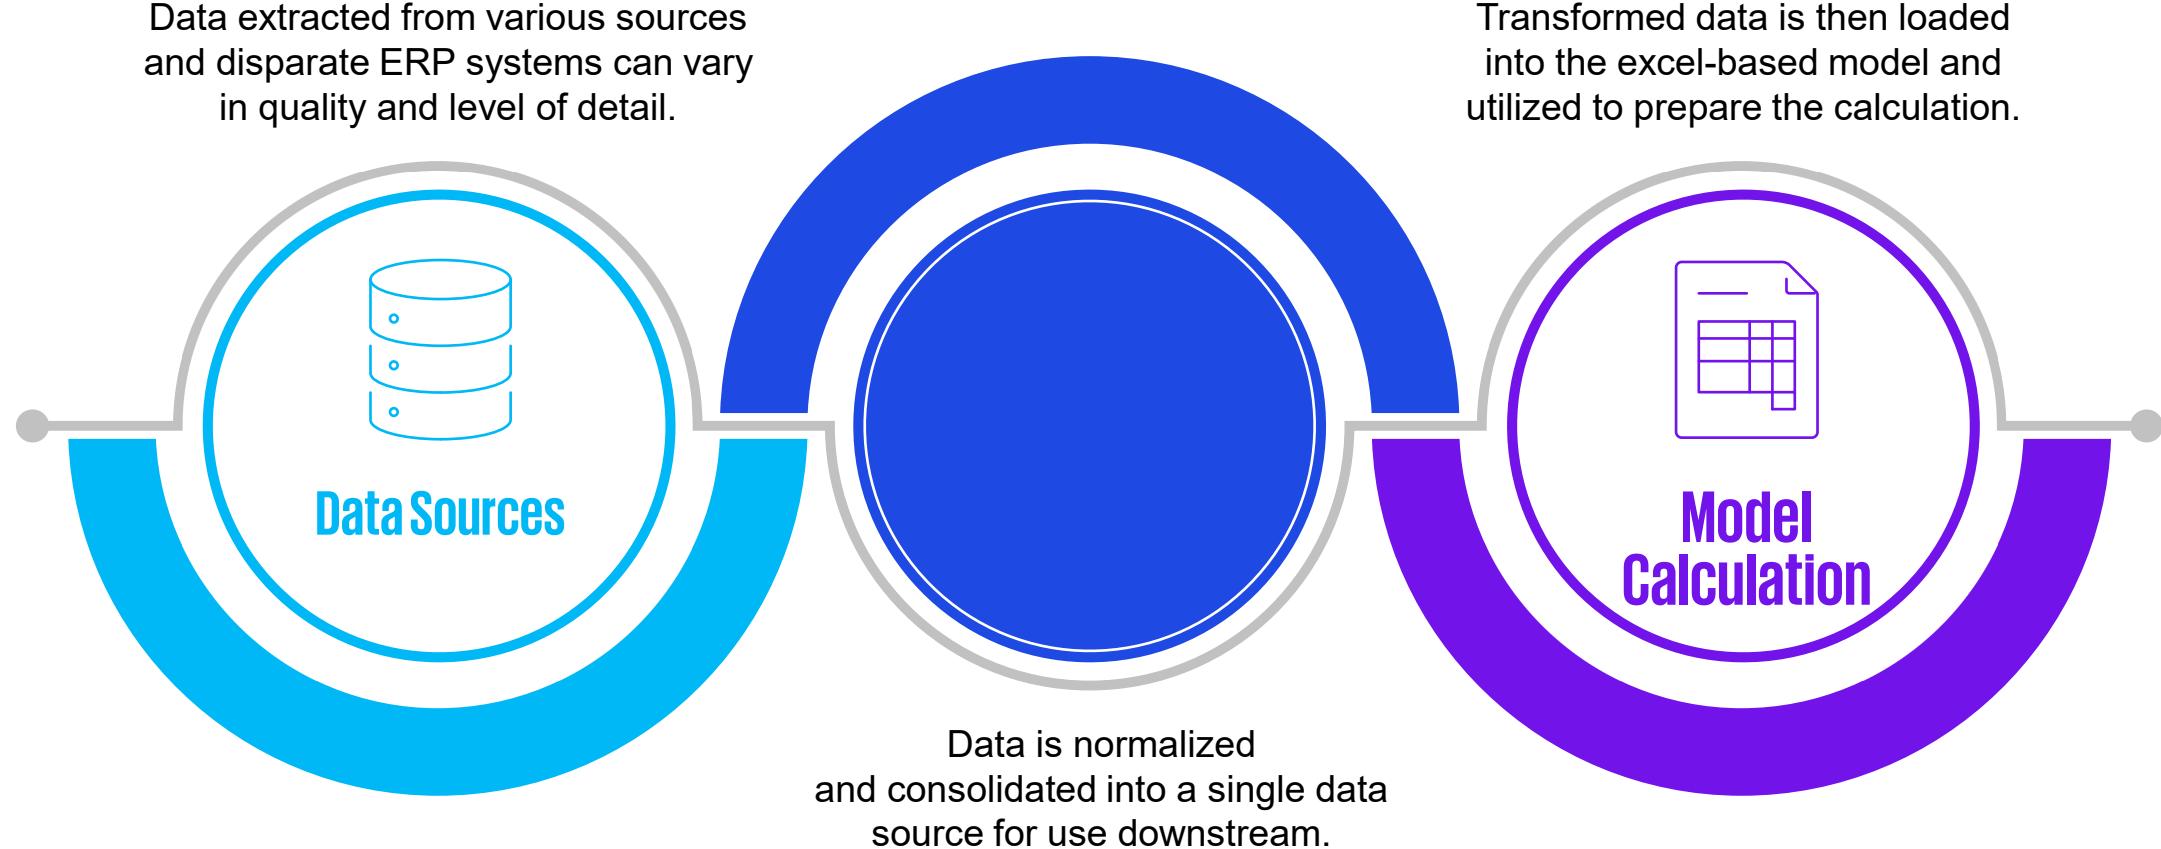

Data Mapping

First identify the data elements required for one use case, then determine where else that data might be used.

-  – Required
-  – Conditional
-  – Not Required
- 1 – Material?

	Data elements by jurisdiction	EU PCbC	FASB	GRI	Pillar 2	CAMT
Entity-level US GAAP 	Top-side US GAAP adjustments	✓	✓	✓	✓	✓
	Intercompany transactions under US GAAP	✓	✓	✓	✓	✓
	Purchase accounting adjustments	✓	✓	✓	✓	✓
	Out-of-period adjustments	✓	✓	✓	✓	✓
	Revaluation adjustment gain/loss	✗	✓	✓	✓	✗
	Pension deferred & permanent items	✓ 1	✓ 1	✓ 1	✓	✓
	Stock-based compensation permanent items	✓ 1	✓ 1	✓ 1	✓	✓
	Reorganization deferred gain/loss	✗	✗	✗	✓	✓
	All other book-tax differences	✓ 1	✓ 1	✓ 1	✓	✓
Other 	PP&E by jurisdiction	✓	✗	✓	✓	✗
	Employee compensation	✗	✗	✓	✓	✗
Corporate Income Tax 	Current tax expense	✓	✓	✓	✓	✓
	Deferred tax expense	✓	✗	✓	✗	✗
	Change in uncertain tax positions/other tax expense	✓	✓	✓	✗	✗
	Refundable tax credits & other incentives	✓ 1	✓ 1	✓ 1	✓	✗
	Deemed dividend inclusions (Sub F/GILTI)	✓	✓	✓	✓	✓
	Schedule of DTLs by expected/actual reversal date	✗	✗	✗	✓	✗

