Consumer & Retail

June 6, 2025 – June 13, 2025

Survey Methodology

Survey methodology

Survey methodology

- The survey was conducted online through a survey vendor, ensuring demographic representation as per US Census data. The collected data has a margin of error of +/- 3 percent.

Survey objective

- To assess consumer's sentiment and perception around various economic and personal financial matters.
- To analyze consumer allocation of household budgets and assess the impact of economic factors on purchasing behaviors and sentiment about tariffs.
- To evaluate anticipated spending for the back-to-school season, including apparel, sports, technology etc. and explore changes in food and restaurant plans as children return to school.

Survey timings

- Survey start date: June 6, 2025
- Survey end date: June 13, 2025

Survey sample

- Survey polled a sample of 2,003 consumers across United States.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, in all instances, asked "Please select your gender:", "Please enter your current age:", "Please select the annual income range that best describes your total household income in 2025."; (a) Gender identification omits respondents that mentioned "Prefer to self-describe"; (b) BTS shoppers include the 831 households with children and/or adult students

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

Executive Summary

01 Consumer spend

- Consumers allocate a larger share of their income to essential monthly costs and needs in 2025—reflecting a slight shift away from discretionary spending over the past year.
- Among all respondents, 39% reported a worse financial situation this year—while 29% said it was better; However, among BTS shoppers, 39% said their financial situation is better while 34% said worse.
- The consumer spending outlook by category is mixed—with increases expected in some categories, such as groceries and automotive, but decreases elsewhere.
- More consumers plan to increase their online spending on essential items in 2025, while a greater share expect to reduce spending on discretionary categories.

02 Inflation

- 94 percent continue to feel the pressure of inflation; 76 percent say their cost of living has increased by more than 5 percent.
- 69 percent of consumers plan to change their discretionary spending habits due to price increases; Consumers are most likely to cut back on restaurants and bars, travel, entertainment/media and luxury goods.
- Observed price increases are highest in travel and restaurants, with 84 percent and 80 percent of respondents who've observed price increases reporting price increases over 5 percent.

Executive Summary (continued)

03

Impact of tariffs

- 75 percent believe tariffs will result in higher prices—compared to 79 percent in Spring 2025.
- 52 percent plan to buy less overall due to tariffs; 46 percent plan to look more for discounts/promotions; only 12 percent plan no spending changes.
- Consumers are most likely to expect price increased in electronics & appliances (66 percent), groceries (64 percent), and apparel (60 percent).

04

Back to school

- Back-to-school shoppers expect to spend 10 percent more on school supplies per child in 2025 compared to 2024.
- 37 percent expect to spend more on back-to-school per child compared to 18 percent spending less. Among those spending more, 74 percent say its due to higher prices.
- Back-to-school shoppers report mixed financial situations: 39 percent say their financial situation is better than last year and 34 percent say its worse.
- Online share of wallet for back-to-school spending has increased from 39percent to 45 percent since 2023.

Executive Summary (continued)

05

Work-life changes

- 44 percent plan to dine out less frequently as their kids go back to school—while only 6 percent plan to dine out more frequently. Budget constraints are the main reason why people will dine out less.
- As kids go back to school, 56 percent say their grocery shopping habits will not change while 31 percent say they will buy more ingredients for home cooked meals.

06

Teen beauty products

- Hair care products are the top beauty product purchased for teens at 51 percent—compared to 42 percent skincare products.
- Among those who increased spending on their teen's beauty products, 51 percent did so due to greater interest in the products—while only 5 percent did so due to their improved financial situation.
- 52 percent say their choices for teen products are most influenced by friends and peers while only 18 percent are most influenced by advertising and commercials.

Executive Summary (continued)

07

School activities and apparel

- Outdoor sports, 42 percent, are the most common child activity—followed by music/singing, 33 percent. Among those playing outdoor sports, soccer is the most popular, 50 percent.
- 28 percent play indoor sports with basketball being the most popular, 57 percent.
- 66 percent say friends and family influence back-to-school clothing purchases while only 50 percent are influenced by advertisements and promotions.
- When purchasing back-to-school clothing, consumers prioritize price and discounts first, followed by quality

08

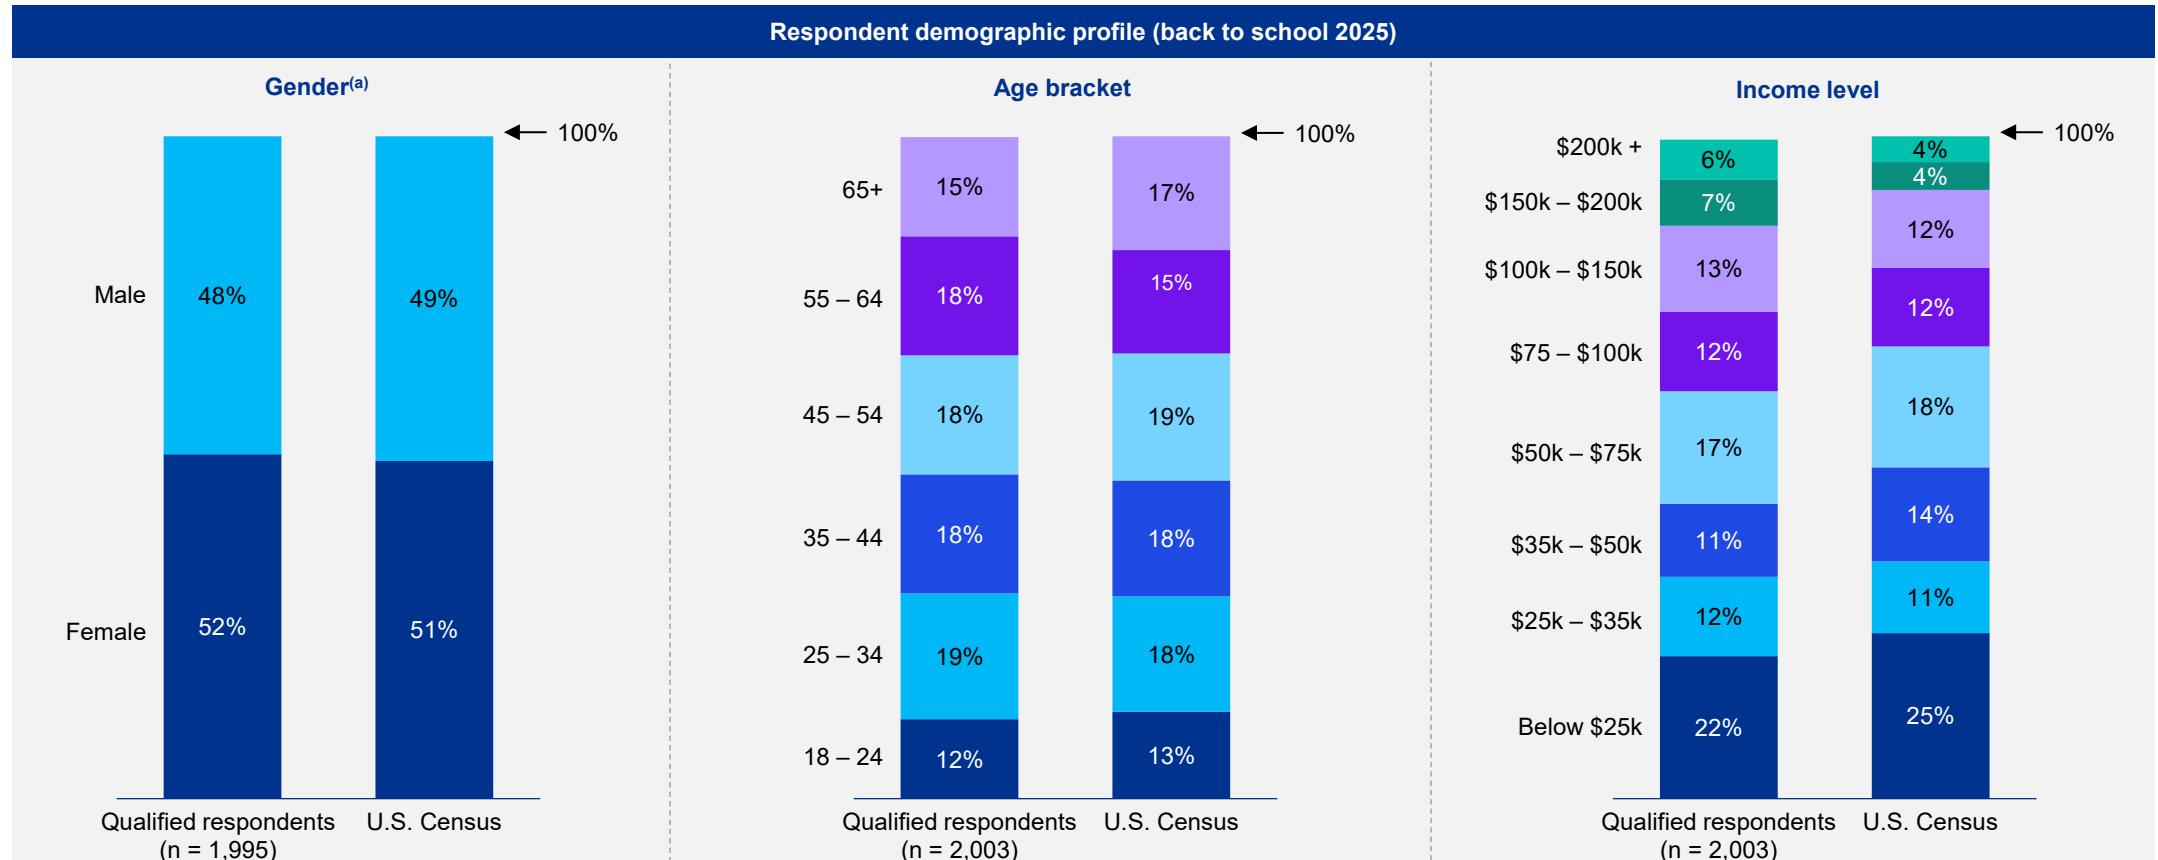

Technology

- 57 percent of students use GenAI extensively or moderately in their education.
- 49 percent purchase educational technologies and learning tools online rather than in-store; 48 percent consider educational videos (e.g., YouTube) to be the most useful learning tool for kids at home
- Waiting for deals and promotions is the top way consumers save money on technology, 31 percent; only 5 percent prioritize credit card rewards/cash back.

00

Demographics

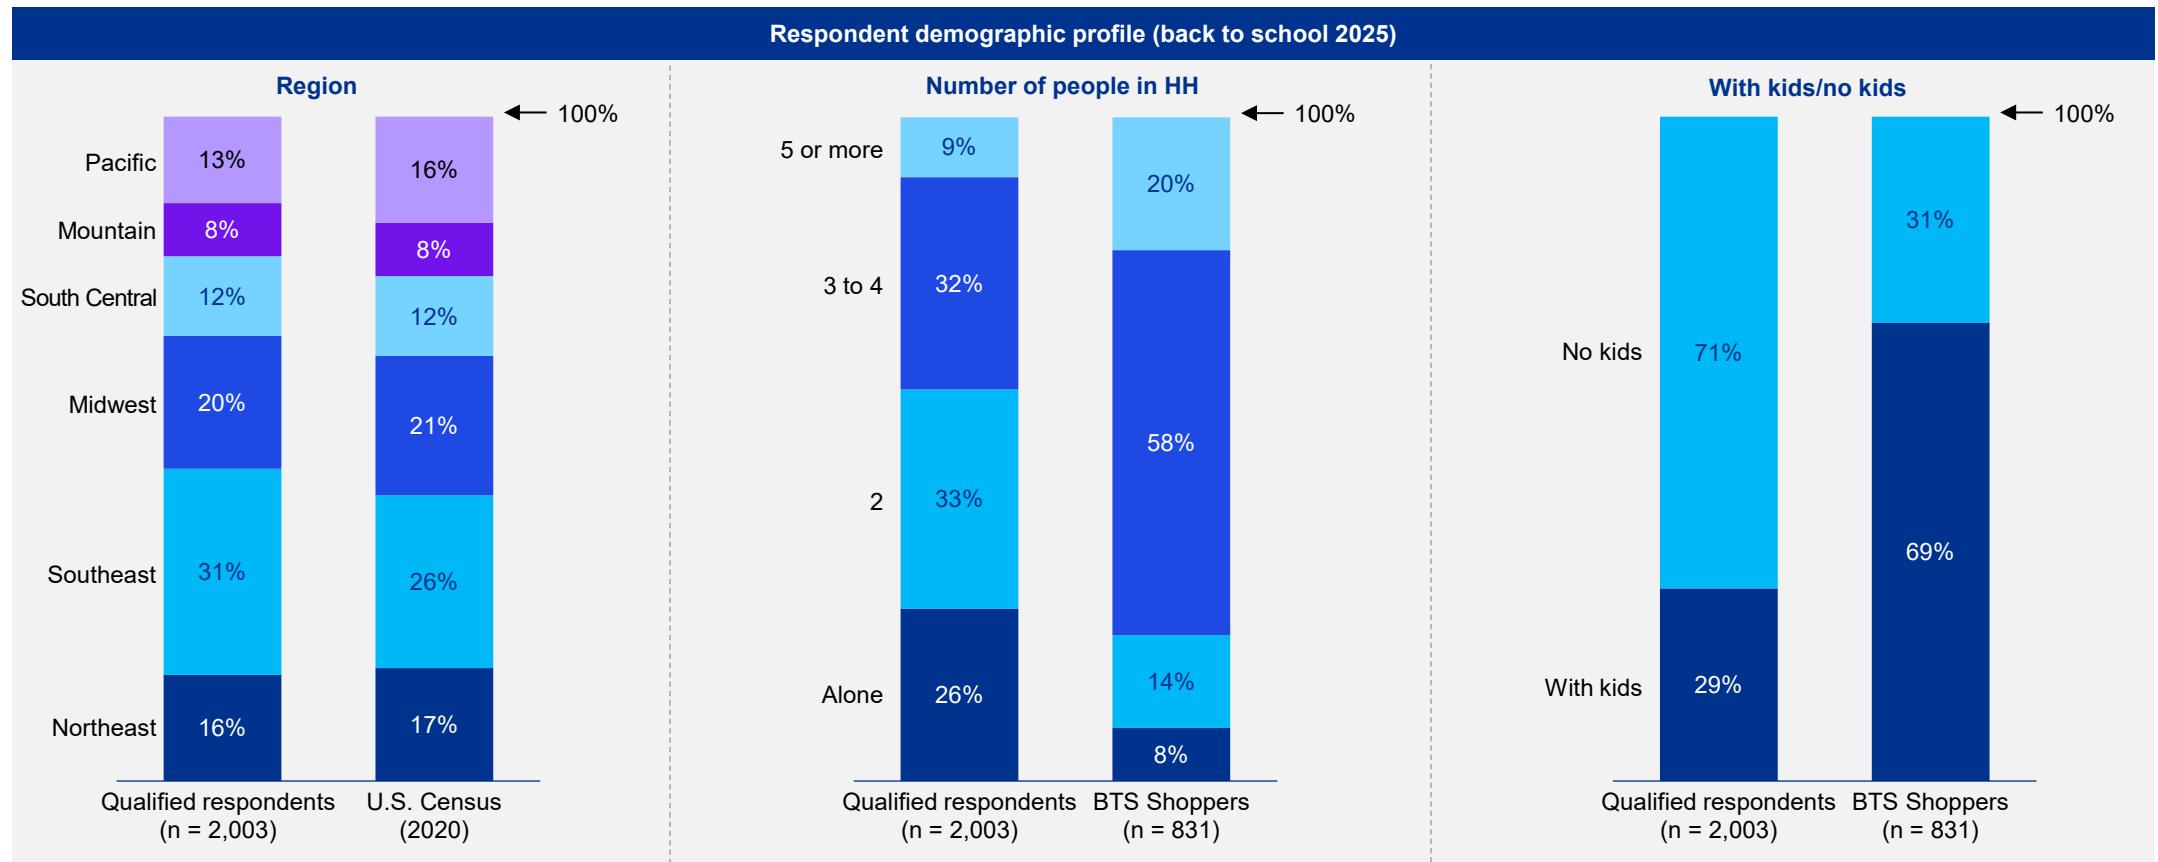

Survey sample is within +/-3 percent range compared to US census for gender, age, and income.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, in all instances, asked "Please select your gender:", "Please enter your current age:", "Please select the annual income range that best describes your total household income in 2025."; (a) Gender identification omits respondents that mentioned "Prefer to self-describe"; (b) BTS shoppers include the 831 households with children and/or adult students

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025-June 13, 2025

Survey sample is within +/-3 percent range compared to US census for region, households, and with kids/no kids.

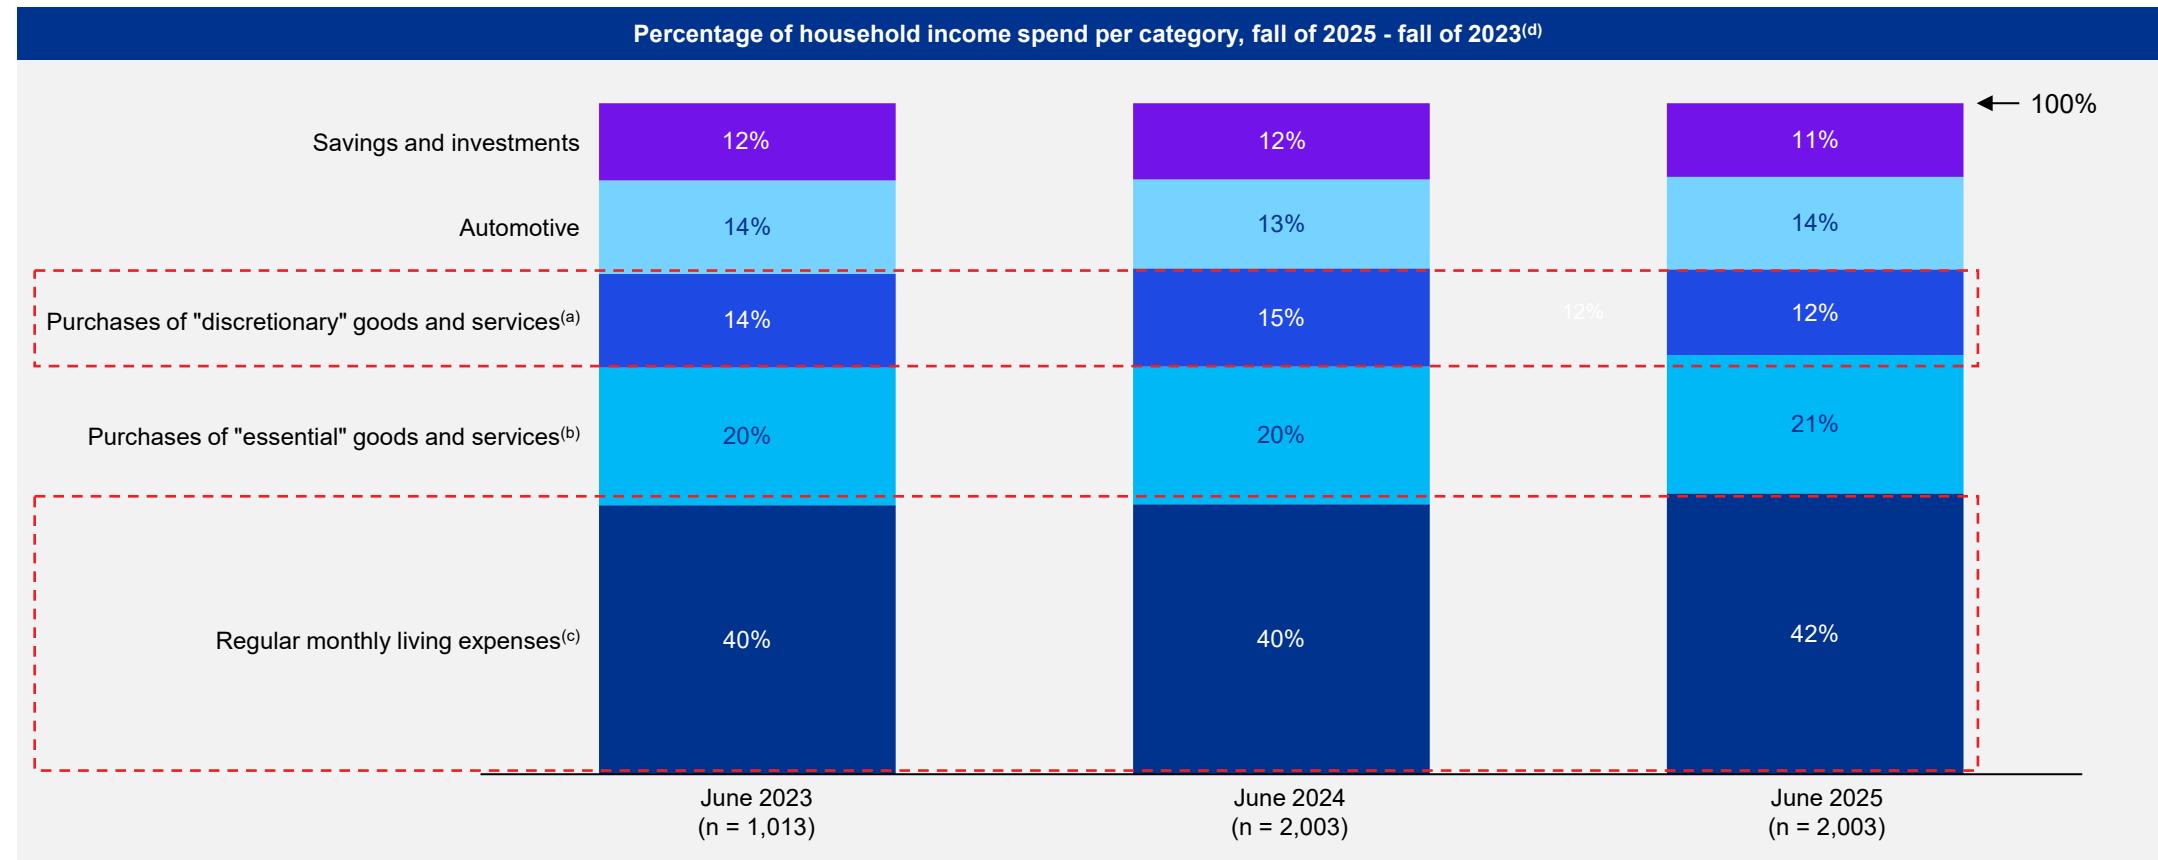

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, in all instances, asked "Please enter your current zip code:", "How many people are in your household (including yourself and any dependents that live outside the home e.g. college age children)?", "How many children under the age of 18 live in your household?"; (a) BTS shoppers include the 831 households with children and/or adult students

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

01

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, in all instances, asked "For each of the following product categories, please indicate whether you believe prices are lower, about the same, or higher than they were 6 months ago."; (a) Respondents were asked to rate each of the statements on a scale of 1-7 and the above visualization represents the proportion of respondents who agree (rated 5-7) with the statement.

