

# The Asset Management Reporting Suite

Reimagining your private funds reporting needs

The ability for asset managers to centralize data reporting in one system is a key factor in improving overall data proficiency and reliability.

The KPMG Asset Management Reporting Suite is an advanced technology solution designed to power your asset management reporting needs and generate one global source of data. Our practitioners specialize in providing an ongoing managed service that fits your unique reporting requirements and delivers data-driven insights that enable you to make better strategic and operational decisions.

## Common reporting challenges facing asset managers:

- Disparate processes for data collection and sourcing
- Lack of data governance and workflow management
- Risk of data integrity issues impacting performance

## Potential benefits of our Asset Management Reporting Suite:

### Data automation with fund administrators

Extract and transform data for multiple funds from client systems to compute periodic estimates and other investor and/or audit requirements.

### Planning and decision-making

Integrated allocation modules expedite decision-making, and you can prepare estimates, what-if scenarios, and generate insights for your investors.

### Beyond cost savings

Our scalable services can cut your total cost for data management and is bolstered by our deep sector and technical knowledge.

## Our reporting modules and features:

### Fund reporting and oversight services

- Annual fund financials
- Quarterly investor statements
- General ledger reporting
- NAV reconciliation assistance