The screenshot shows the Snowflake Data Prep interface. At the top, there are three tabs: 'KBAT_Excel: Table Preparation', 'KBAT_Excel: Trial Balance ...', and 'KBAT_Excel: Create Consol...'. The main area is a code editor with the following content:

```

1 USE ROLE KBAT_DEMO_ROLE
2 USE DATABASE TRAINING_DB
3 USE SCHEMA KBAT_EXCEL_DEMO
4 USE WAREHOUSE TRAINING_WH
5
6 SELECT * FROM TBL_TRIALBALANCE_ORACLE
7 SELECT * FROM TBL_TRIALBALANCE_SAP1
8 SELECT * FROM TBL_TRIALBALANCE_SAP2
9
10
11 -- Load data from stage: 2023 Q3
12
13 -- Oracle Q3
14 COPY INTO TBL_TRIALBALANCE_ORACLE
15 FROM (SELECT $1::STRING AS "Legal Entity",
16 $2::STRING AS "Legal Entity Name",
17 $3::STRING AS "Natural Account",
18 trim(replace(replace(REPLACE($4, ',', ''),'',''),'(',')'))::FLOAT AS "Amount",
19 METADATASFILENAME,
20 REGEXP_SUBSTR(METADATASFILENAME, 'Q[0-9]', 1, 1) AS quarter
21 FROM @FILELOADING/Oracle_TrialBalance_Q3.csv)
22 FILE_FORMAT = (TYPE = 'CSV', FIELD_OPTIONALLY_ENCLOSED_BY='', SKIP_HEADER = 1)
23 FORCE = TRUE;
24
25 -- SAP1 Q3
26 COPY INTO TBL_TRIALBALANCE_SAP1
27 FROM (SELECT $1::NUMBER AS "Company Code",

```

The 'Results' tab is selected, showing a table with columns: COCD, GL, AMT, FILENAME, and QUARTER. The message 'Query produced no results' is displayed. To the right, the 'Query Details' panel shows: Query duration 62ms, Rows 0, and Query ID 01b411cd-0d06-1ea2-0...

Where do we go from here?

Begin Compliance & Required Tax Disclosures

Complete first set of last mile reporting for all compliance and tax disclosure items leveraging automated internal data processes and KPMG platforms

Implement Selected Solution(s)

Execute against action plan by implementing new platforms and systems to automate/connect to current compliance processes using Digital Gateway

Knowledge Sharing with Internal Stakeholders

Hold discussions with identified data owners to develop a common understanding, learn where the data resides and get buy-in

Develop Data Action Plan

In cataloguing data and performing computations, develop a specific action plan to achieve data automation goals

Document, Organize, & Catalogue All Data Sources

Identify owner and location for data points currently labelled as “unknown” in tracker file and consider whether current systems are effective in providing such data to Tax

Organize & Tag Available Data vs. Unknown

Assess full population of data points readily available via compliance workstreams and build into overall future state data action plan