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

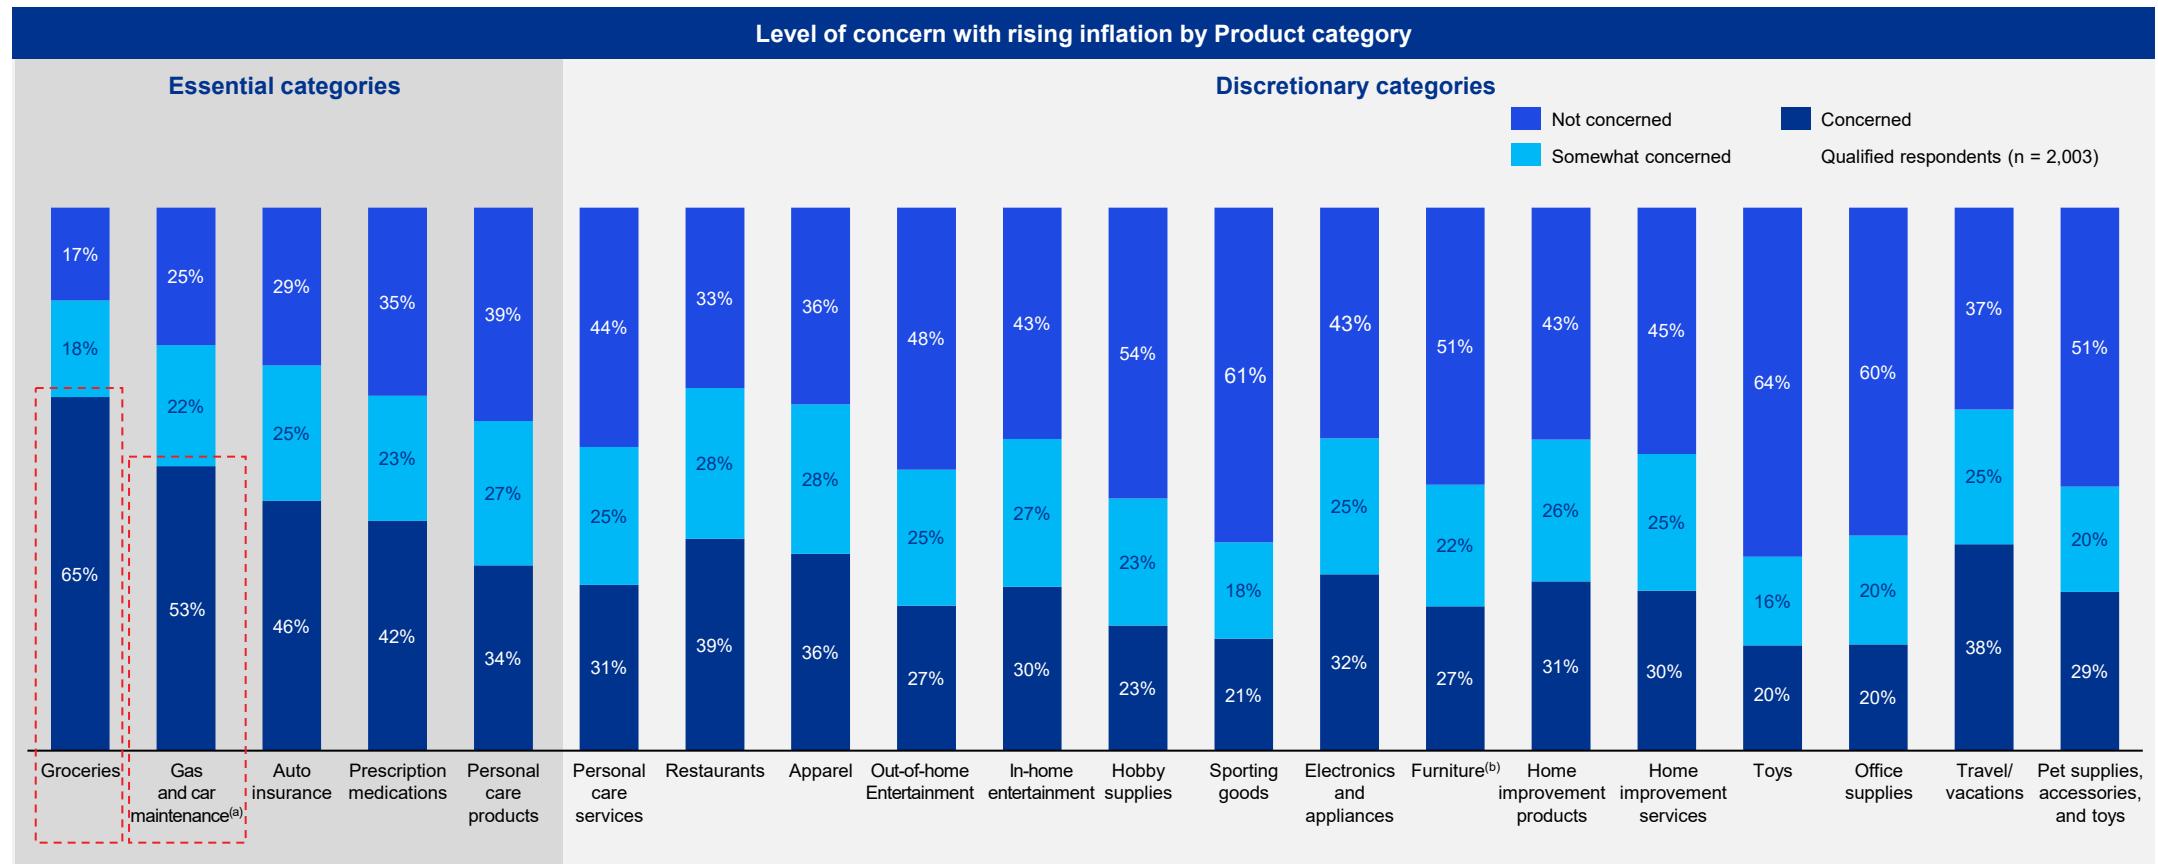

Price increases are most pronounced in the travel and restaurant sectors, where 84 percent and 80 percent of consumers, respectively, reported increases exceeding 5 percent.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, in all instances, asked "You indicated that you believe prices are higher for each of the following product categories now than they were 6 months ago. Please indicate how much higher you believe prices are for each of the following product categories."; (a) The n count for each category varies since this question was asked to those respondents who mentioned "Prices are higher than they were 6 months ago" for the product when asked "For each of the following product categories, please indicate whether you believe prices are lower, about the same, or higher than they were 6 months ago."; (b) Automotive includes gas, tolls, auto insurance, and auto maintenance; (c) Hobby supplies include sporting goods, musical instruments, and books.

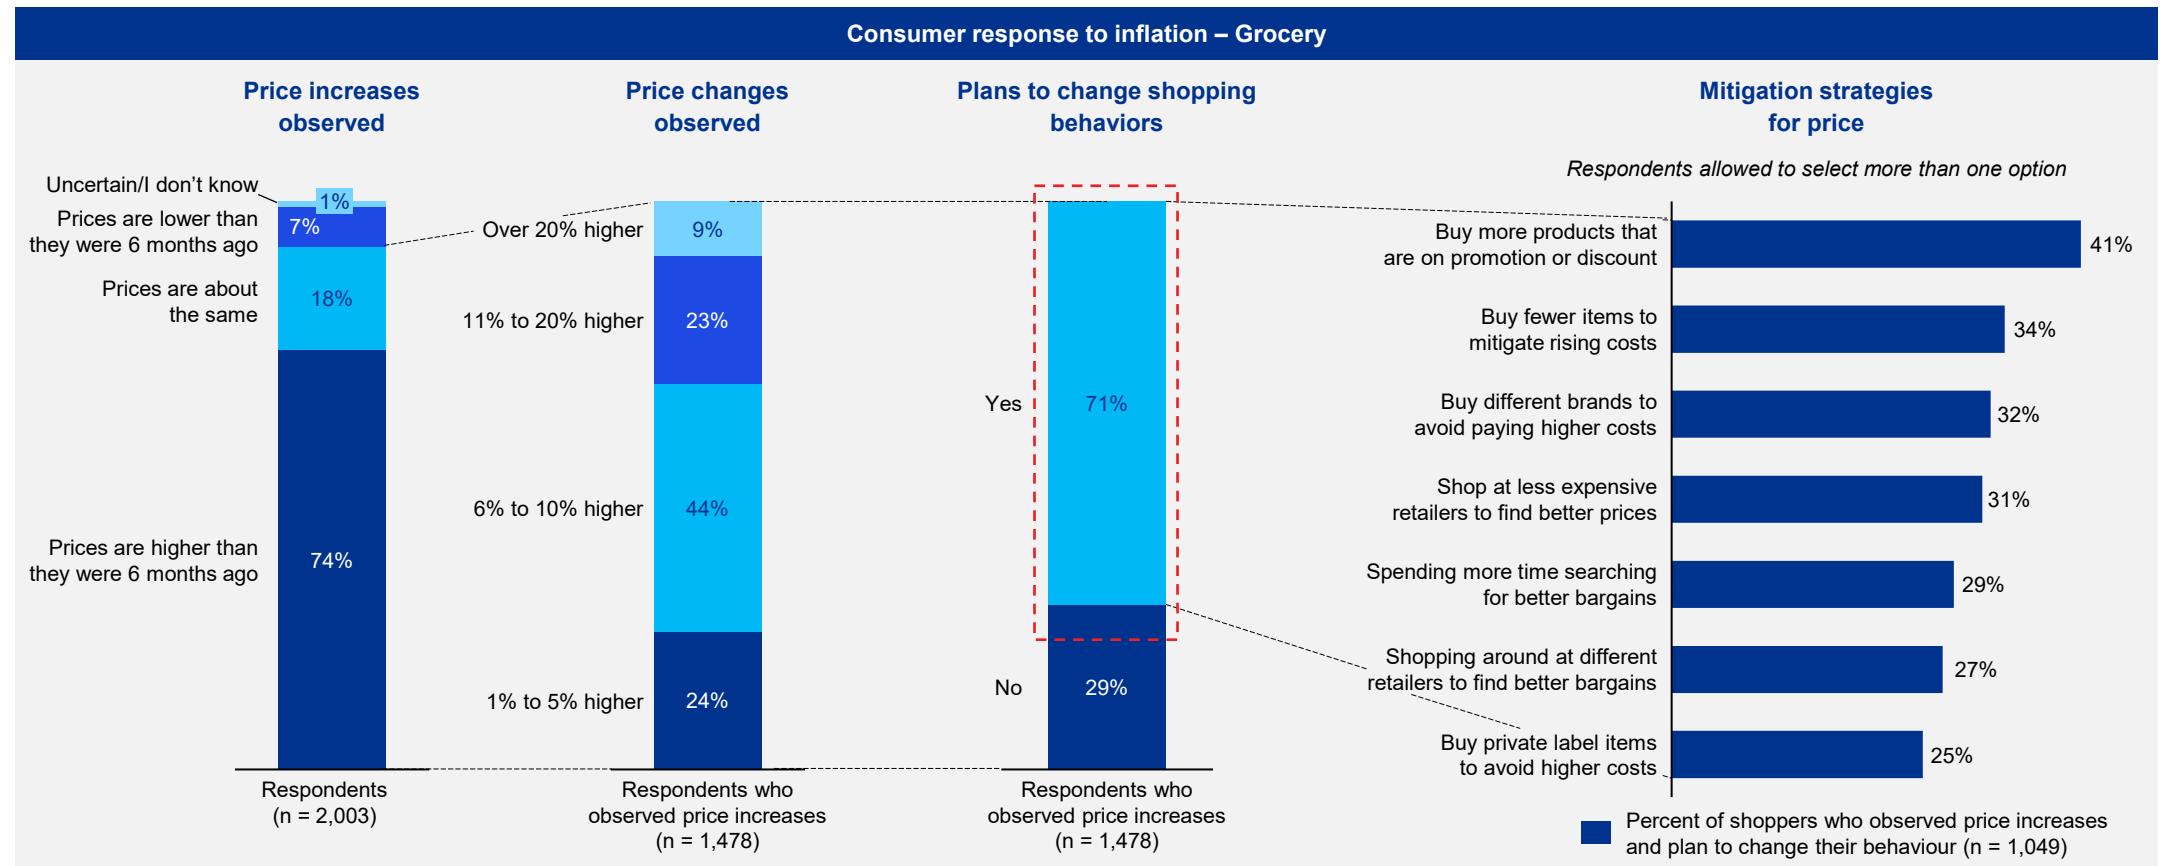

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

Consumers are most concerned with inflation in grocery (65 percent) and gas and car maintenance (53 percent) prices.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, in all instances, asked "How concerned are you with rising prices/inflation in each of the following product categories?"
 Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

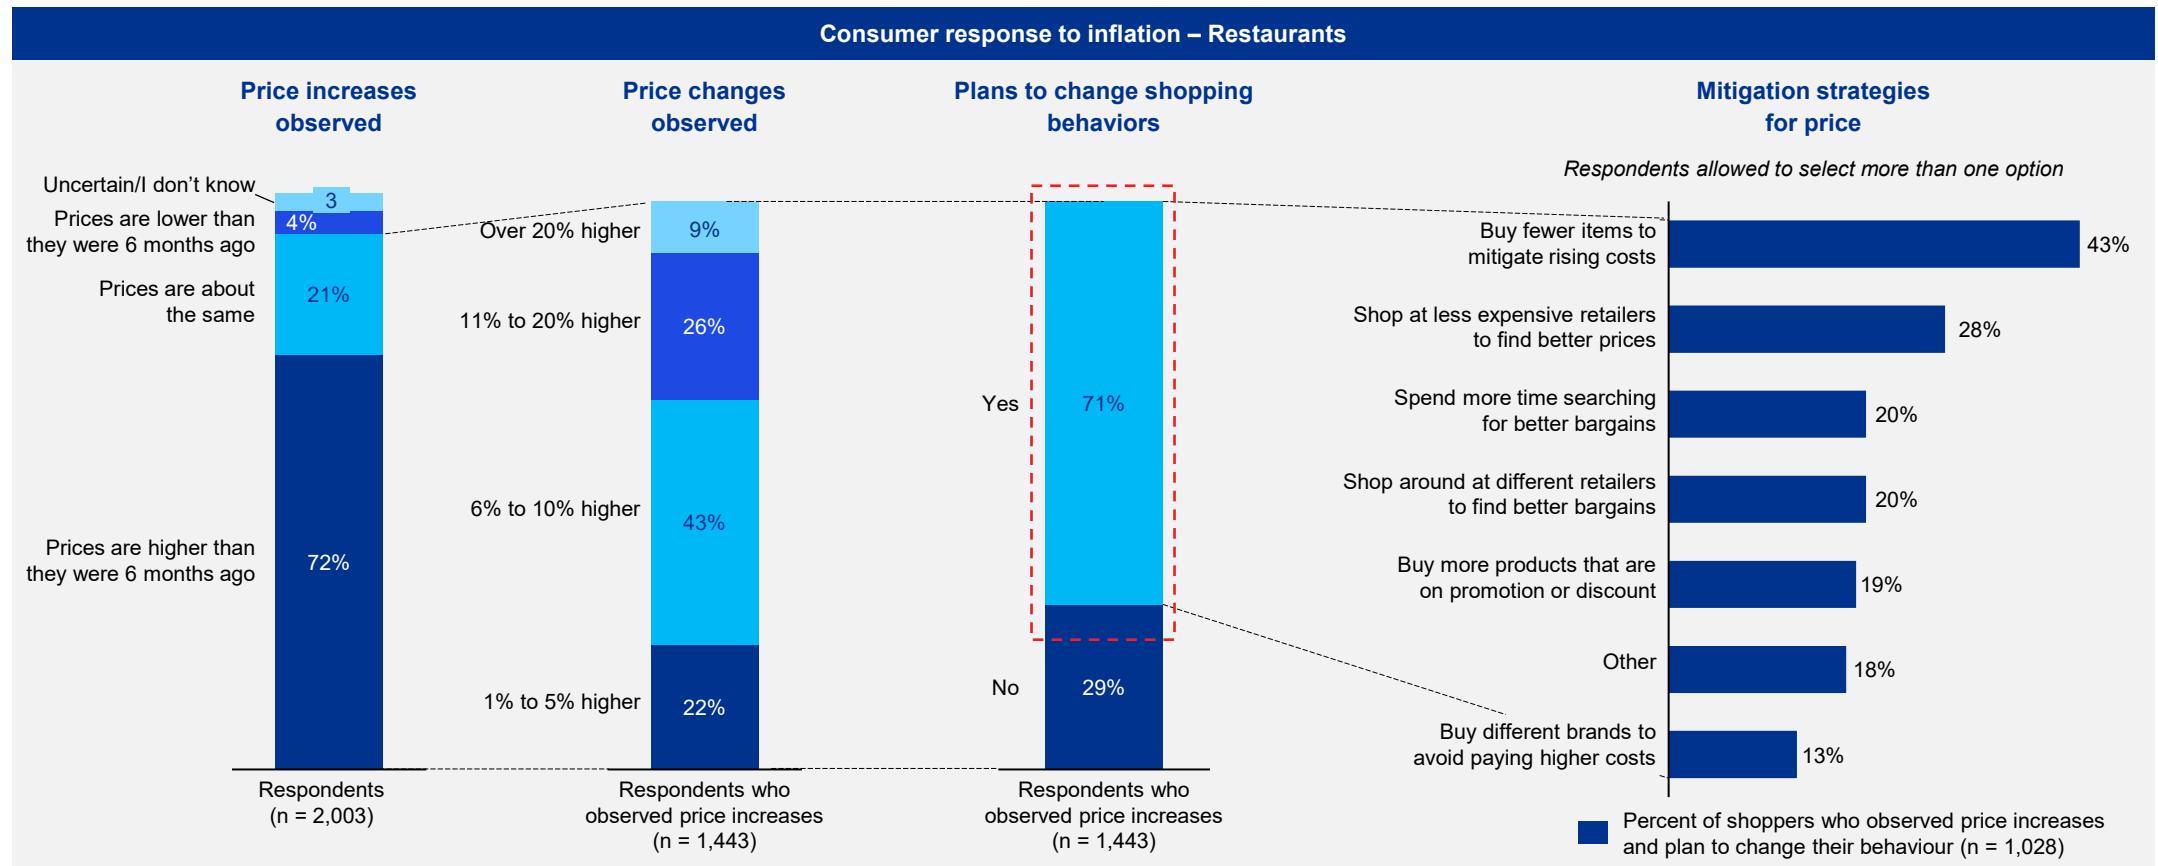

For grocery, 71 percent of consumers noticing price hikes plan to change buying habits; 41 percent intend to buy more discounted groceries.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, in all instances, asked "For each of the following product categories, please indicate whether you believe prices are lower, about the same, or higher than they were 6 months ago.", "You indicated that you believe prices are higher for each of the following product categories now than they were 6 months ago. Please indicate how much higher you believe prices are for each of the following product categories.", "You indicated that you have noticed rising prices for Groceries (food and beverage), do you plan on changing your shopping behaviors to mitigate rising prices for Groceries (food and beverage)?", "How do you plan on changing your behaviors to mitigate rising prices for Groceries (food and beverage)?".

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

For restaurants, 71 percent of consumers seeing price hikes plan to change buying habits; 43 percent plan to buy fewer items to offset rising costs.

