

Google Cloud

A modern approach to securing your Cloud environment.

KPMG LLP and Google SecOps & Cloud Security

Through a modern approach, KPMG and Google Cloud are helping clients to secure their cloud environments by tackling vulnerabilities, enhancing visibility, and addressing compliance challenges.

As cloud adoption accelerates, managing the complexities of a multi-cloud estate with consistent, highly automated, and resilient controls becomes paramount for organizations looking to avoid the common pitfalls associated with migrating to the cloud.

Nearly every organization faces challenges with cloud security at scale. KPMG and Google Cloud are helping organizations to avoid these pitfalls.

Questions you should consider to secure your Cloud transformation.

How do I extend what I have been doing for many years on-premise into the cloud environment?

How do I bring it all together and get a single platform for a 360 view of my operations?

How do I make sure my environment is secure and free from vulnerabilities?

How do I detect configuration drift for my workloads?

How do I ensure that my environment is working properly?

How do I improve my reporting capabilities to meet the needs of my stakeholders?

Visibility

Vulnerability

Compliance

KPMG is helping organizations unleash the value of Google Cloud security solutions. Leveraging a modern security approach and decades of expertise in SecOps, security operations, and cloud deployment, we help develop an optimal cloud security strategy and implement Google Cloud SecOps solutions like Chronicle SIEM, Chronicle SOAR, and Mandiant Threat Hunting capabilities that can address your visibility, vulnerability, and compliance challenges and realize your security vision.

So, what does good look like?

Together, KPMG and Google Cloud can help you secure your Cloud Transformation.