02

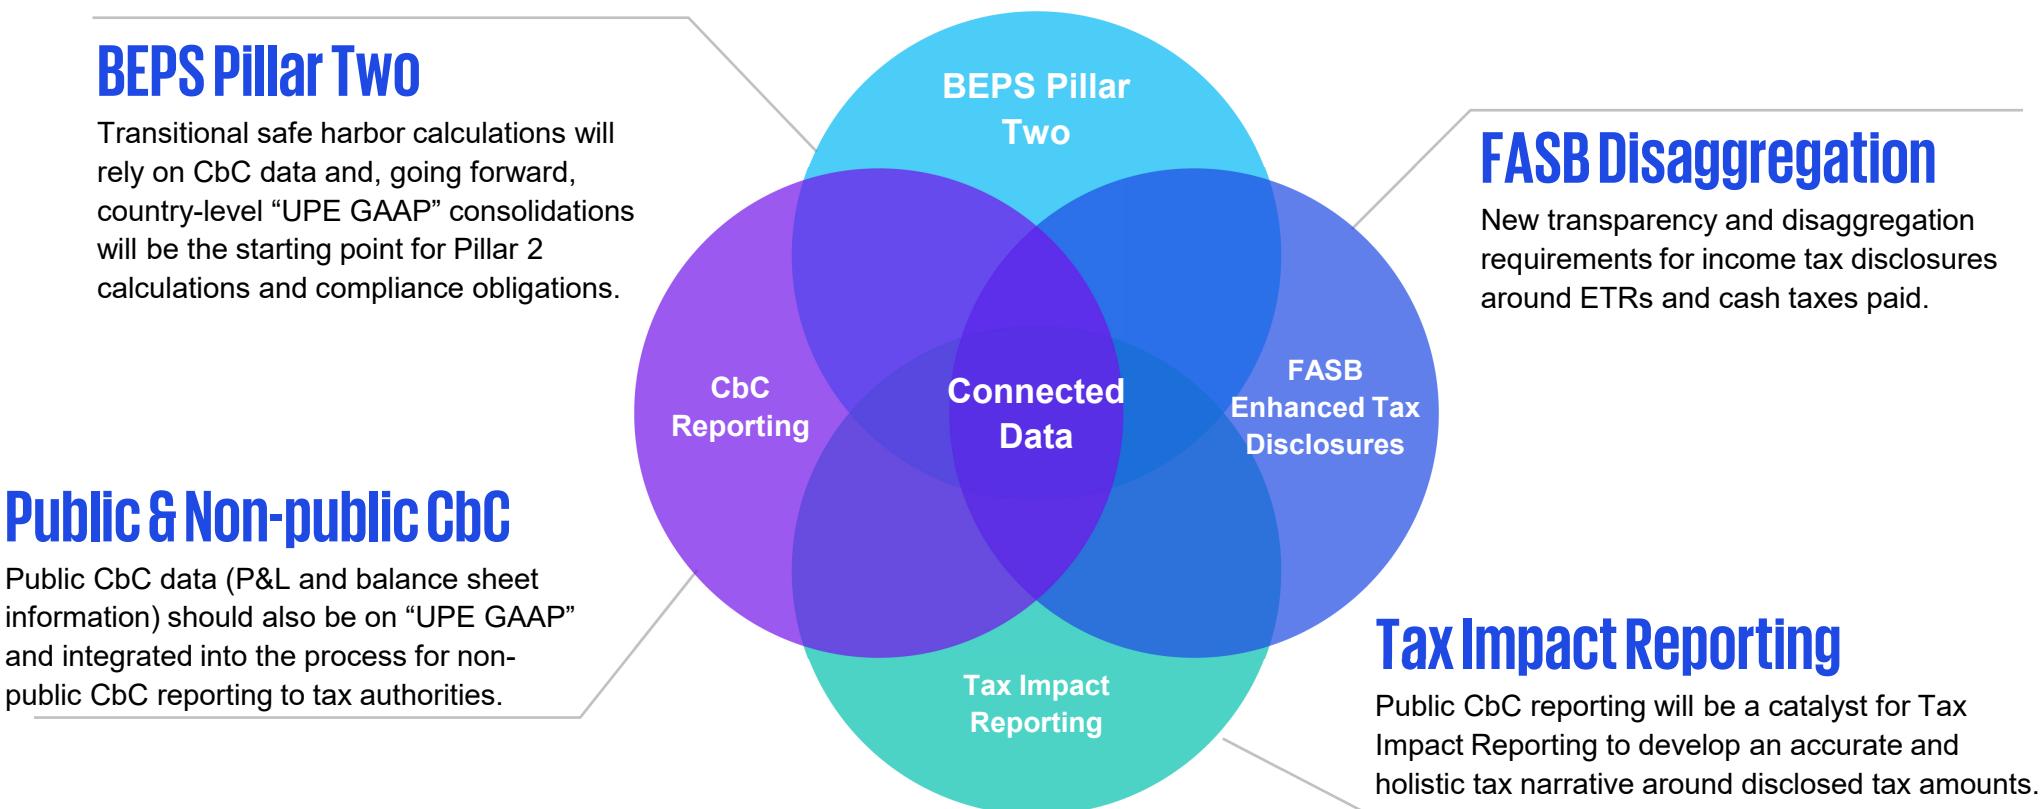

Integrated Tax Modeling: Demonstration

03

Tax Reporting

Multiple use cases

BEPS Pillar Two, Public CbCR, and new FASB Income Tax Disclosure requirements have cast a significantly greater focus on CbC data and related disclosures. MNE groups are revisiting their data collection and reporting processes with the view of collecting data once and using it for multiple use cases.