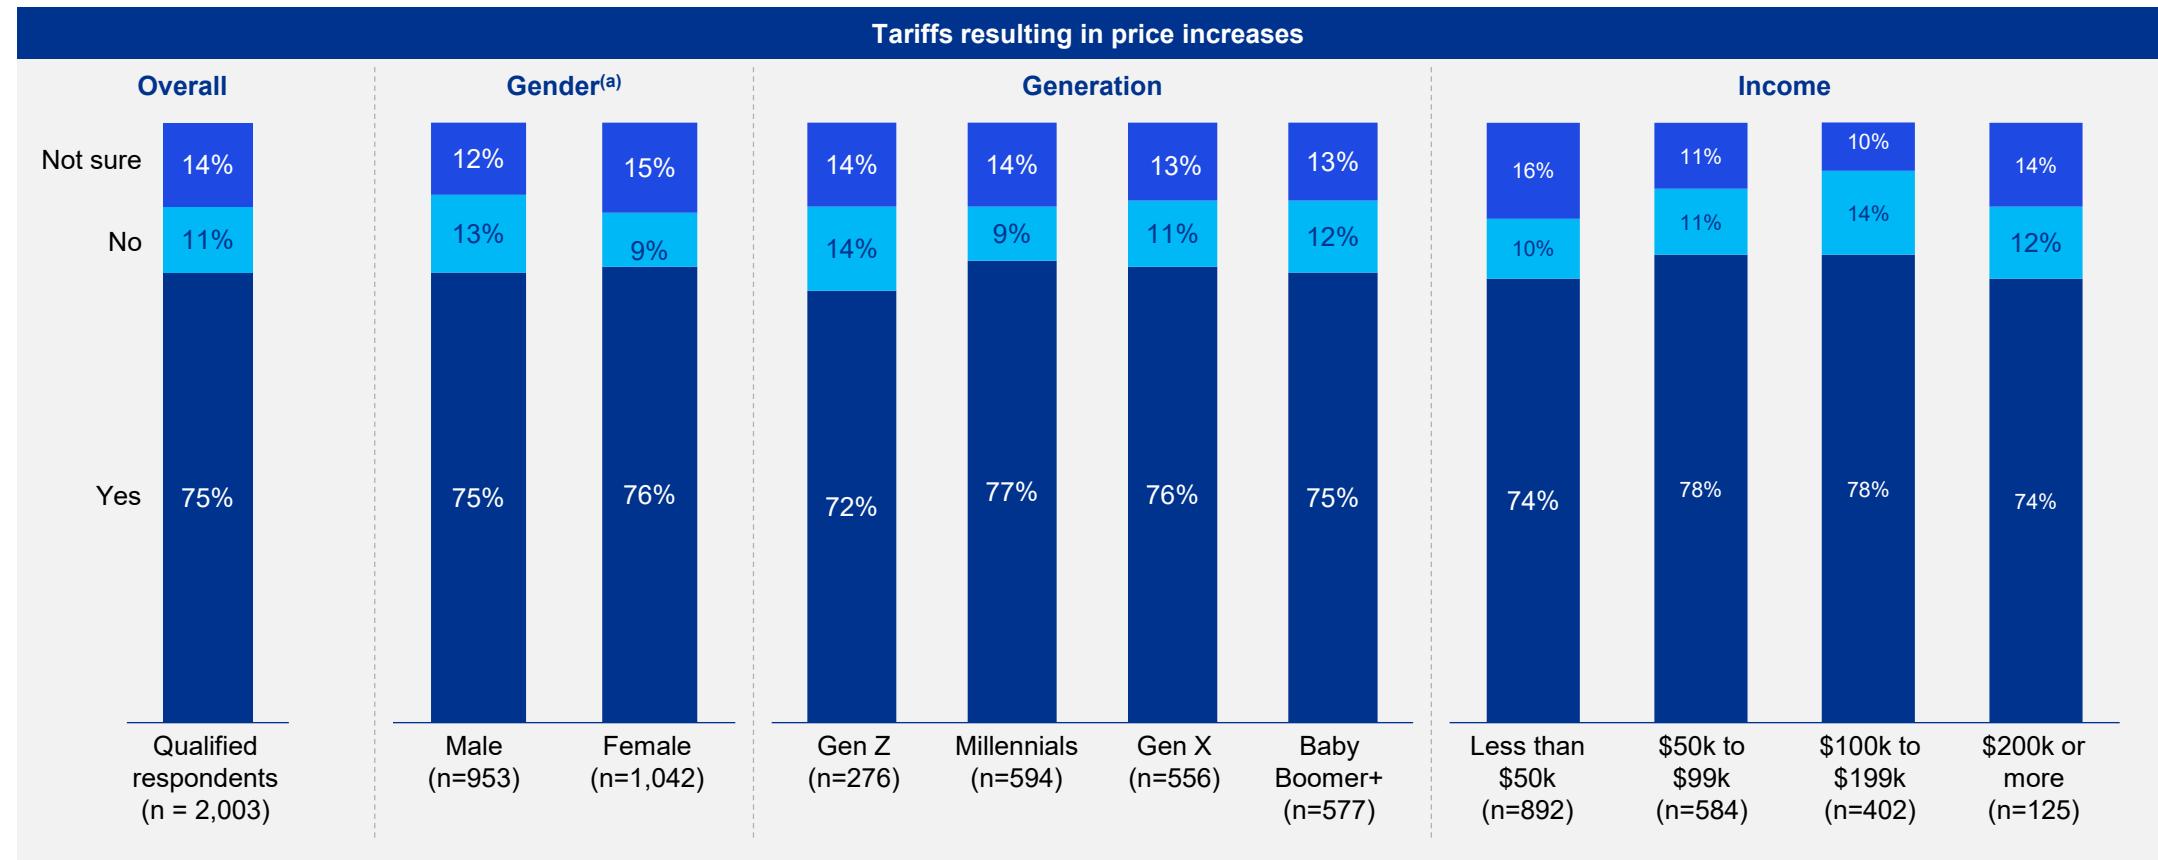

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, in all instances, asked "For each of the following product categories, please indicate whether you believe prices are lower, about the same, or higher than they were 6 months ago.", "You indicated that you believe prices are higher for each of the following product categories now than they were 6 months ago. Please indicate how much higher you believe prices are for each of the following product categories.", "You indicated that you have noticed rising prices for Restaurants (in-person, take-out, or delivery), do you plan on changing your shopping behaviors to mitigate rising prices for Restaurants (in-person, take-out, or delivery)?", "How do you plan on changing your behaviors to mitigate rising prices for Restaurants (in-person, take-out, or delivery)?".

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

03

Impact of tariff

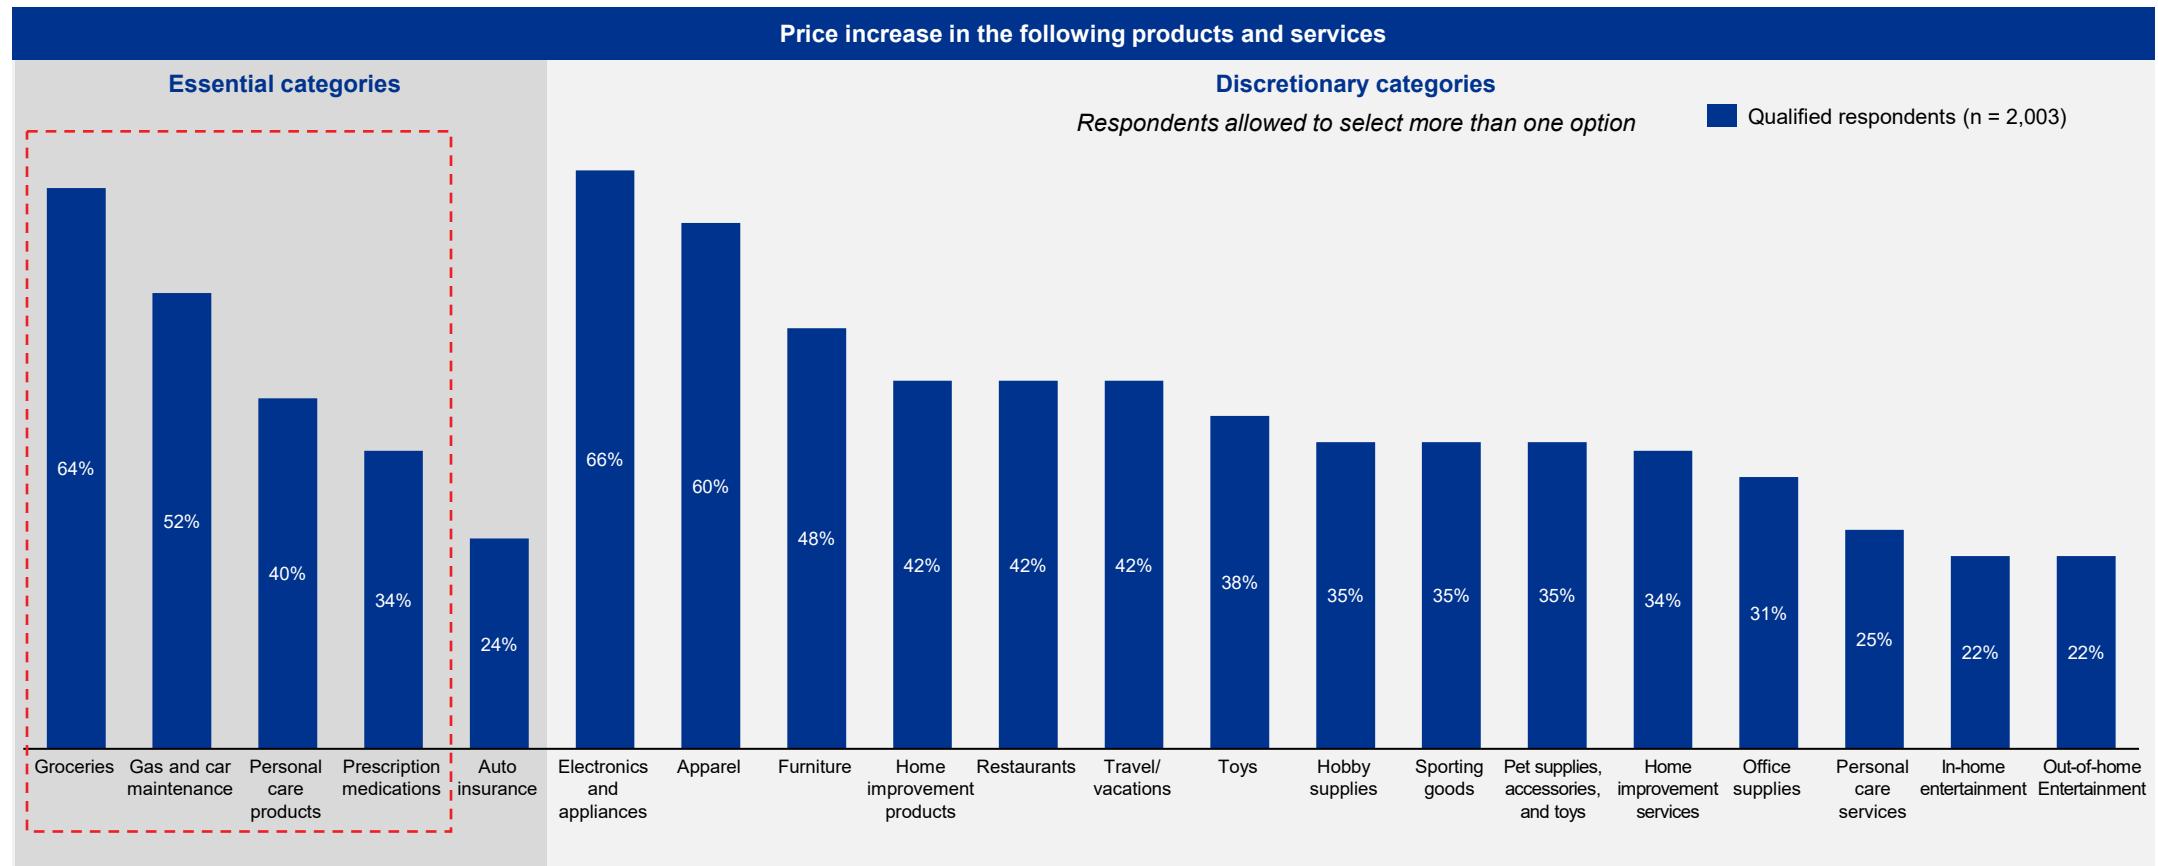

75 percent of consumers believe tariffs will lead to price increases.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, in all instances, asked "Please select your gender.", "Do you think tariffs will result in prices of products/services increasing further in the future? Please select the annual income range that best describes your total household income in 2025."; (a) Gender identification omits respondents that mentioned "Prefer to self-describe"

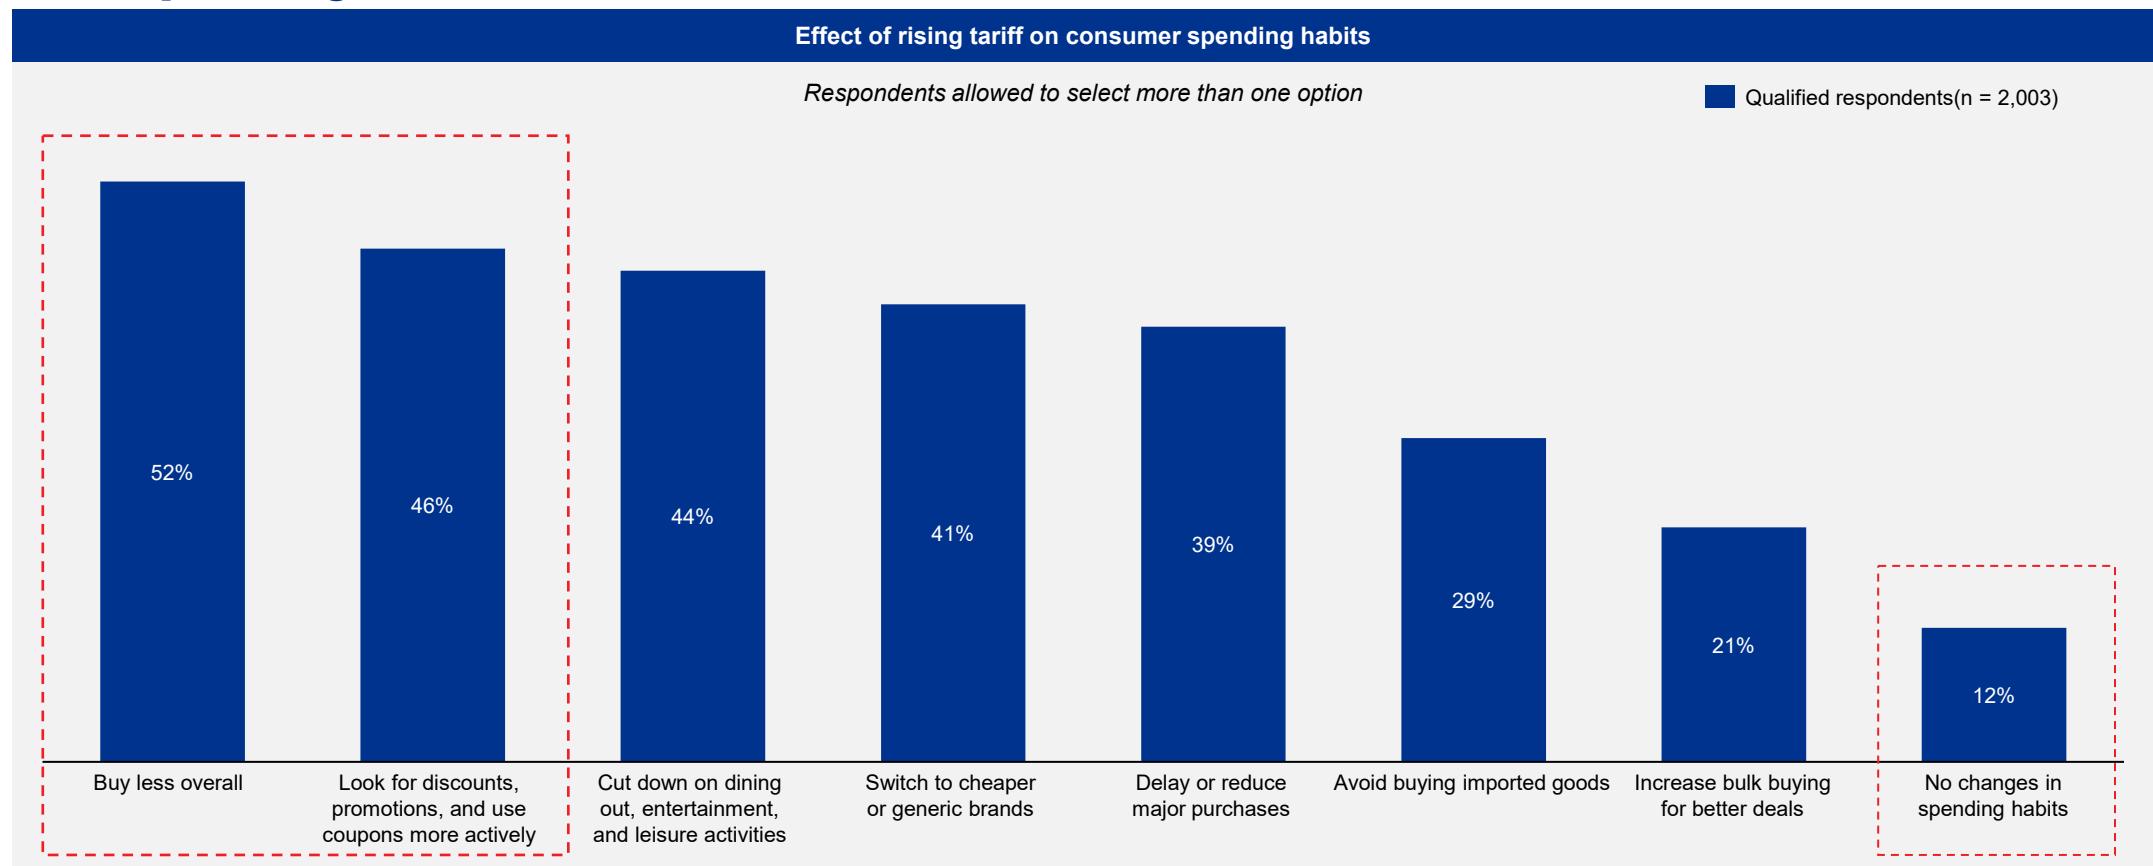

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

Electronics (66 percent) are expected to be the most expensive products/services due to tariffs followed by groceries (64 percent), and apparel (60 percent).

Note(s): KPMG conducted survey of a representative sample of 2,003 consumers across the United States and, in all instances, asked, "Which of the following product/services do you think will become more expensive due to tariffs?"
 Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

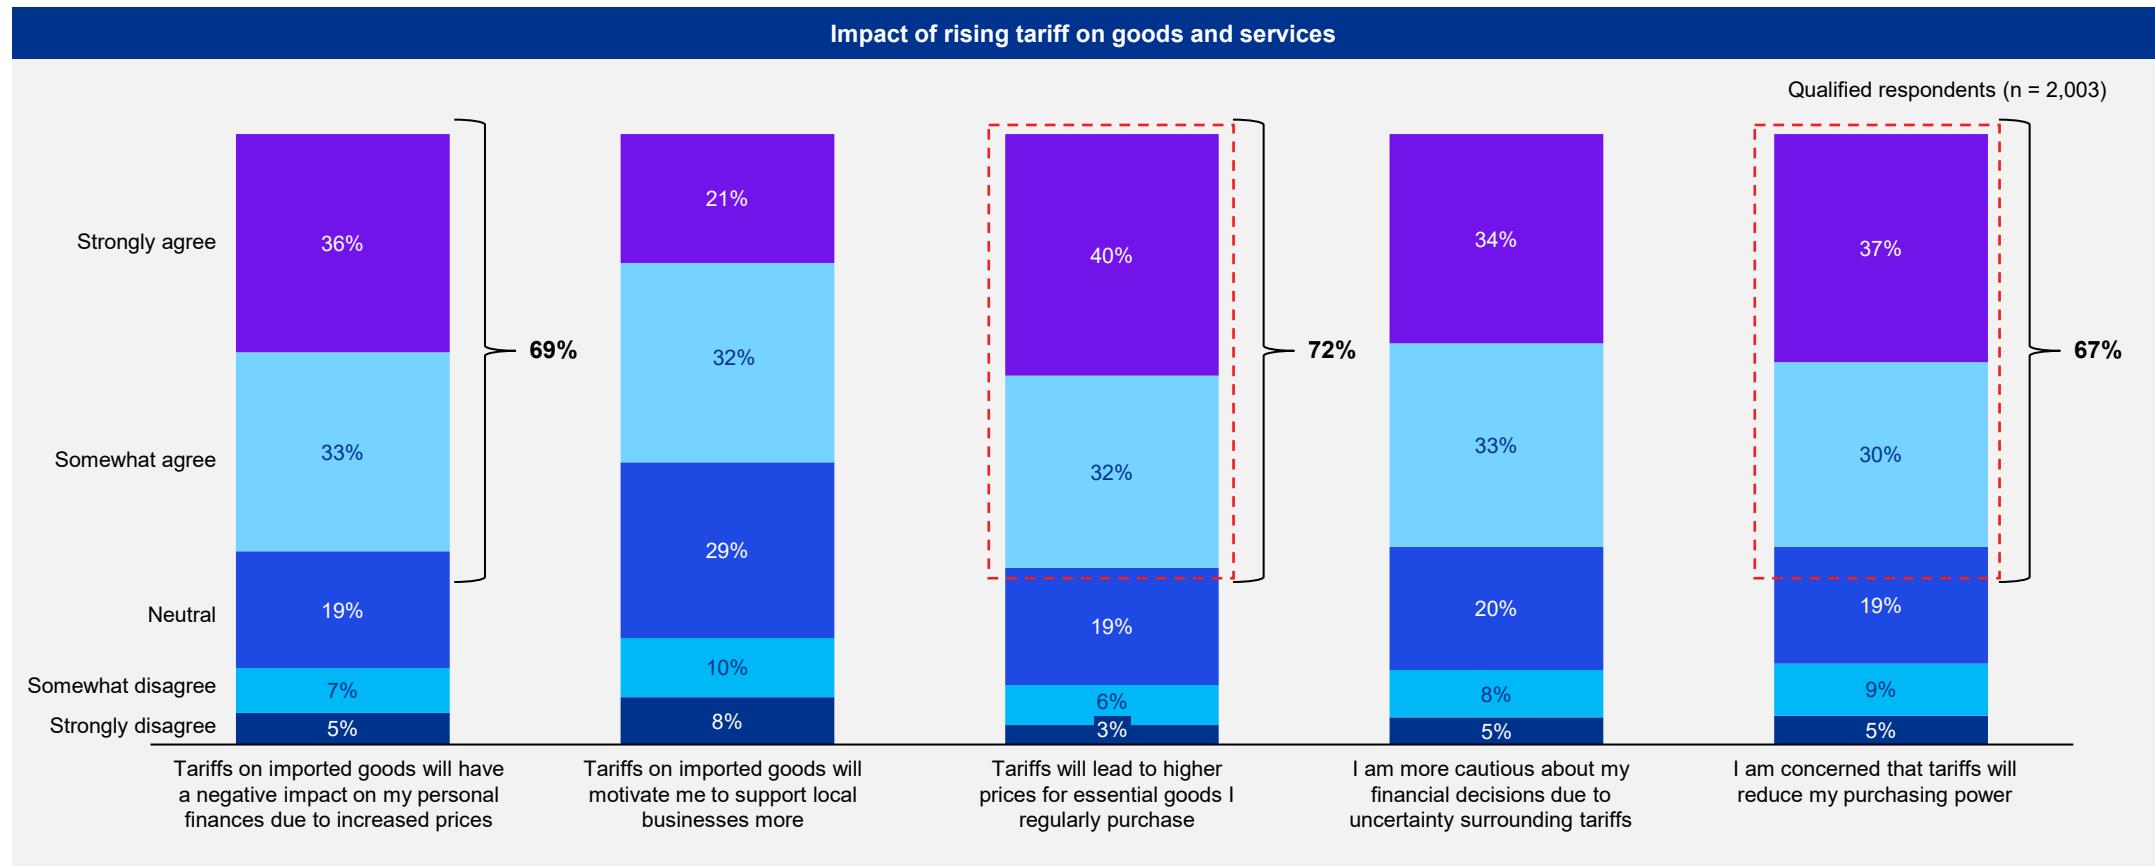

Majority of consumers are buying less overall and are looking for discounts, promotions, and using coupons more actively; but only 12 percent indicated they made no changes to their spending habits.

Note(s): KPMG conducted survey of a representative sample of 2,003 consumers across the United States and, in all instances, asked, "How are rising tariffs likely to affect your spending habits?"

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

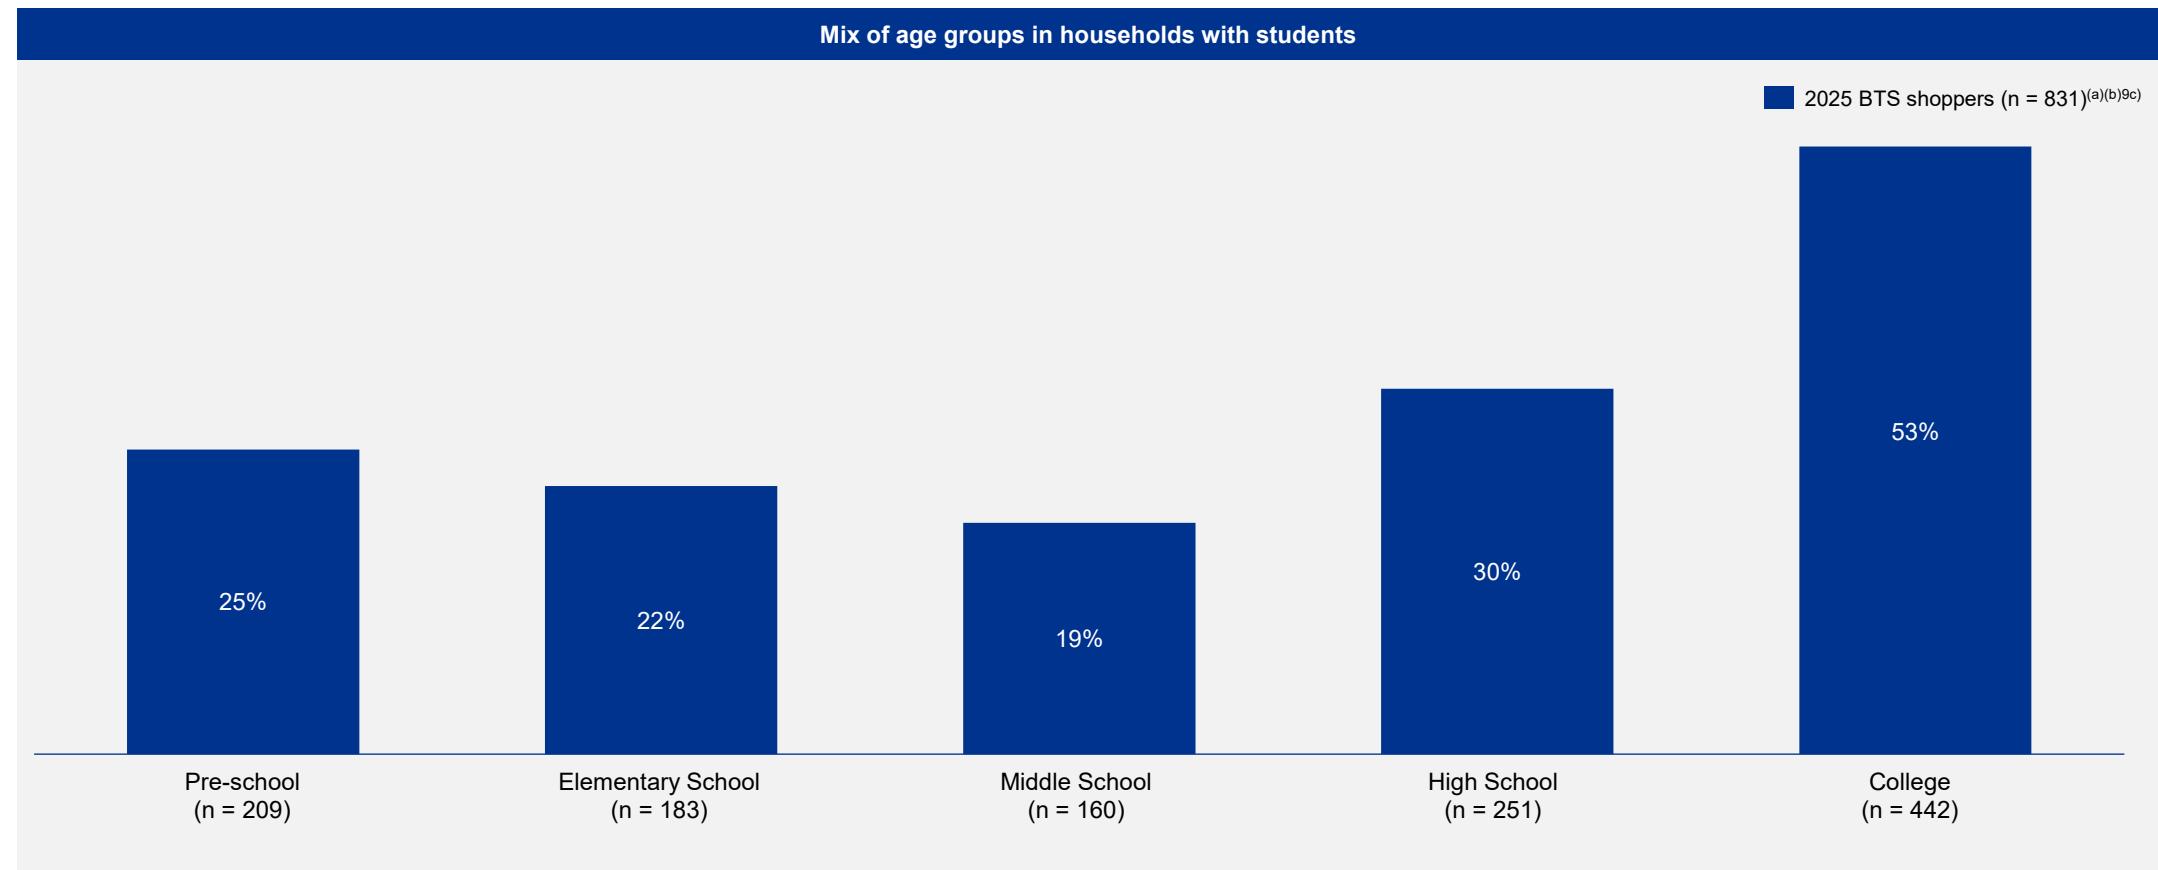

72 percent of consumers agree that tariffs will lead to higher prices for essential goods they regularly use followed by 69 percent concerned that tariffs will impact personal finances.

04

Back-to-School

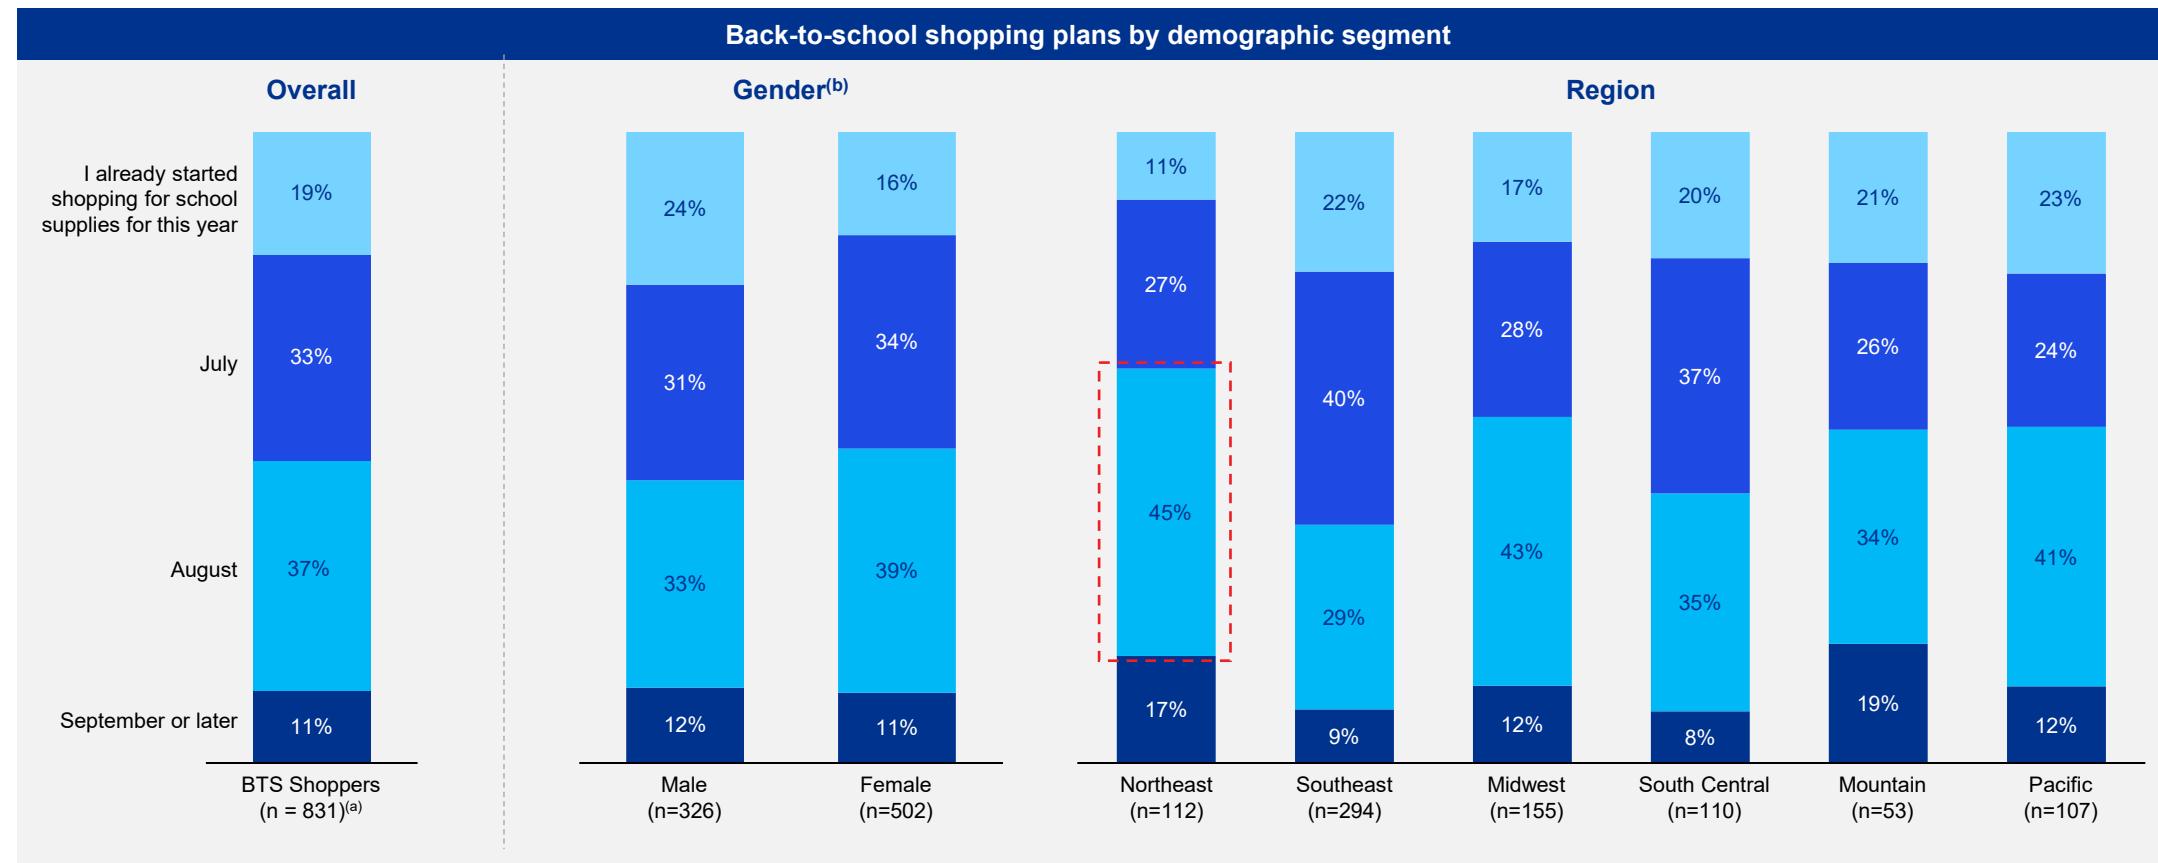

Of households with students, 25 percent have pre-school children, 22 percent have elementary school children, and nearly half have college students.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, in all instances, asked "How many children under the age of 18 live in your household?", "How many children of each of the following age ranges are in your household?"; (a) BTS shoppers include the 831 households with children and/or adult students; (b) Pre-school indicates children up to 5 years old, elementary school indicates children from 6 to 9 years old, middle school indicates children from 10 to 12 years old, high school indicates children from 13 to 17 years old & college indicates adults more than 18 years old; (c) Sum of segment within age-group does not add to the total BTS shoppers since a household may have more than one student across different age groups.

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

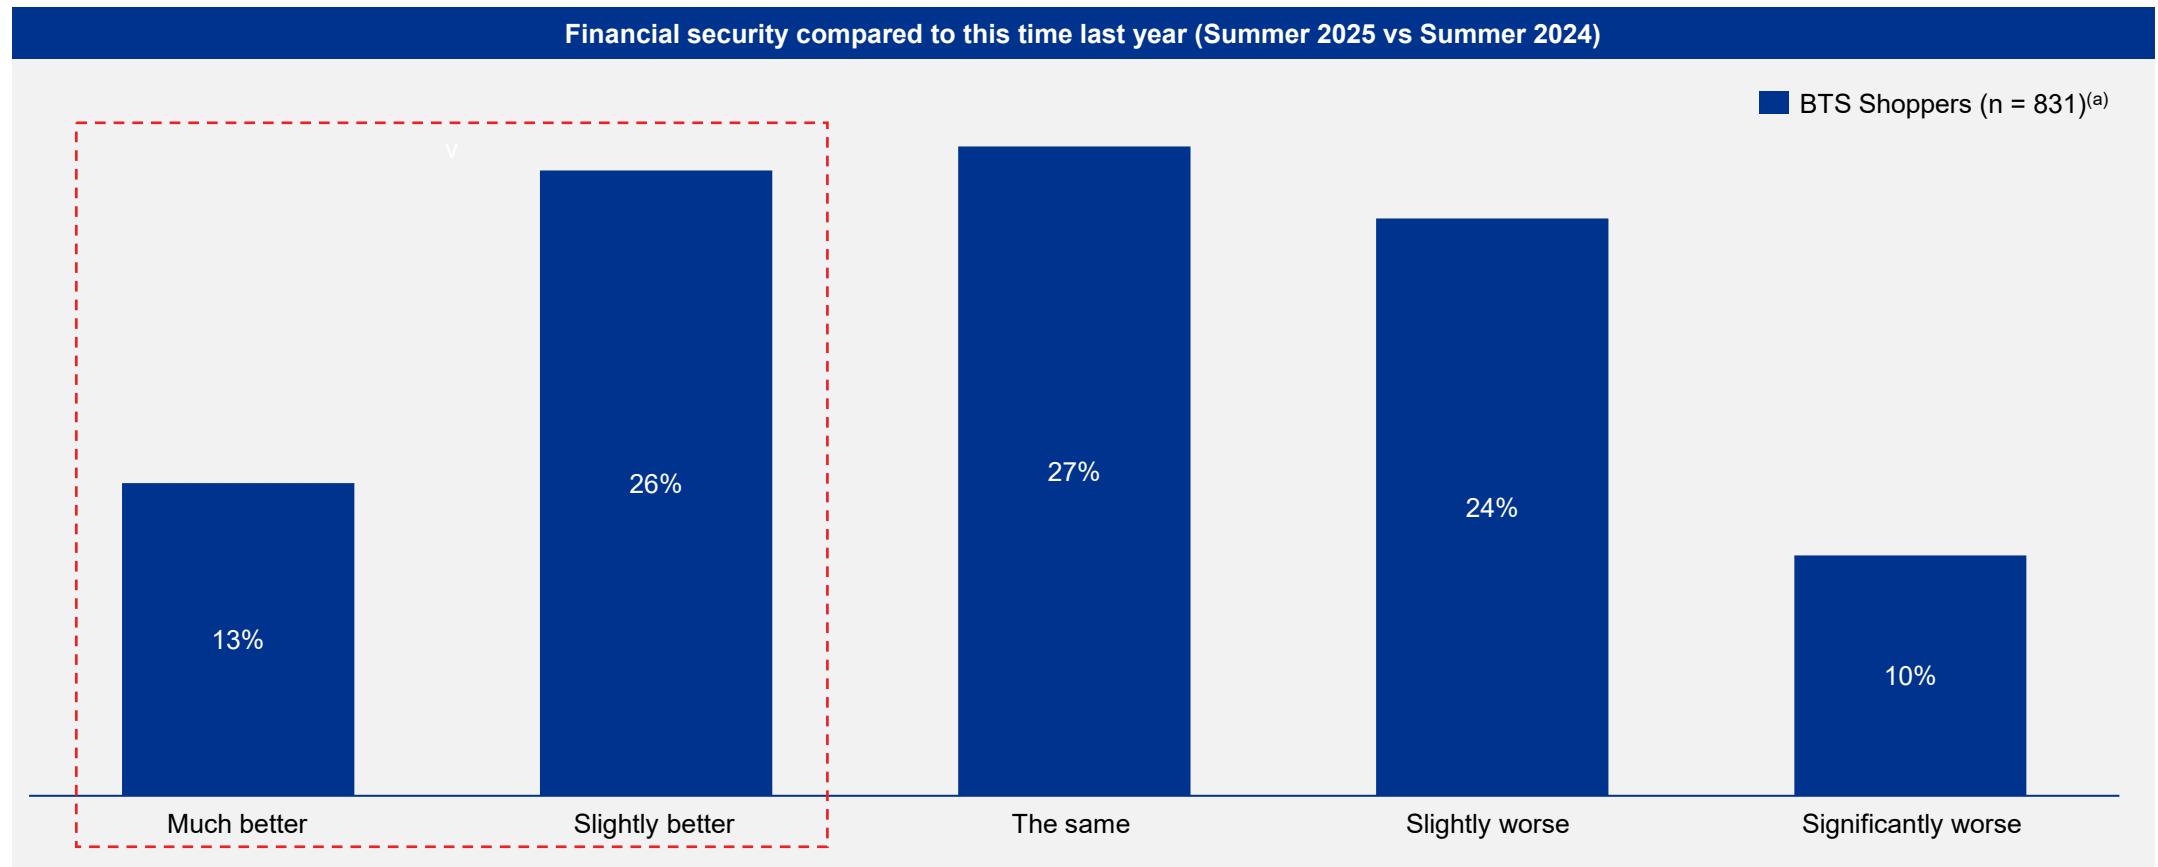

Back-to-school shopping timing differs by region due to varying school start dates. In the Northeast, 45 percent of BTS shoppers plan to start in August.