04

Generative AI Use Cases

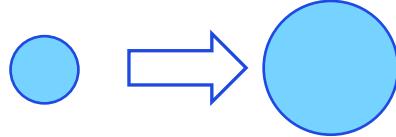

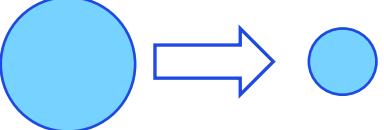

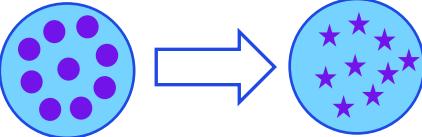

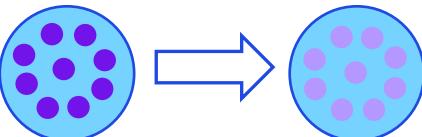

What is Generative AI?

Generative AI refers to a subset of artificial intelligence technologies that **creates new content**, text, or data **based on the input** it receives.

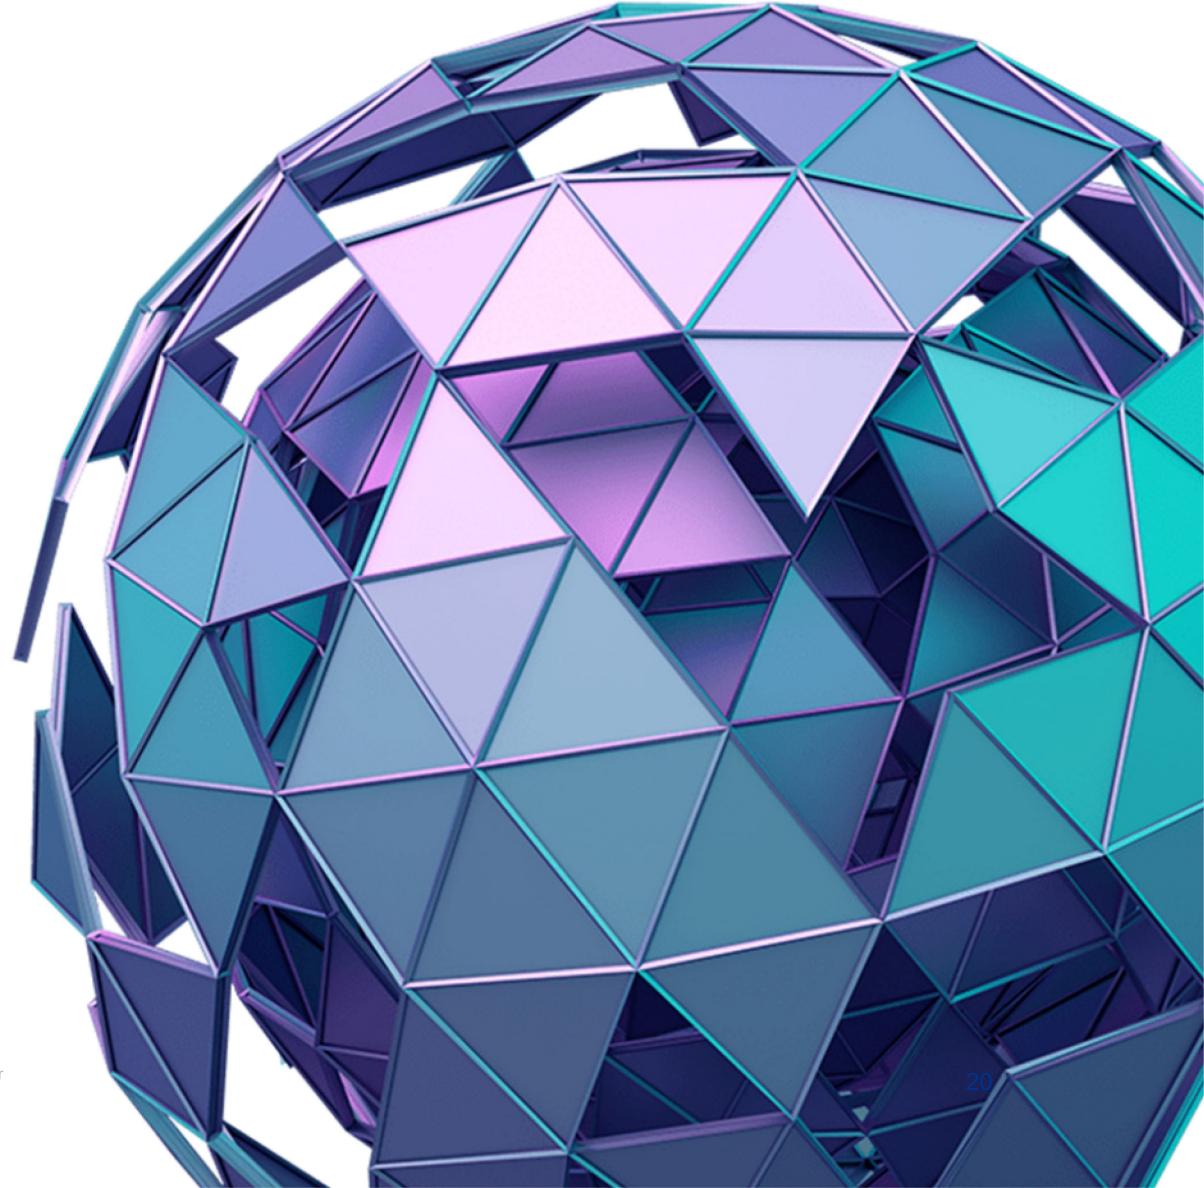

Generative AI uses advanced machine learning algorithms, such as deep learning and natural language processing, to analyze, understand, and **generate human-like responses**.

What can Generative AI do?

Capabilities	Representations	Examples
Write		<p><i>"Create a bulleted list of project scope assumptions from the following meeting notes"</i></p> <p><i>"Describe the general income tax filing procedures for multinational corporations"</i></p>
Explain		<p><i>"Summarize key themes from this tax legislation update"</i></p> <p><i>"Explain how changes in manufacturing supply chain might impact US state income tax apportionment calculations"</i></p>
Edit		<p><i>"Analyze the following allocation and apportionment data"</i></p>
Compare		<p><i>"Compare the following two XMLs of filed returns and identify the material differences"</i></p>

Large language models

- Internet-scale data
- Pre-trained
- Needs instructions
- Recognizable patterns

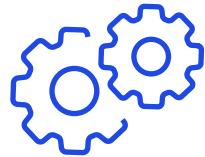

Thinking about Generative AI

Personal Productivity

How is it applicable?

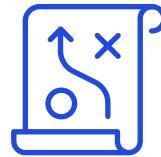

- Researching & analysing internal and external data with a GPT interface
- Preparing, streamlining deliverables and outputs
- Gaining better insights, more efficiently

End-to-end Business Process Optimization

How is it applicable?

- Scrape data, identify patterns
- Generate qualitative outputs and reports from quantitative and qualitative inputs
- Full-scale processes enhanced with back-end AI capabilities