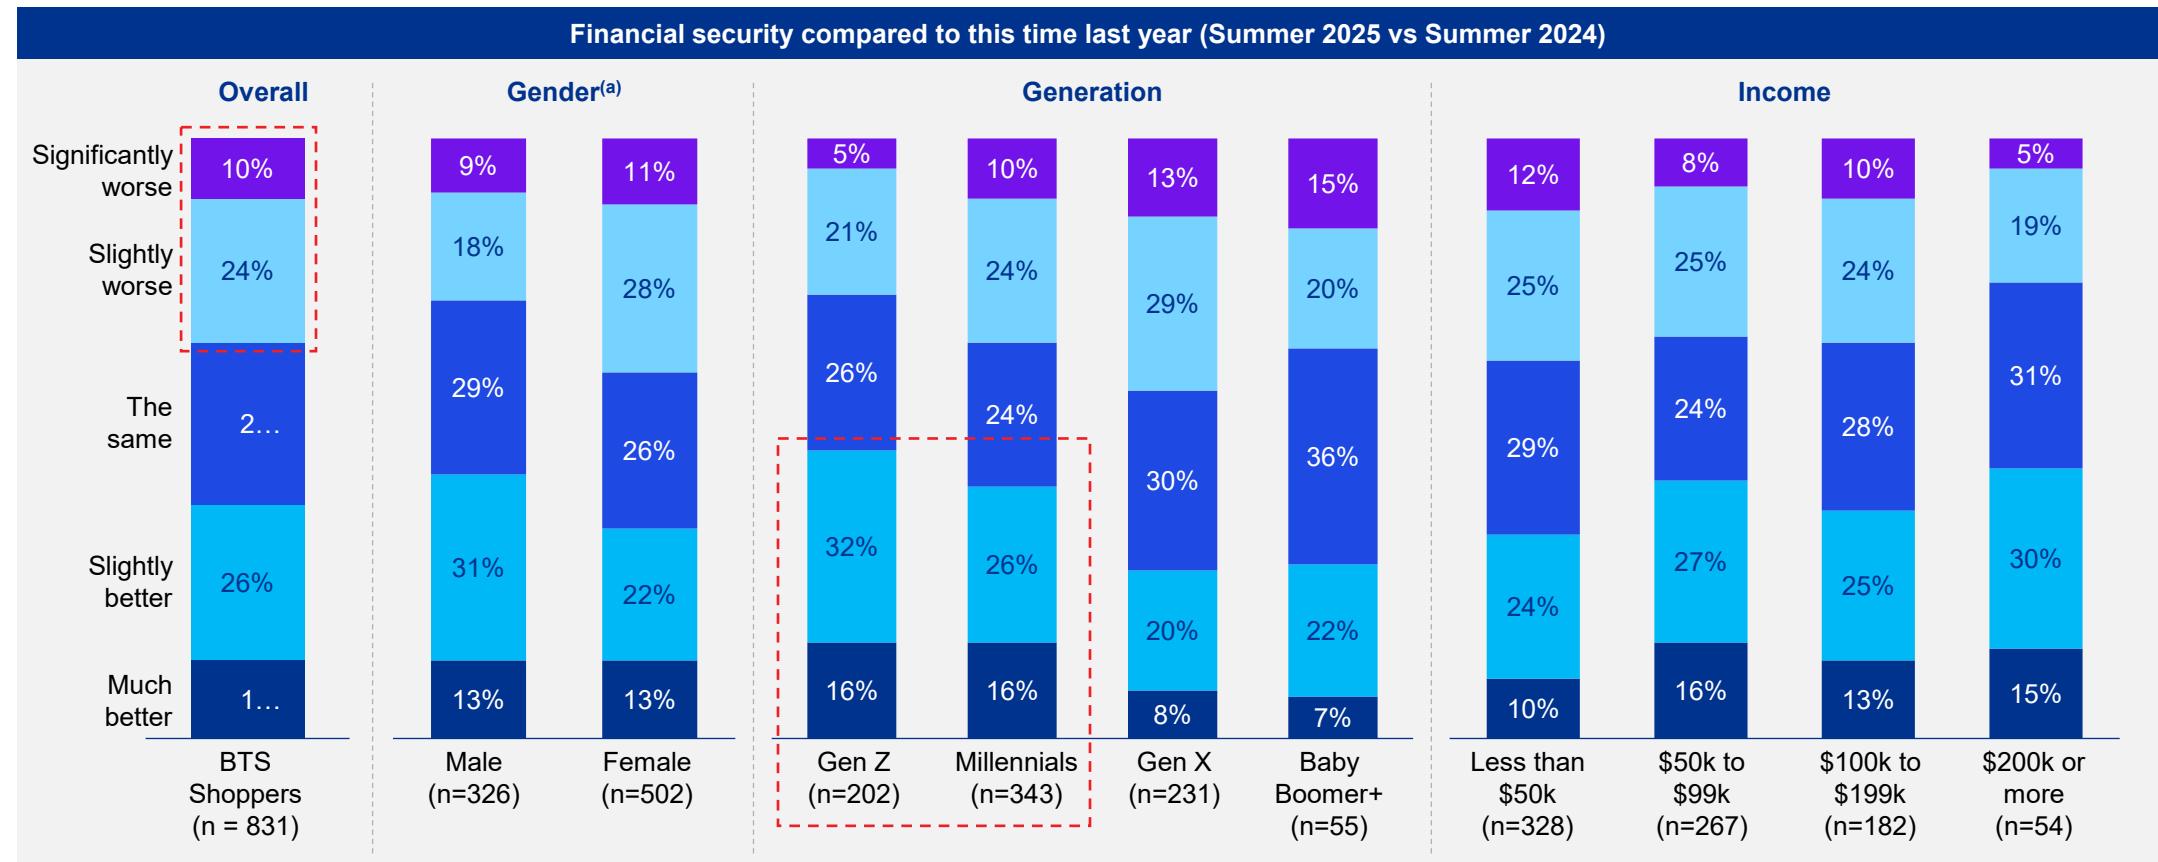

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, if applicable, asked "When do you plan to start shopping for back-to-school?"; and "Please enter your current zip code"; (a) BTS shoppers include the 831 households with children and/or adult students; (b) Respondents who selected "Prefer to self describe" have been excluded due to low sample size.

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

Change in BTS financial situation is mixed—with 39 percent of BTS shoppers reporting it is better this year while 34 percent say it is worse.

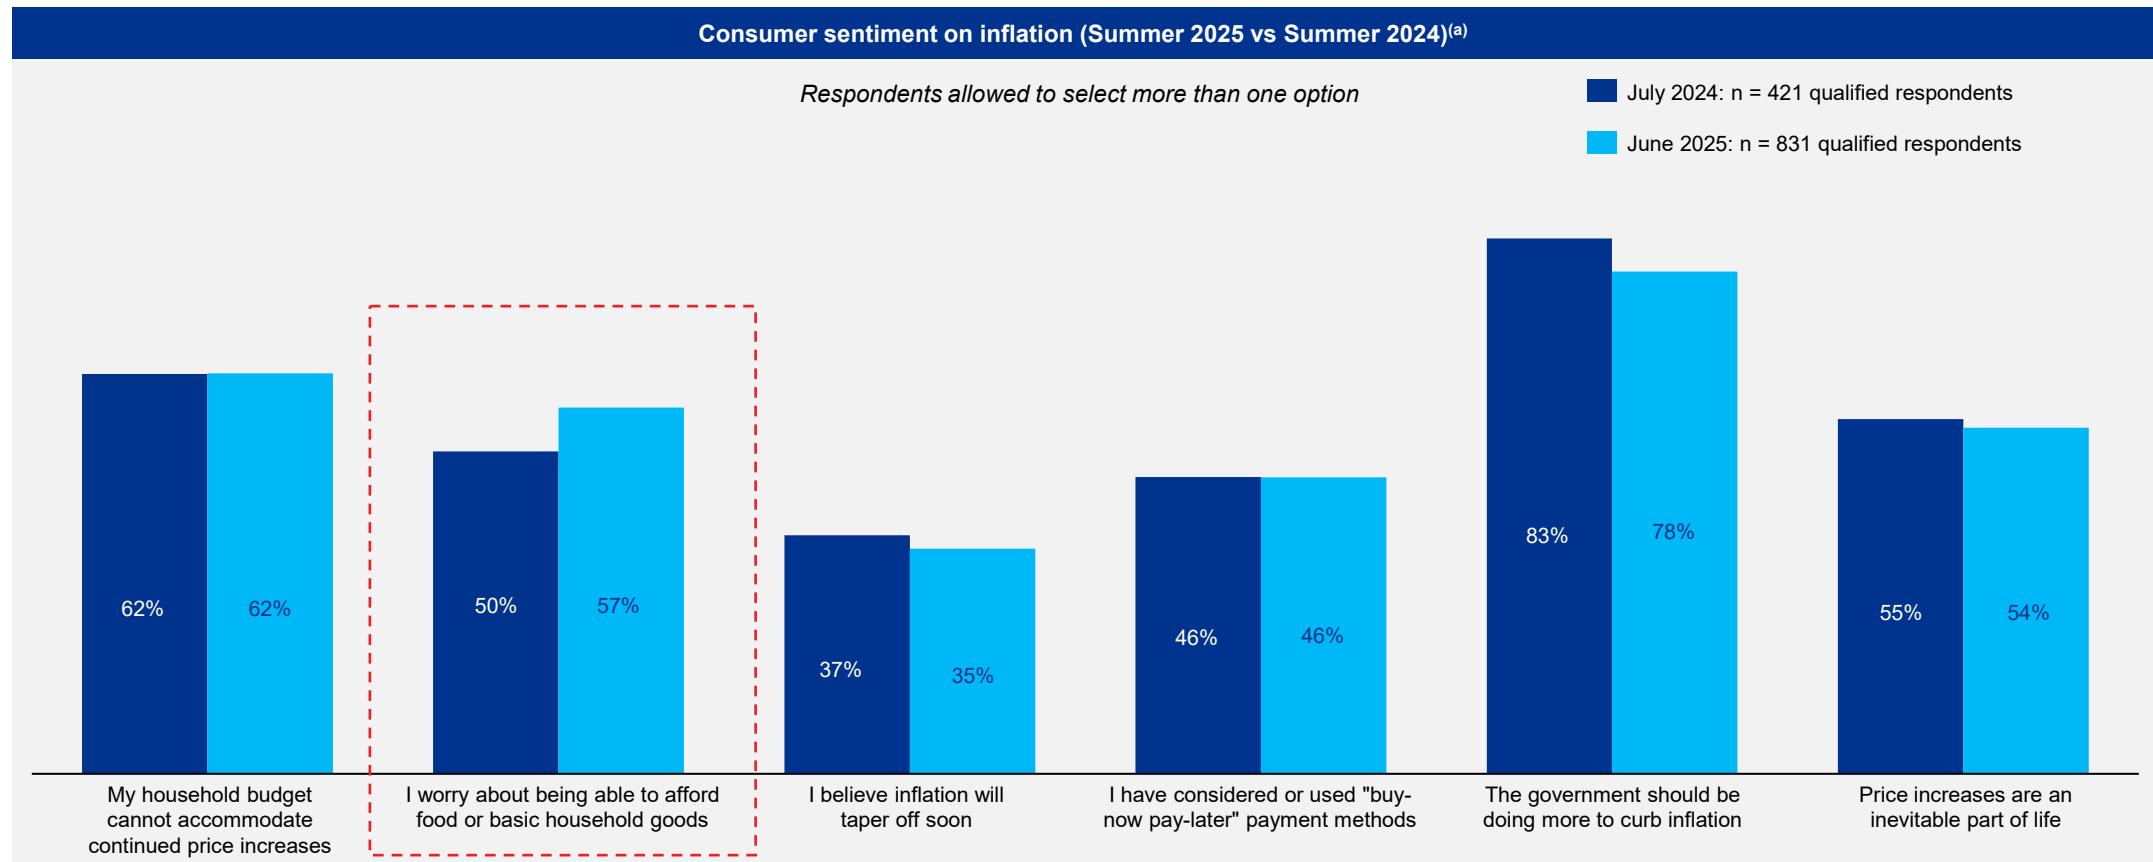

39 percent of BTS shoppers reporting it is better this year while 34 percent say it is worse—with newer generation Gen Z and millennials reporting it to be better.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, in all instances, asked "Compared to last year how do you feel financially compared to last year?"; (a) BTS shoppers include the 831 households with children and/or adult students.; (b) Respondents who selected "Prefer to self describe" have been excluded due to low sample size.

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

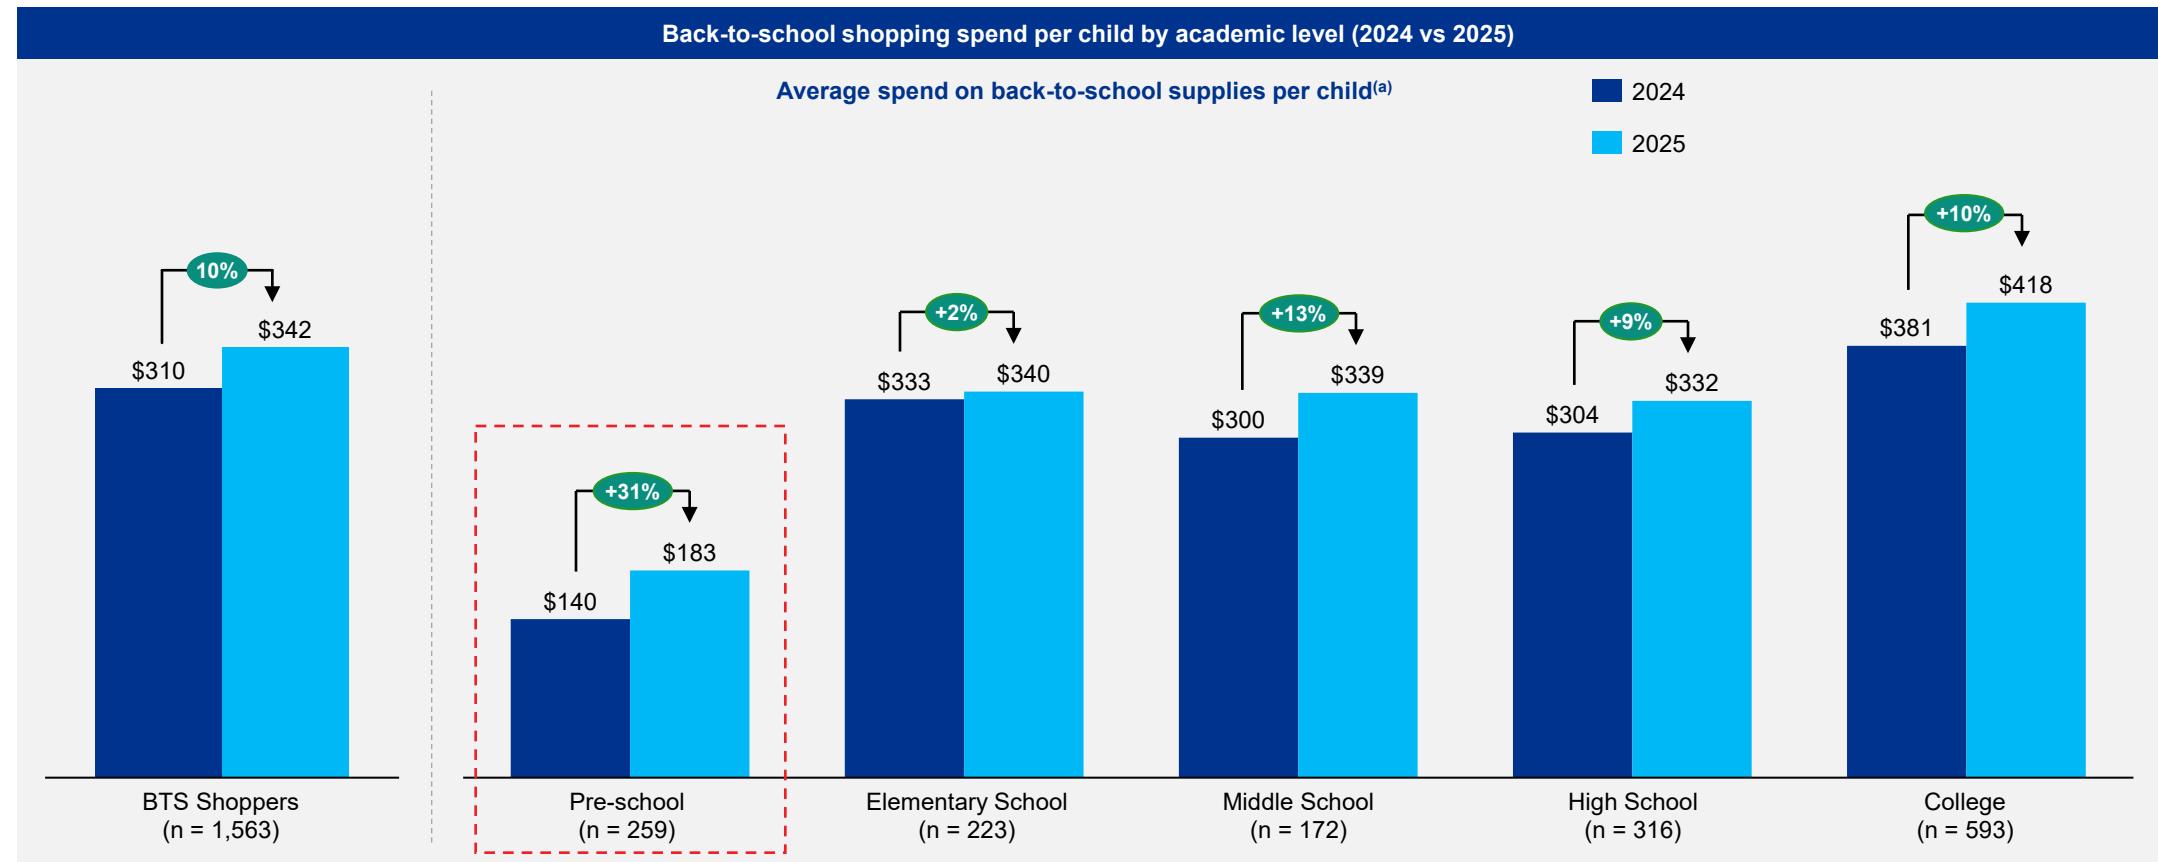

More BTS shoppers are concerned about affording food and basic household goods, with a 7 percent increase in 2025 compared to 2024.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, in all instances, asked "To what extent do you agree with the following statements? (disagree: 1-3= disagree to strongly agree 5-7= agree to strongly agree)"; (a) Indicates the percent of respondents (rated 5-7) who agree with the statement.; (b) BTS shoppers include the 831 households with children and/or adult students.

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

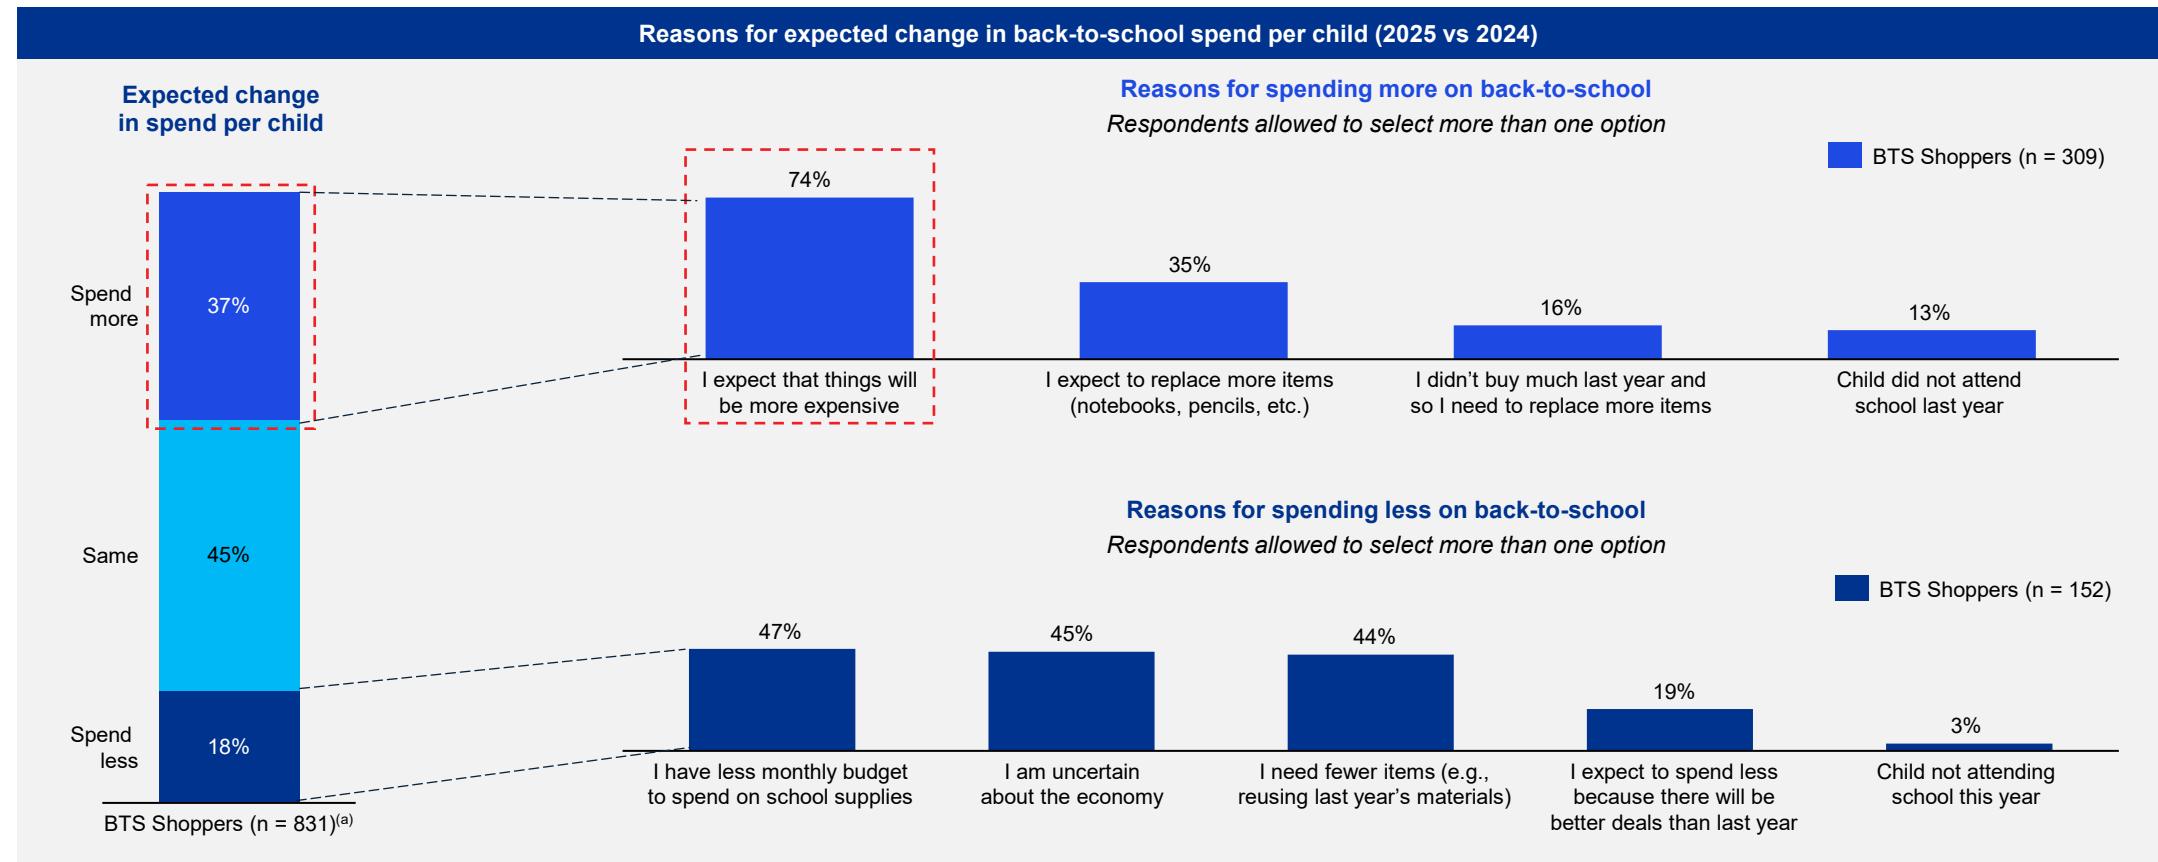

BTS shoppers expect to spend more in 2025 across all education levels with average spend per student expected to increase ~10 percent with highest increase in spend for pre-school child.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, if applicable, asked "On average, how much do you plan on spending on back-to-school supplies per child in each of the following academic age groups this year (2024)? Please include apparel/uniforms and footwear spend."; and "How much did you spend on back-to-school supplies per college student last year (2024)? How much do you plan on spending on back-to-school supplies per college student this year (2025)? Please include apparel, footwear/uniforms, and dorm furnishings"; (a) n count represents number of responses and is higher than the number of households that have students in each of the category since each respondent was asked to provide average spend for every child in each age group

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025; KPMG Consumer Pulse Survey, fielded July 15, 2024 – July 23, 2024

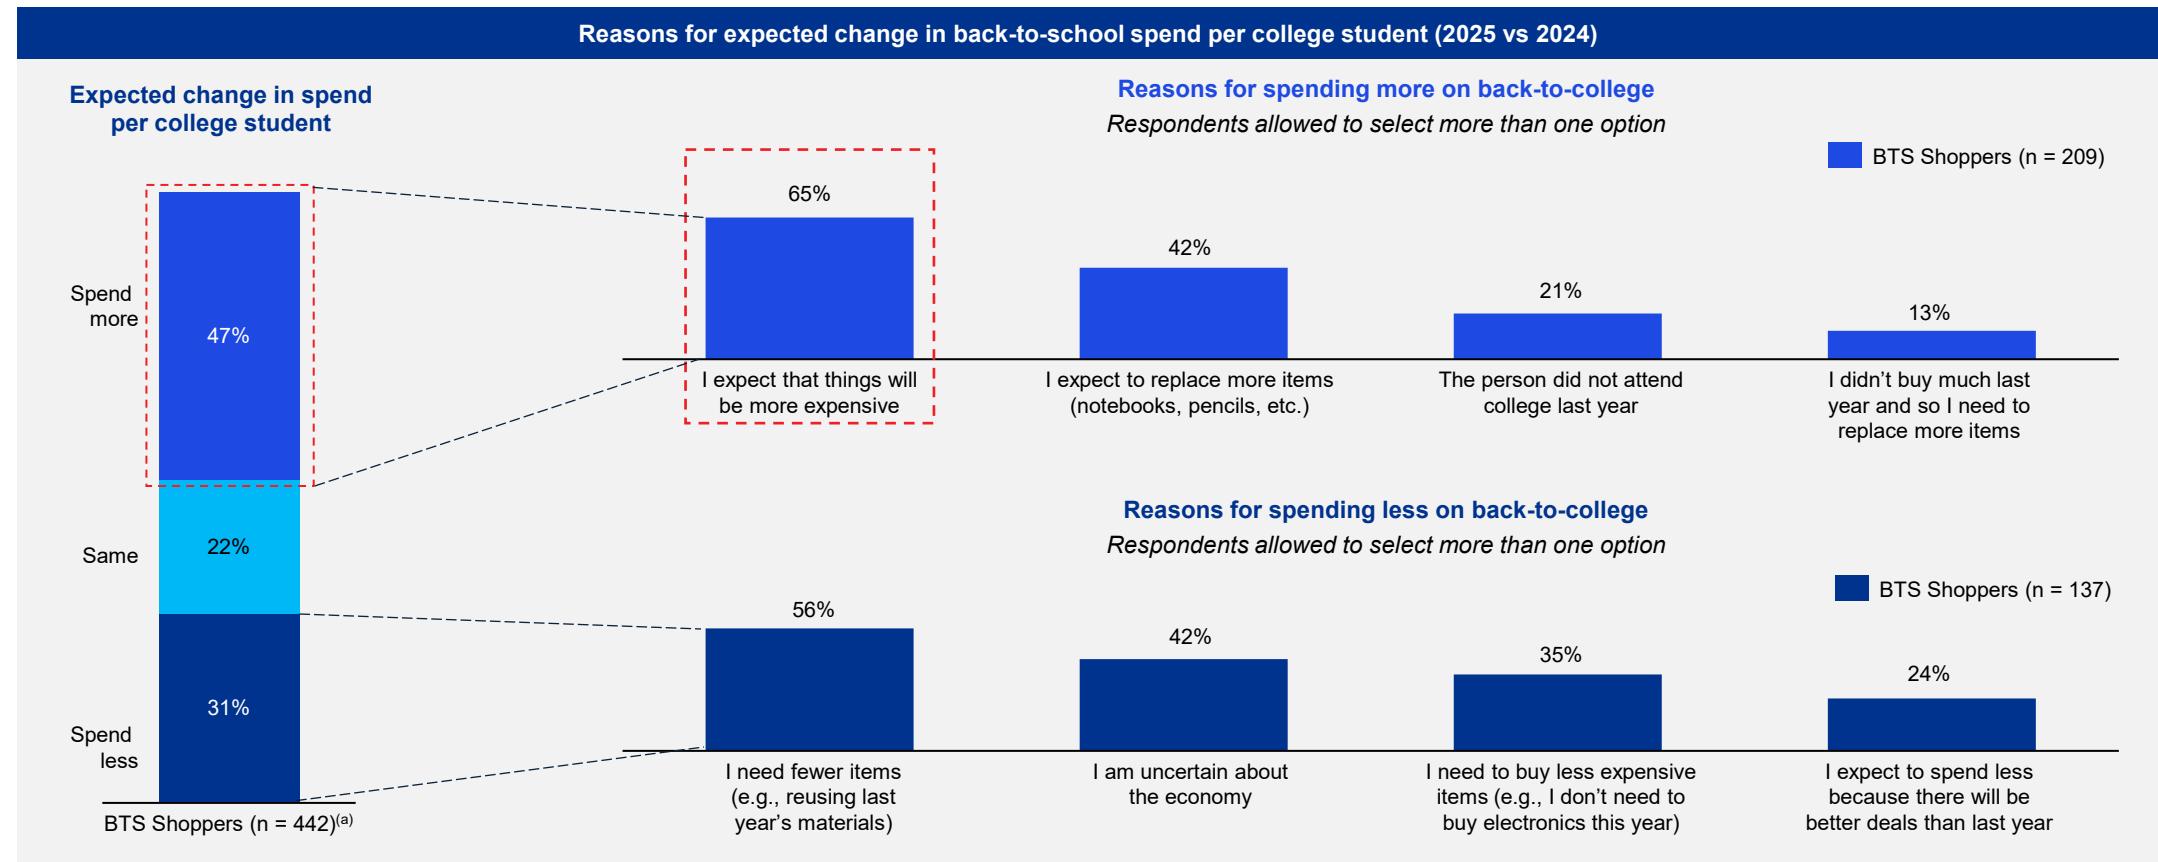

37 percent expect to spend more on back-to-school per child compared to 18 percent spending less.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, if applicable, asked "How much did you spend on back-to-school supplies per last year (2024)?, How much do you plan on spending on back-to-school supplies per this year (2025)? Please include apparel/uniforms spend.", "Why do you plan to spend less per child?", "Why do you plan to spend more per child?"; (a) BTS shoppers include the 831 households with children and/or adult students.;

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

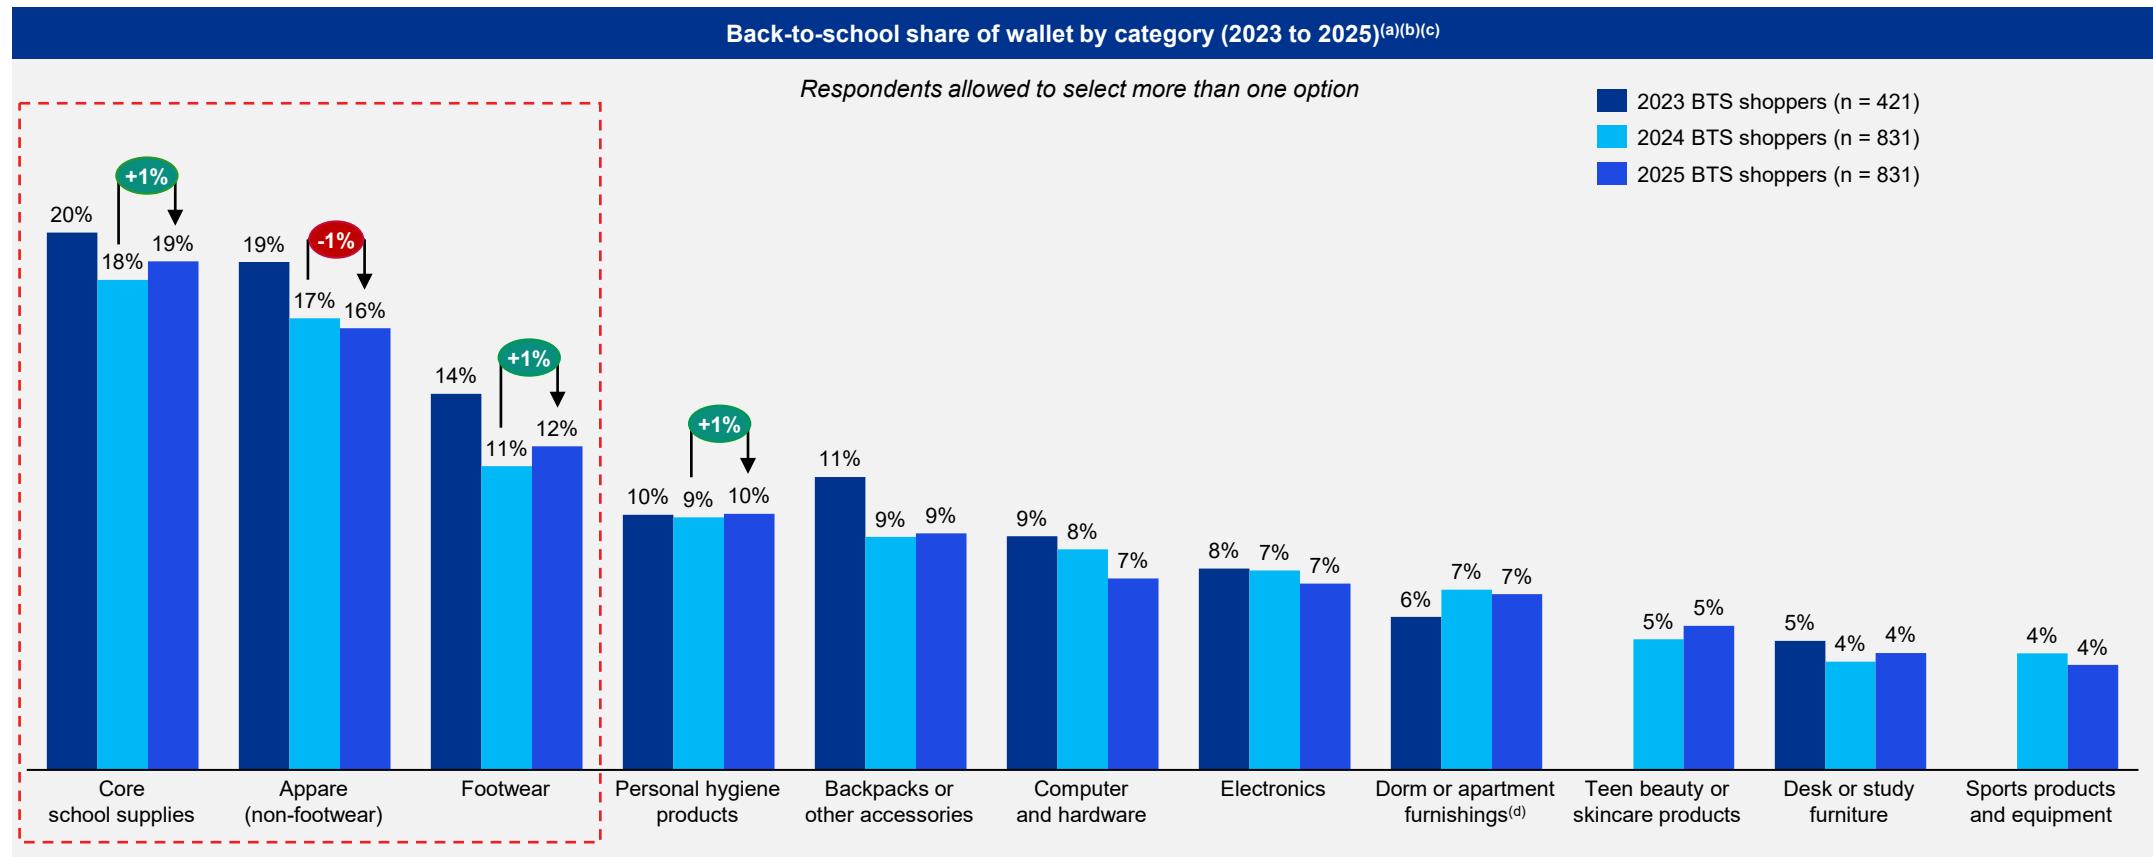

In 2025, 47 percent of BTS shoppers intend to spend more on back-to-college compared to 2024, mainly due to the expectation of rising price.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, if applicable, asked "You indicated that you have at least one college student in your household. How much did you spend on back-to-school supplies per college student last year (2024)? How much do you plan on spending on back-to-school supplies per college student this year (2025)? Please include apparel/uniforms, footwear and dorm furnishings.", "Why do you plan to spend less per college student?", "Why do you plan to spend more per college student?"; (a) BTS shoppers include the 442 households with adult students in college

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

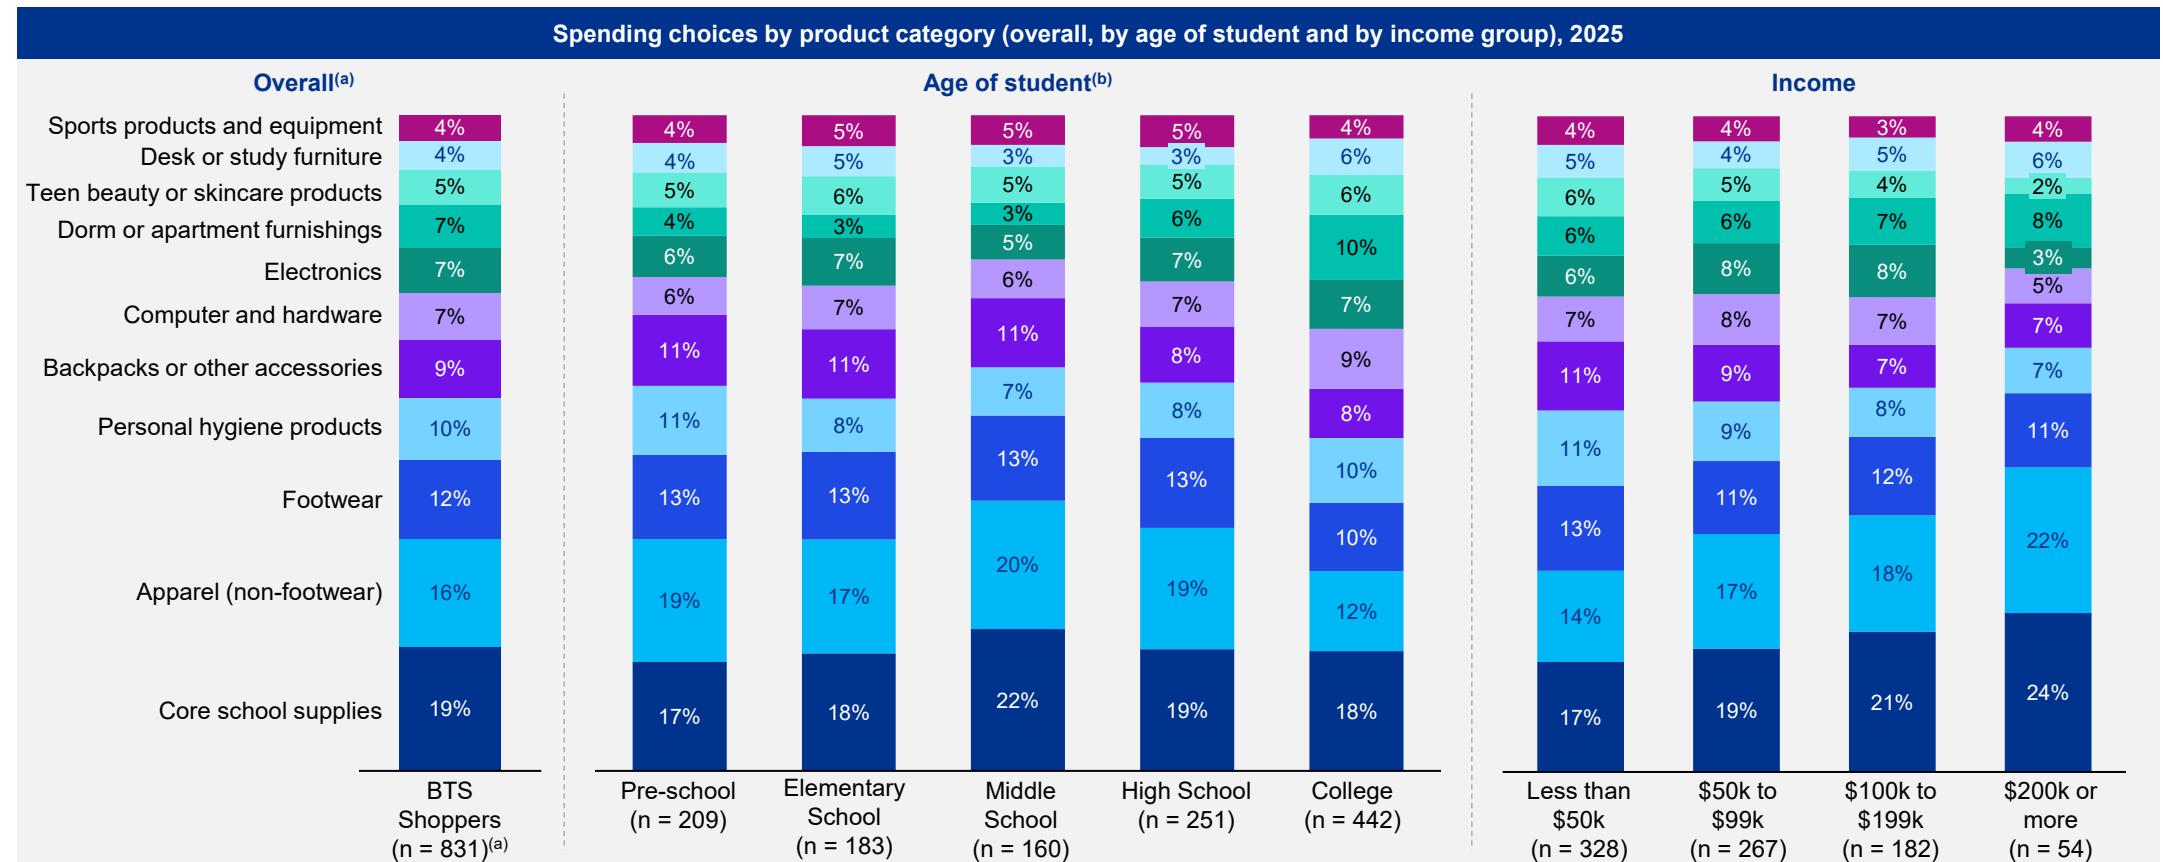

In 2025, BTS shoppers anticipate that core school supplies, apparel, and footwear will be their largest spending categories, accounting for a combined 47 percent of expenditures.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, if applicable, asked "What percent of your back-to-school budget did you spend on each of the following product categories last year (2024)?, What percentage of your back-to-school budget do you expect to spend on each of the following product categories this year (2025)?"; (a) BTS shoppers include the 831 households with children and/or adult students; (b) Numbers highlighted are not growth rates. They are an absolute increase between 2024 and 2025.; (c) Some of the answer options are added in this iteration, therefore a comparison will not be possible.; (d) Dorm or apartment furnishings include décor, bedding, storage bins.