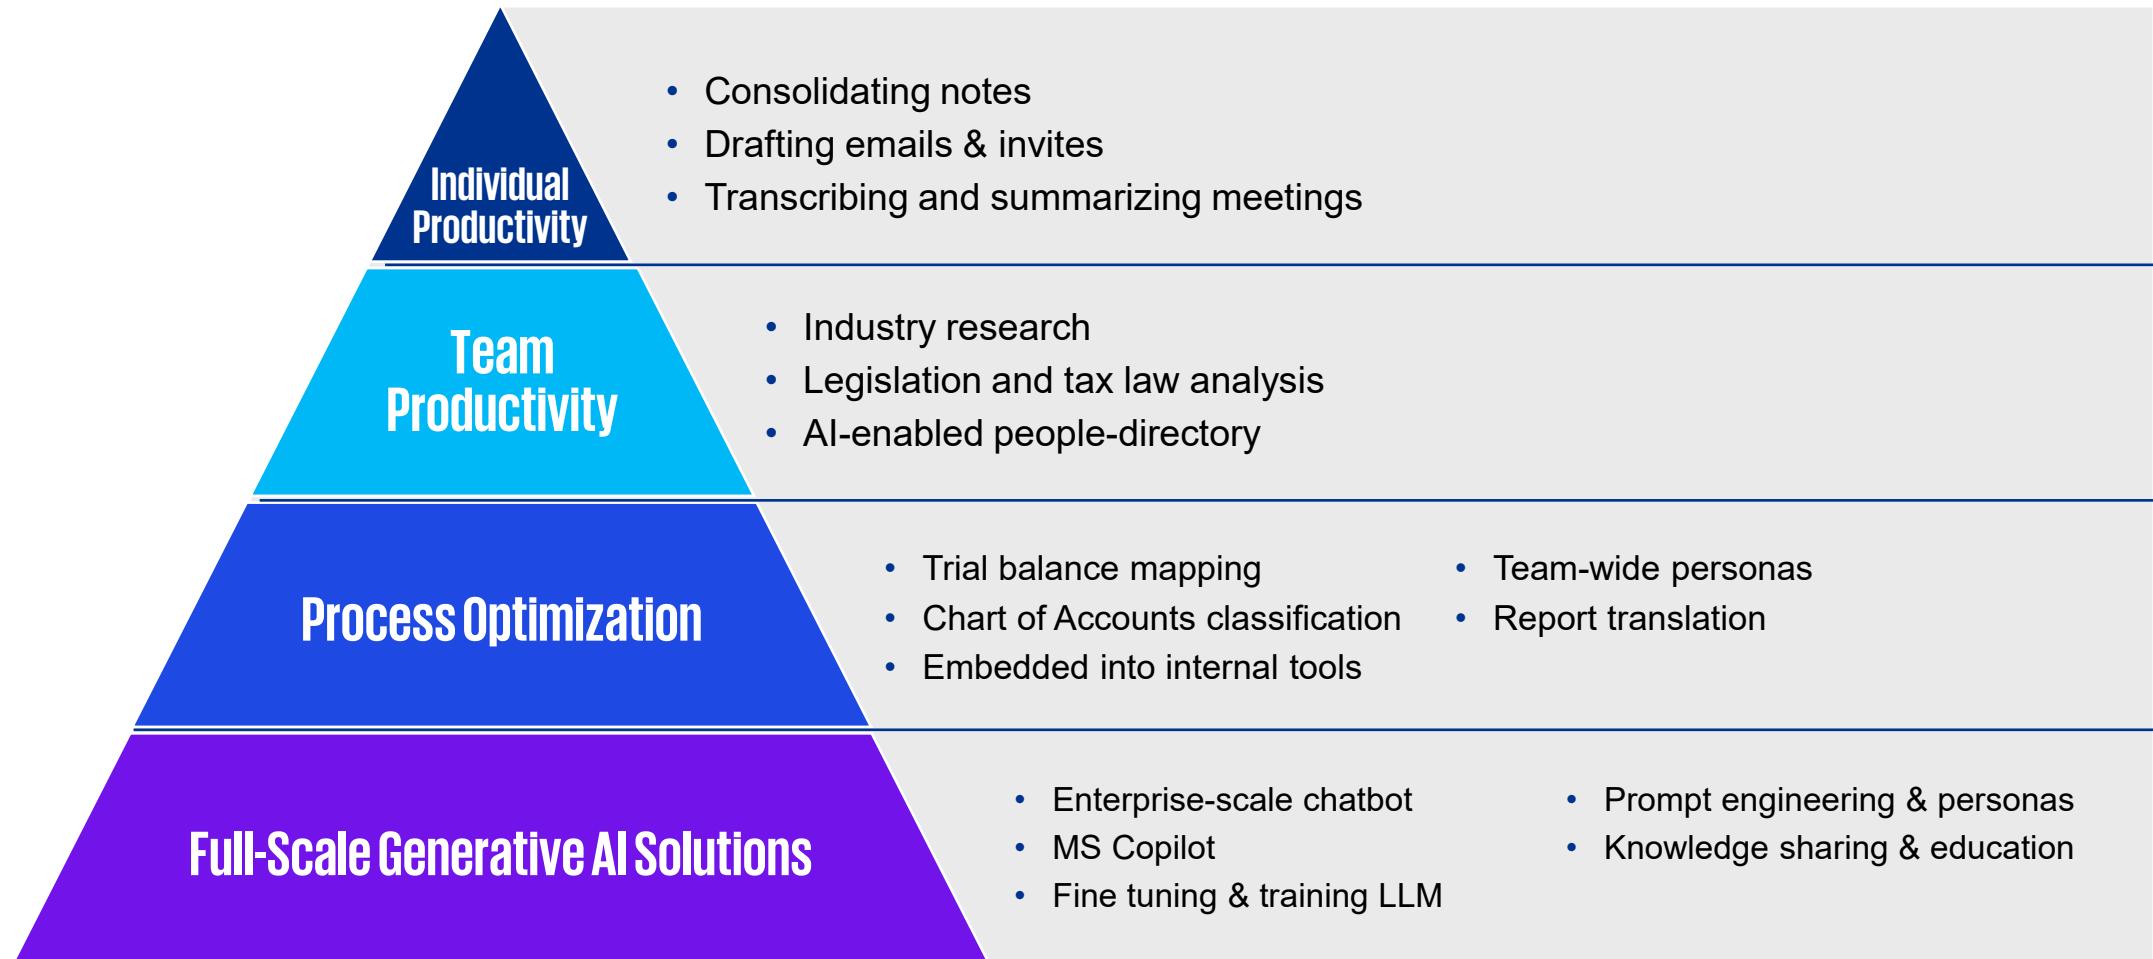

Strategic Value Creation

How is it applicable?

- Near-time analysis and business decisions
- Breaking down the boundaries between working groups
- Connection to other areas of the organization

Gen AI in tax organization

Key questions for the future

Here are some timely questions that we are discussing with our teams and clients.

- **Have you or your organization taken a position on the use of generative AI?**
 - How well do you think you understand the technology?
 - What opportunities do you see for your organization, for finance and for tax? What risks?
- **If your organization does not have a secure generative AI capability, do you know whether your employees are using open source applications?**
 - What risks do you foresee?
 - Has your organization defined the path to a secure generative AI capability?
- **Have you begun to think about how generative AI might impact your resource needs (e.g., numbers, skills, organization, etc.)?**
 - What opportunities and impacts do you foresee?
 - How might it impact capacity and costs?
- **Have you given any thought about how generative AI might enable tax to play a value-creating role (e.g., strategy and business decisions)?**
 - Could generative AI affect your response to new tax issues (e.g., Stakeholder reporting, BEPS 2.0 Pillar 2, Public C-by-C Reporting, etc.)?
- **How might generative AI impact your data strategy and related risk policies?**
- **Have you begun to consider how tax authorities and auditors might use generative AI?**