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025; KPMG Consumer Pulse Survey, fielded July 15, 2024 – July 23, 2024

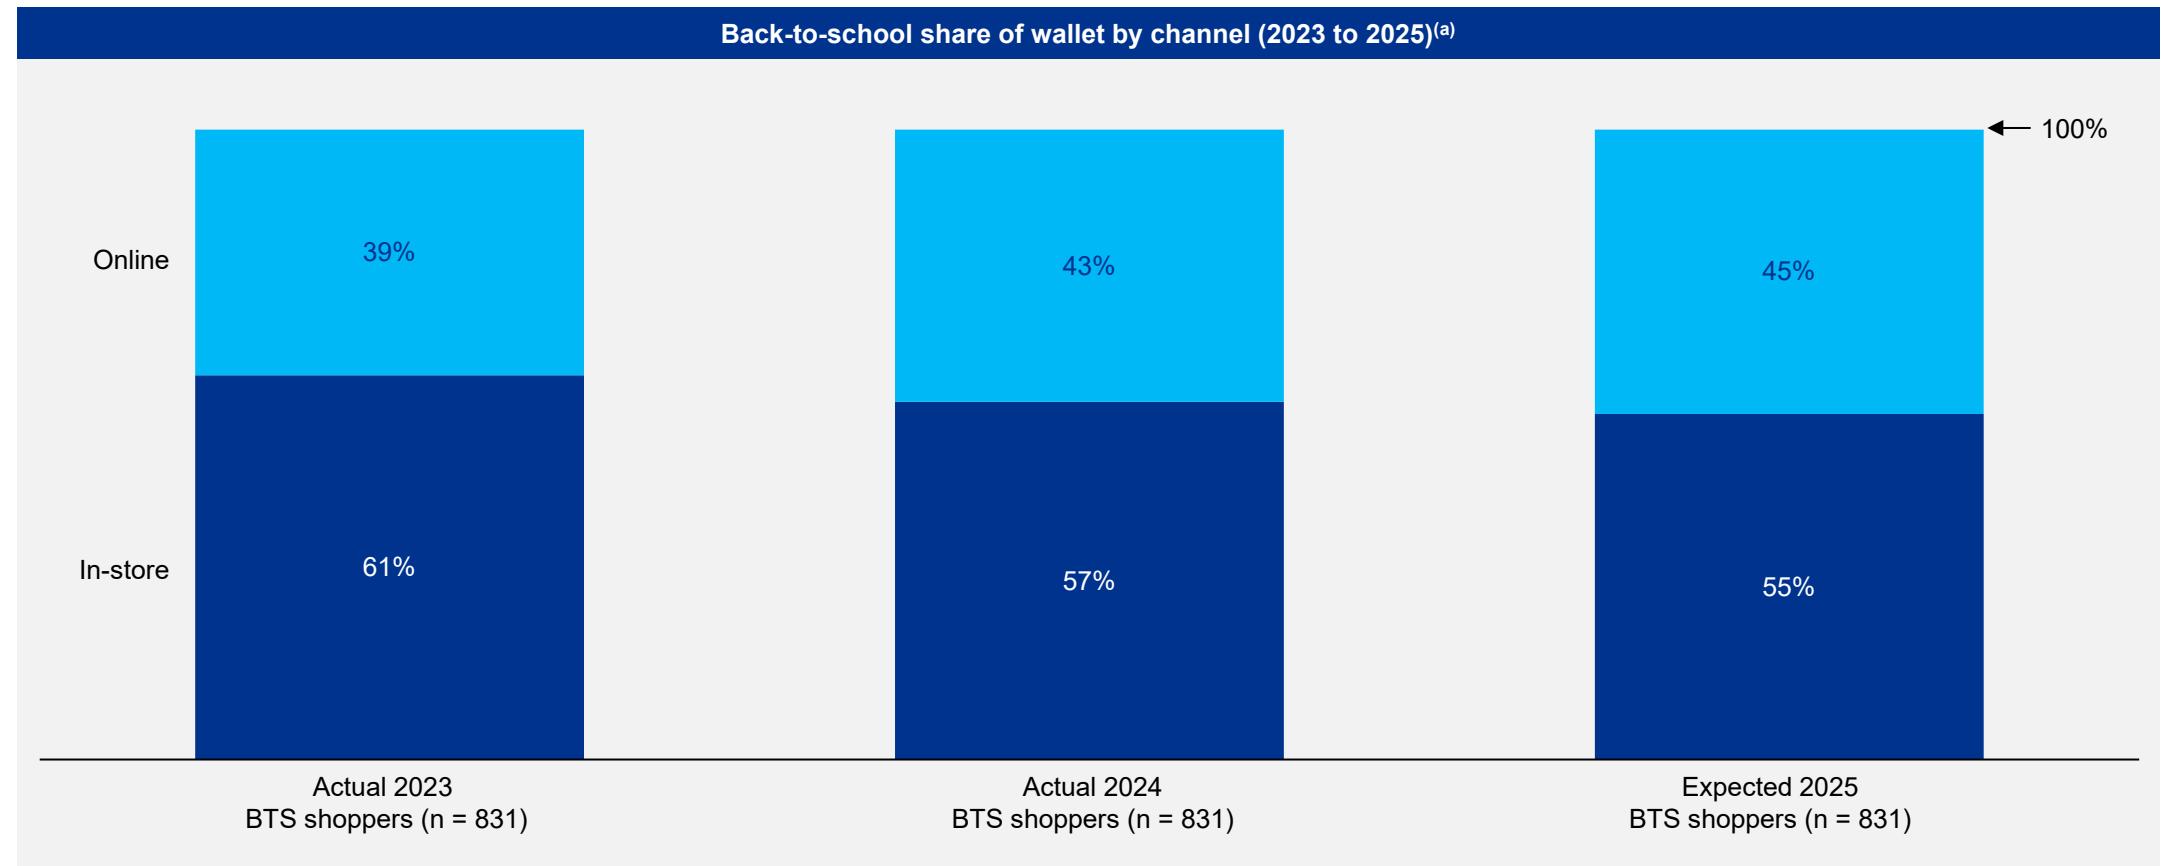

Core school supplies, apparel, and footwear together comprise nearly half (47 percent) of back-to-school spending by share of wallet.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States, and, if applicable, asked "What percent of your back-to-school budget did you spend on each of the following product categories last year (2024)? What percentage of your back-to-school budget do you expect to spend on each of the following product categories this year (2025)?"; (a) BTS shoppers include the 831 households with children and/or adult students; (b) Sum of segment within age-group does not add to the total BTS shoppers since a household may have more than one student across different age groups

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

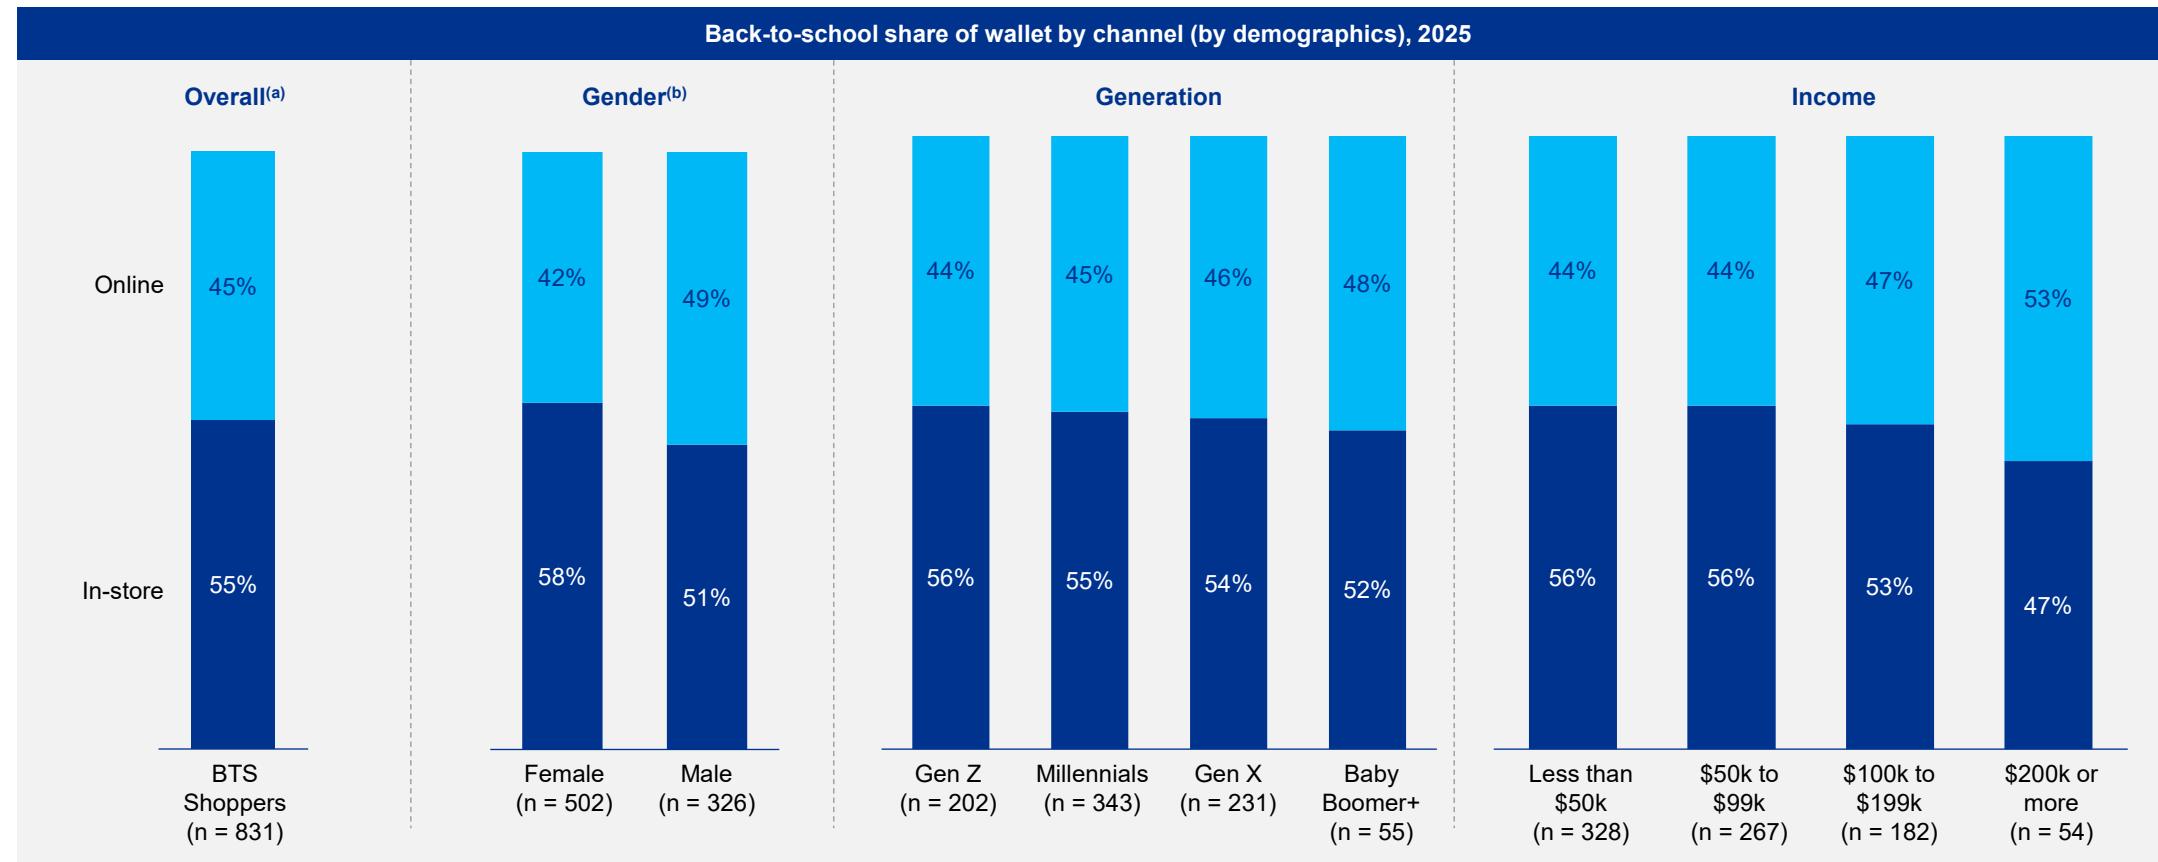

Over the past two years, back-to-school share of wallet spending online increased from 39 percent to 45 percent.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, if applicable, asked "How do you expect to shop for back to school this year vs last year vs the previous year?"; (a) BTS shoppers include the 831 households with children and/or adult students.

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

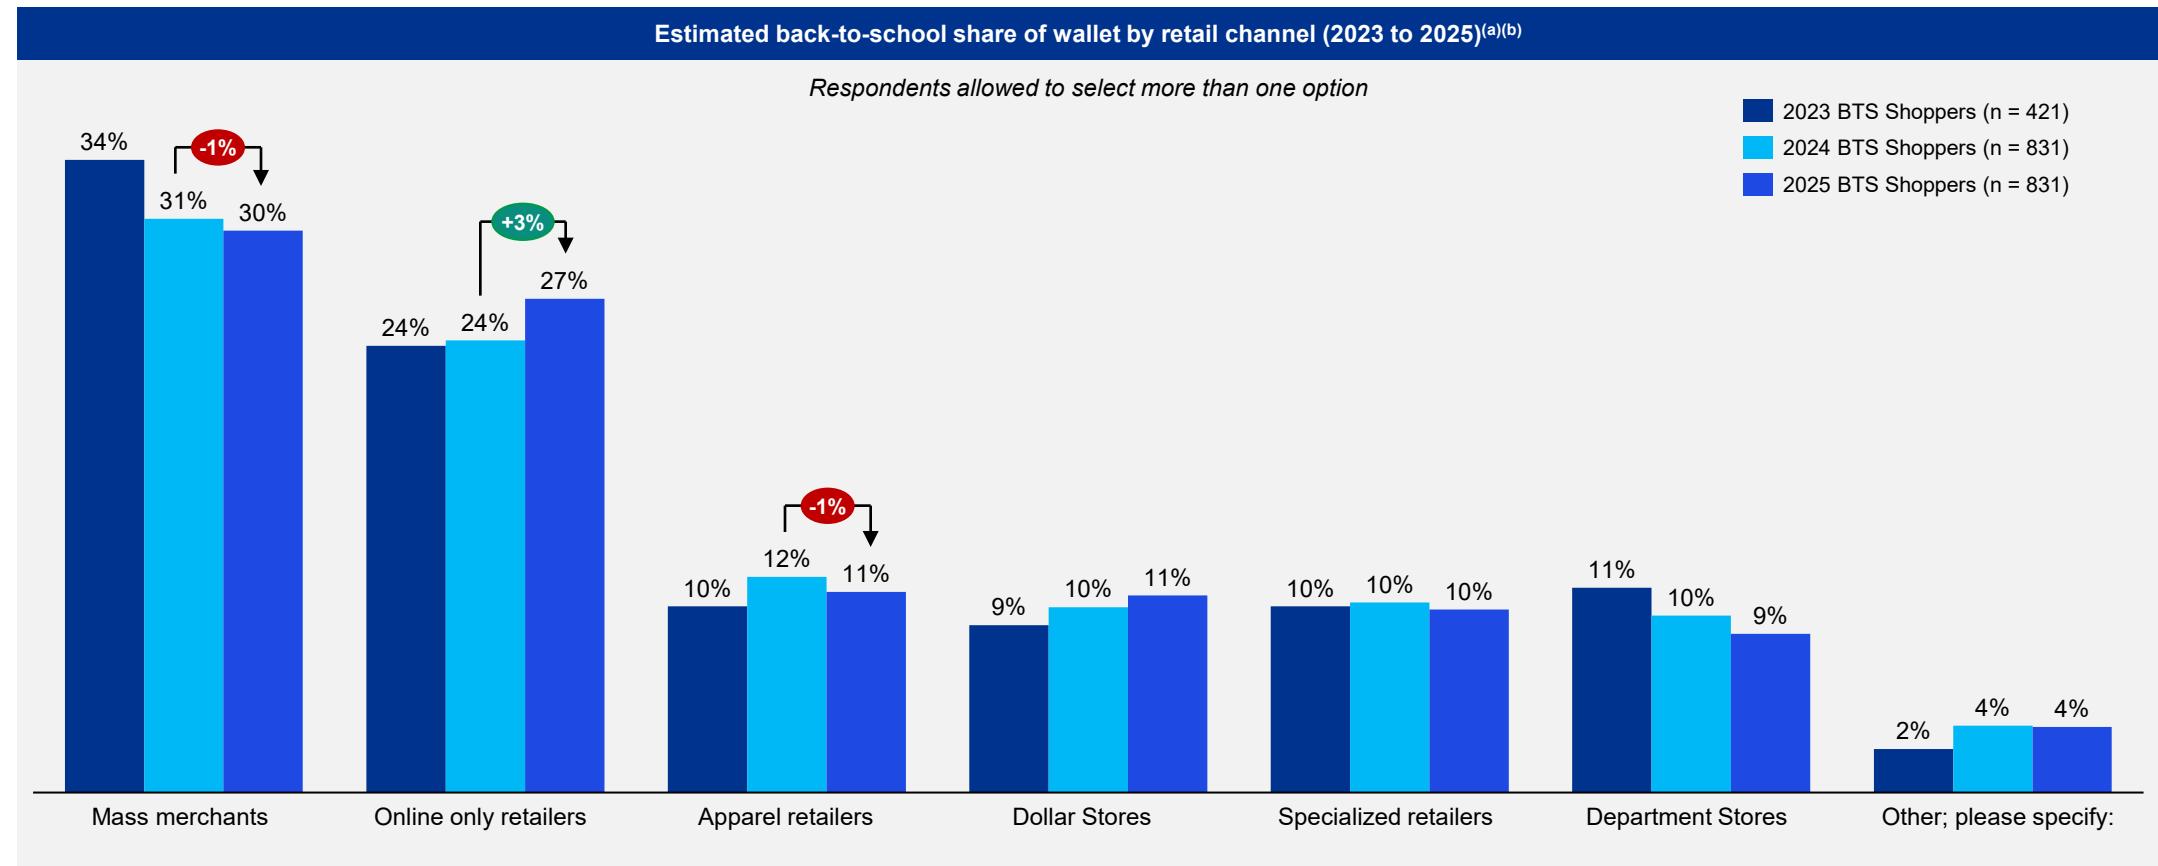

Higher income households spend a larger share of wallet (53 percent) online than lower income households.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, if applicable, asked "How do you expect to shop for back to school this year vs last year vs the previous year?"; Please select your gender"; "Please select the generation"; "Please select the annual income range that best describes your total household income in 2024.; (a) BTS shoppers include the 831 households with children and/or adult students.; (b) Gender identification omits respondents that mentioned "Prefer to self-describe"

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

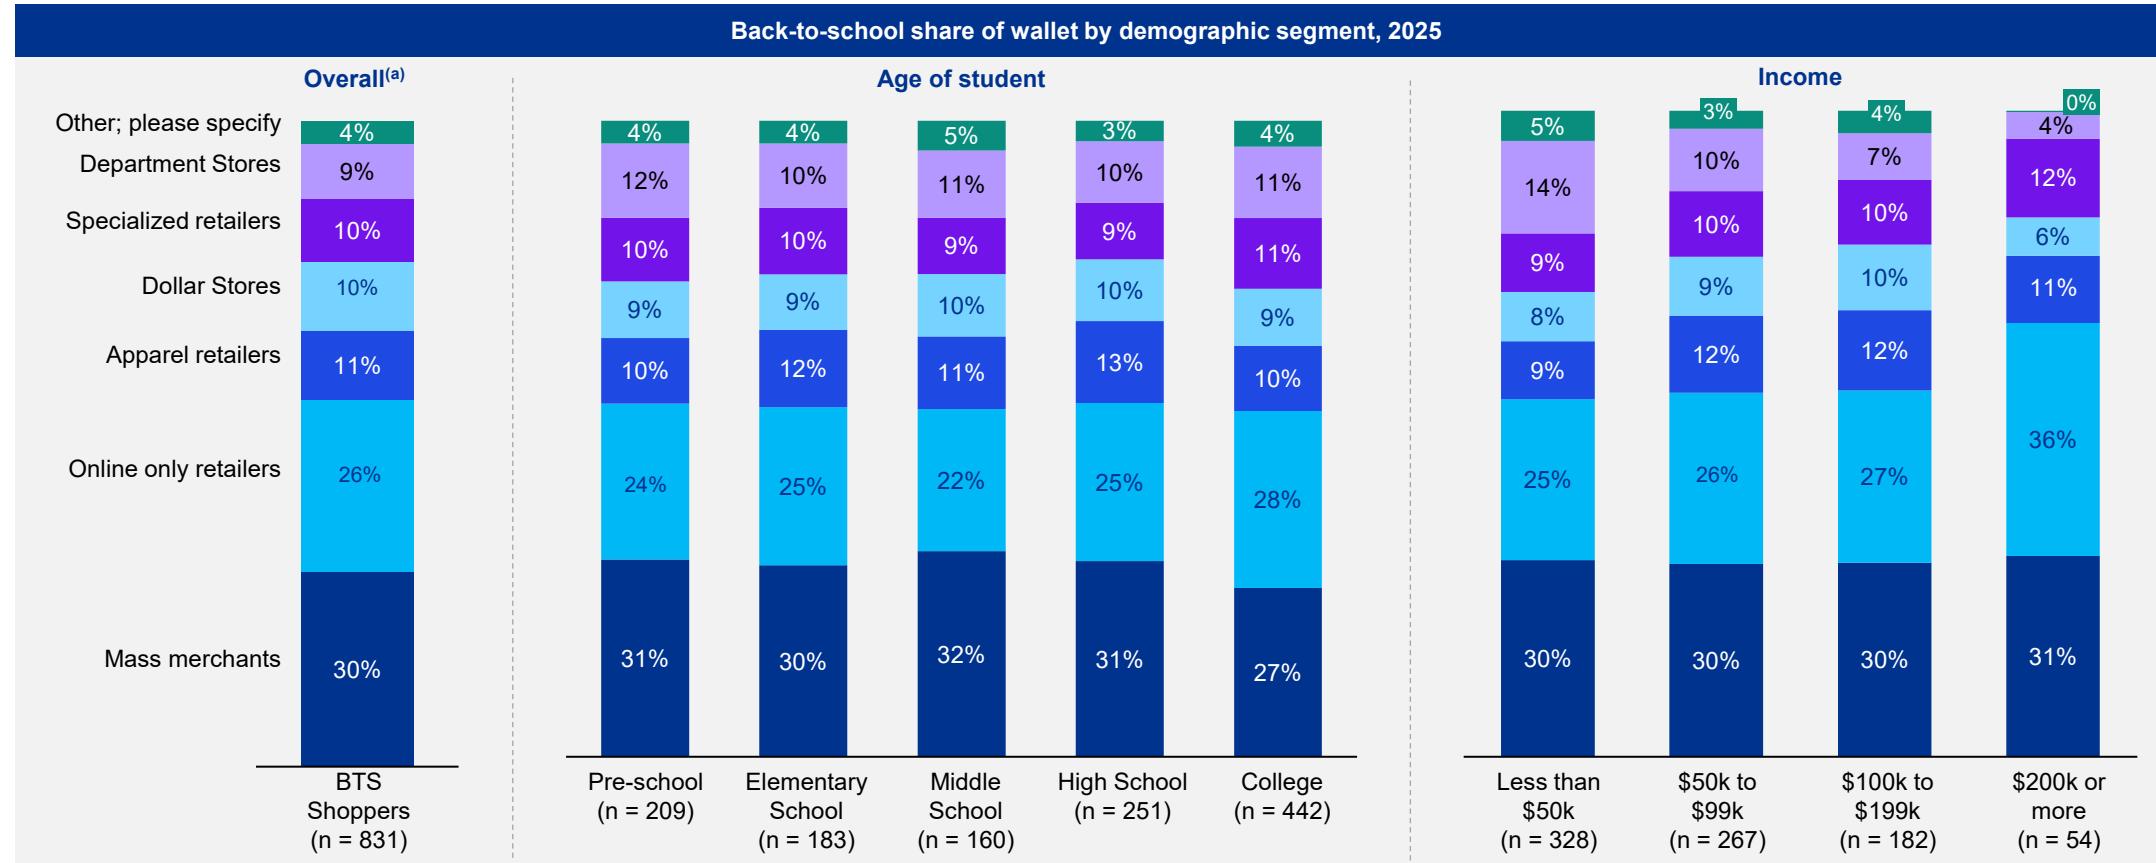

Back-to-school share of wallet has declined for mass merchants and increased for online only retailers.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, if applicable, asked "Where did you shop last year/where do you plan to shop this year for back-to-school?"; (a) BTS shoppers include the 831 households with children and/or adult students; (b) Survey respondents were prompted with a table to enter percent of spend by channel"

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025; KPMG Consumer Pulse Survey, fielded July 15, 2024 – July 23, 2024

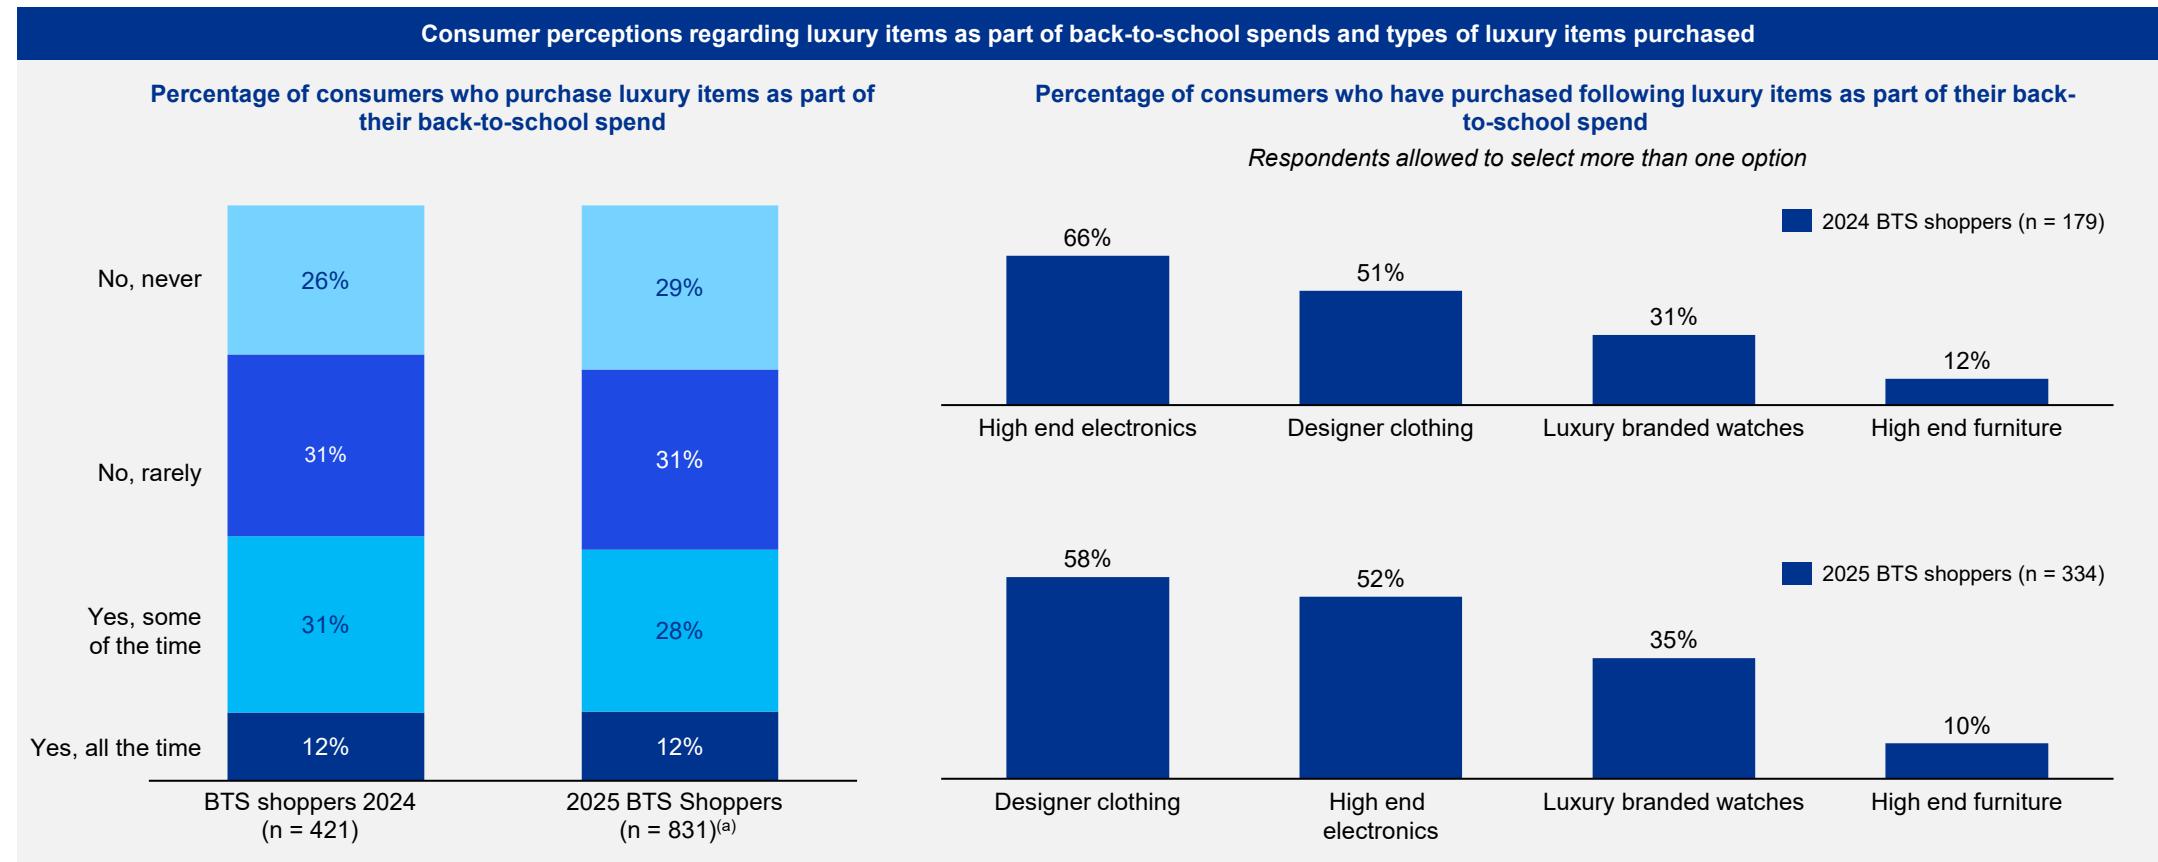

Higher income households were more likely to shop at online retailers.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, if applicable, asked "Where did you shop last year / where do you plan to shop this year for back-to-school?" (a) BTS shoppers include the 831 households with children and/or adult students"

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025

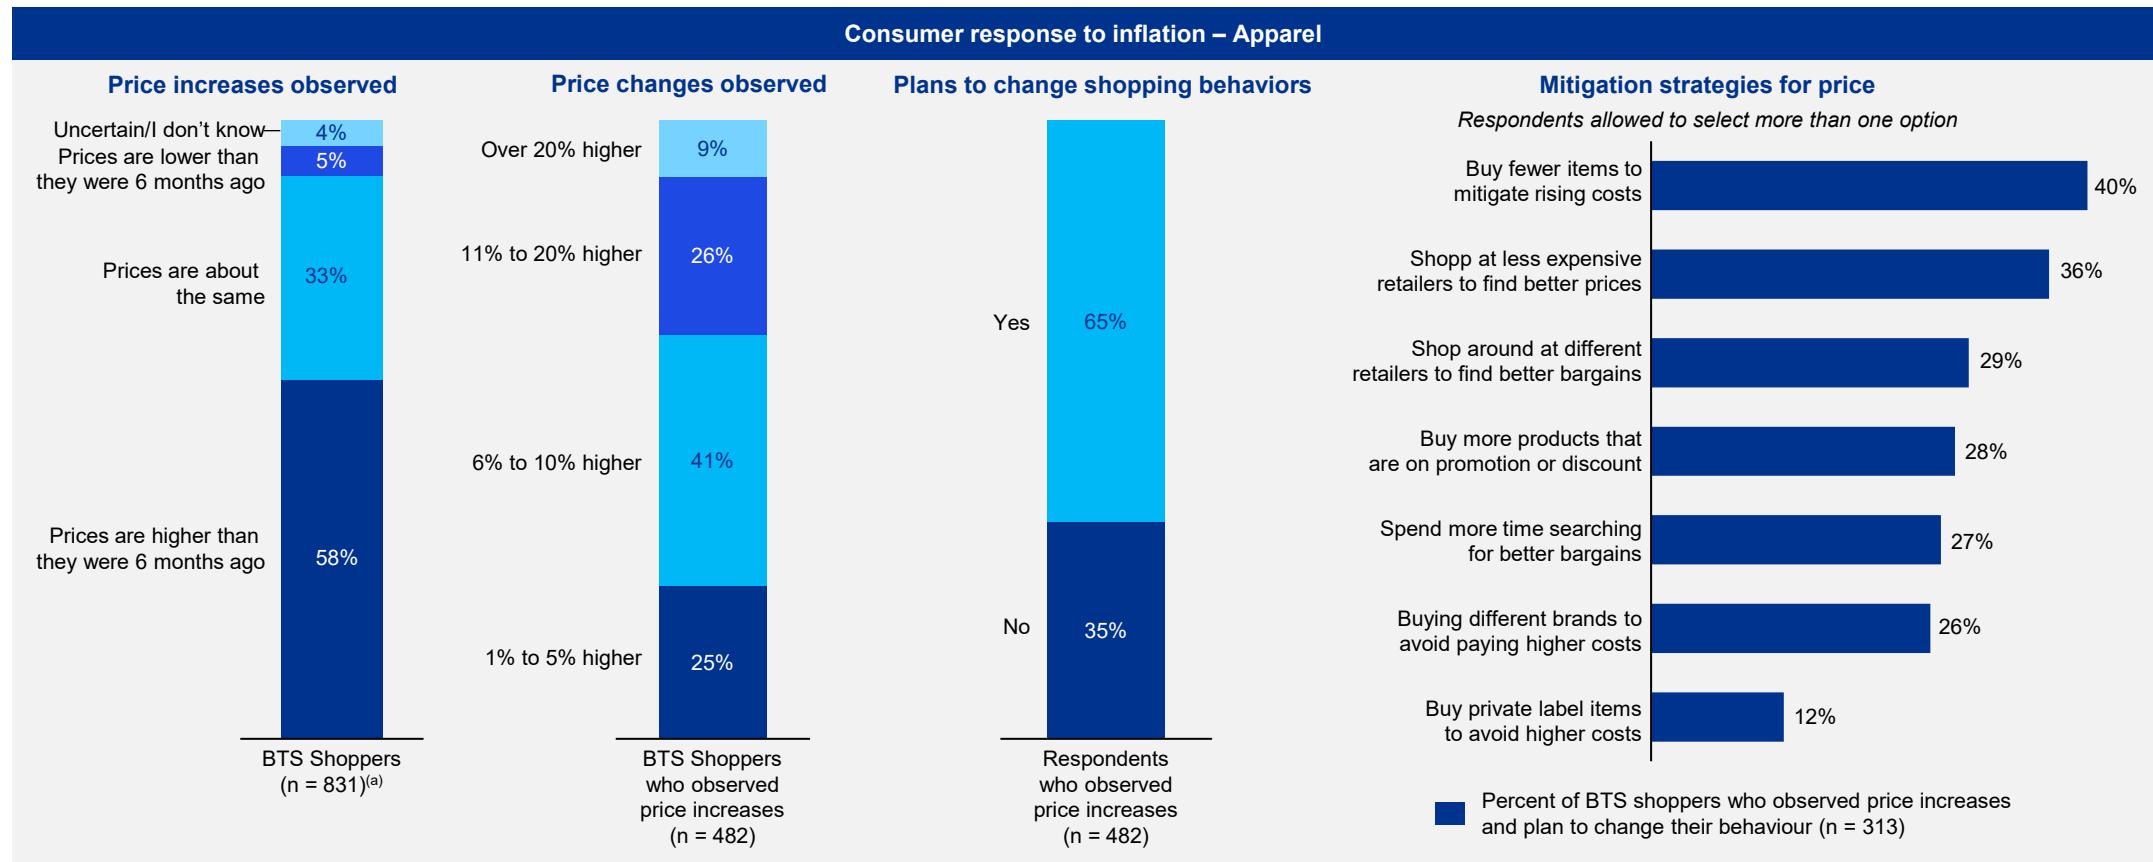

40 percent of consumers purchase luxury items for back-to-school; This year designer clothing were the most common luxury item—rather than electronics last year.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, if applicable, asked "Do you typically purchase items that are considered luxury items as part of your back-to-school purchases (high-end electronics, designer apparel, designer watches, luxury furniture, etc.)?" and if applicable, "You mention that you purchase items considered luxury as part of your back-to-school spend, what items do you typically purchase?"; (a) BTS shoppers include the 831 households with children and/or adult students"

Source(s): KPMG Consumer Pulse Survey, fielded June 6, 2025–June 13, 2025; KPMG Consumer Pulse Survey, fielded July 15, 2024 – July 23, 2024

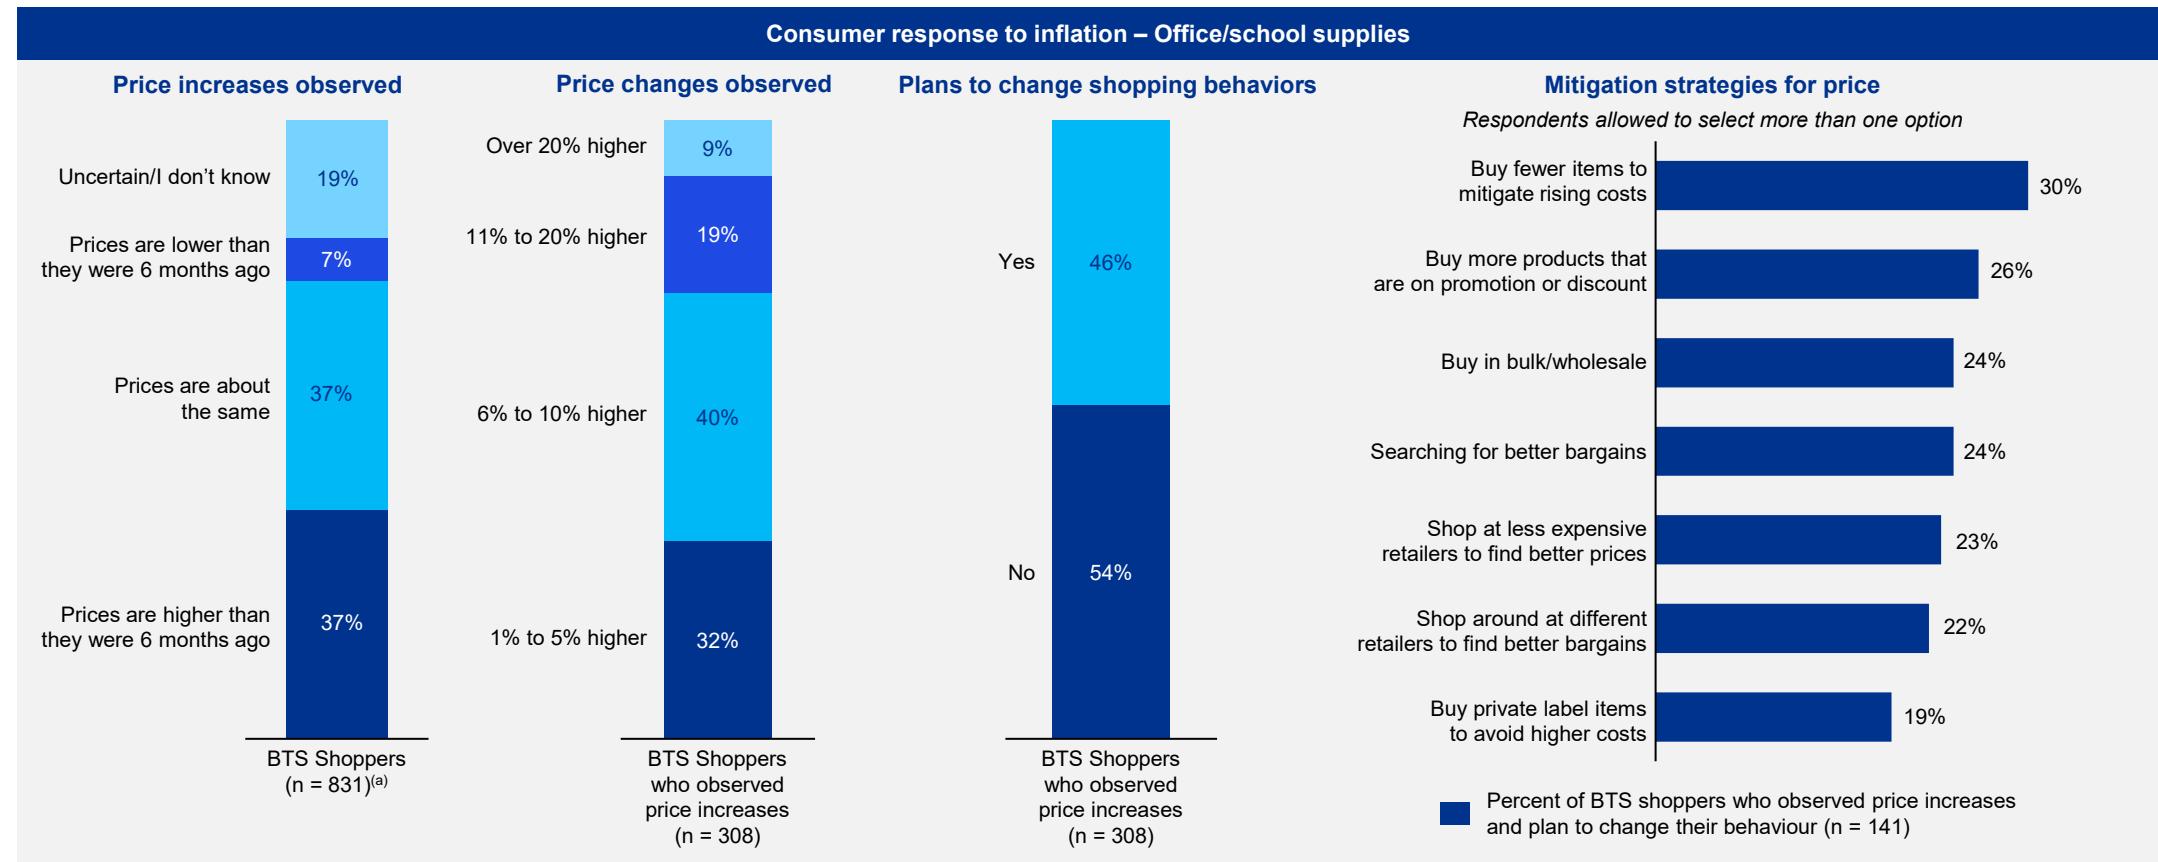

58 percent of back-to-school shoppers say apparel prices are higher now than six months ago; Among those who report price increases, 40 percent are buying fewer items.

Note(s): KPMG conducted a survey of 2,003 consumers across the United States and, if applicable, asked "For each of the following product categories, please indicate whether you believe prices are lower, about the same, or higher than they were 6 months ago." "You indicated that you believe prices are higher for each of the following product categories now than they were 6 months ago. Please indicate how much higher you believe prices are for each of the following product categories." "You indicated that you have noticed rising prices for apparel, do you plan on changing your shopping behaviors to mitigate rising prices for apparel?".