Gen AI for Tax

The screenshot shows the KPMG GenAI for Tax interface. At the top, there is a navigation bar with the KPMG logo, the text "GenAI for Tax", and icons for "T Demo Inc", a gear, and a TV. The main content area is a purple box containing the text "You are chatting with" and "Safe Harbor Analyzer". Below this, a message says: "Hello! I'm Safe Harbor Analyzer, an AI Tax Expert proficient in analyzing Safe Harbor legislation and understanding tax laws. I can provide comprehensive comparisons, strategic plan development, and risk analysis, all while interacting with tax documents and legislation." Underneath the message, it shows "Model: GPT-4o" and "Creativity: 1 - Conservative and predictable". At the bottom, there is a text input field with a placeholder "Enter your prompt here" and a green send button with a white upward arrow. Below the input field, there is a section titled "Extensions BETA" with a list of various AI tools: KPMG Tax Knowledge, Web Search, Documents, BTE Help, Fixed Assets, Exempt Cert, KMARS, Cross Borders 2024, DST, GIR, BMF, BP GPT, FAQs, Geschäftsberichte, Gesetze, Invoices, Konzernrichtlinie, Prozesse, Sachzuwendungen, and Excel Transformer.

You are chatting with
Safe Harbor Analyzer

Hello! I'm Safe Harbor Analyzer, an AI Tax Expert proficient in analyzing Safe Harbor legislation and understanding tax laws. I can provide comprehensive comparisons, strategic plan development, and risk analysis, all while interacting with tax documents and legislation.
