

Illustrative financial statements

Private equity funds

December 2025

kpmg.com

The information contained in these illustrative financial statements is of a general nature related to private investment companies only and is not intended to address the circumstances of any particular entity.

The form and content of financial statements are the responsibility of the specific entity's management. These illustrative financial statements:

(a) are intended to provide general information on applying accounting principles generally accepted in the United States of America effective as of September 30, 2025 and do not include all possible disclosures that may be required for private investment companies; (b) are not intended to be a substitute for management's review of applicable law or accounting standards or for professional judgment as to the adequacy of disclosures and fairness of presentation; and (c) are being provided with the understanding that the information contained herein should not be construed as legal, accounting, tax, or other professional advice or services and that no one should act on any information contained herein without the appropriate professional advice provided in connection with the entity's particular situation. Although we endeavor to provide accurate and timely information, there can be no guarantee that such information is accurate as of the date it is received or that it will continue to be accurate in the future. Certain information contained in these illustrative financial statements may be superseded as new guidance or interpretations are issued. Financial statement preparers and other users of these illustrative financial statements are therefore cautioned to stay informed of, and carefully evaluate, subsequent authoritative and interpretative guidance.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

ASC 275-10-50-2

1. Organization

[This note should be tailored to the Fund's specific nature of operations.] Private Equity, L.P. (the Fund), a Delaware investment limited partnership, commenced operations on *[Month, Date, Year]*. The Fund was organized to *[Include a description of the Fund's investment objectives]*. The Fund is managed by General Partner, LLC (the General Partner) and Investment Manager, LLC (the U.S. Investment Manager). *[If applicable:]* The U.S. Investment Manager is registered with the U.S. Securities and Exchange Commission as an investment adviser under the Investment Advisers Act of 1940.

The Fund commenced on *[Month, Date, Year]* and will expire on *[Month, Date, Year]*, but may be extended for up to two consecutive one-year periods or dissolved or terminated prior to expiration in accordance with the Limited Partnership Agreement (the Agreement). The Fund's commitment period ended on *[Month, Date, Year]*.

ASC 235-10-50-1,
ASC 235-10-50-3
ASC 946-10-50-1

2. Summary of significant accounting policies

The significant accounting policies followed by the Fund are:

Basis of presentation

The financial statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP). The Fund is an investment company and follows the accounting and reporting guidance in the Financial Accounting Standards Board's (FASB) Accounting Standards Codification (ASC) Topic 946, *Financial Services—Investment Companies*.

ASC 810-10-50-1

Principles of consolidation

[If applicable for consolidated financial statements: If consolidated financial statements are presented, the financial statements should be referred to as consolidated financial statements throughout. In addition, a Fund shall present the applicable disclosure requirements in ASC Section 810-10- 50 if the Fund has consolidated other entities in which it has a controlling financial interest and is not required to measure at fair value in accordance with ASC Topic 946.]

The Fund consolidates variable interest entities (VIEs) for which it is the primary beneficiary, generally as a result of having the power to direct the activities that most significantly affect the VIE's economic performance and holding variable interests that convey to the Fund the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. The Fund consolidates entities that are not VIEs when it has a controlling financial interest as a result of majority voting control. The Fund is precluded from consolidating entities that are not investment companies when it is required to measure those entities at fair value in accordance with ASC Topic 946.

The accompanying consolidated financial statements include the accounts of the Fund and its wholly owned and controlled subsidiary, Subsidiary A, which is not a VIE. Subsidiary A is an investment company established for the general purpose of executing specific investment transactions on behalf of the Fund. All significant intercompany accounts and transactions have been eliminated in the accompanying consolidated financial statements. *[If applicable:]* At December 31, 20XX, the Fund does not hold variable interests in any VIEs for which it is the primary beneficiary.

Principles of combination

[If applicable for combined financial statements: If combined financial statements are presented, then financial statements should be referred to as combined financial statements throughout.]

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

Combined financial statements are presented for commonly controlled entities when they are likely to be more meaningful than their separate financial statements. The combined financial statements include the accounts of Fund B and C (collectively, the Fund). All intercompany accounts and transactions have been eliminated in combination.

ASC 275-10-50-4

Use of estimates

Preparing financial statements in accordance with GAAP requires management to make estimates and assumptions in determining the reported amounts of assets and liabilities, including the fair value of investments, and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of income and expense during the reporting period. Actual results could differ from those estimates.

ASC 946-320-25-1
to 25-2

Investment transactions and related investment income

Securities transactions are accounted for on a trade-date basis. Securities transactions outside conventional channels are recorded as of the date the Fund obtains a right to demand the securities purchased or to collect the proceeds of sale, and incurs an obligation to pay the price of the securities purchased or to deliver the securities sold, respectively.

ASC 610-20-25-6 to
25-7

[As applicable include accounting policy of the fund that addresses recognition and derecognition of cryptocurrency transactions such as] Cryptocurrency transactions are recorded when the Fund has obtained control over the cryptocurrency when purchased or has transferred control of the cryptocurrency when sold. In determining when control of the cryptocurrency has been obtained or transferred, the Fund evaluates when it or the counterparty has the ability to direct the use of and obtain substantially all of the benefits of the cryptocurrency.

ASC 946-320-40-1

Realized gains and losses on investment transactions are determined using cost calculated *on [a specific identification] [an average cost]* basis.

[If applicable:] Net realized gains or losses on distribution of investments represent the difference between the original cost of the investments, determined using specific identification and the related market price on the distribution date. When investment securities are distributed to the partners, gains or losses are classified as realized.

ASC 946-320-35-5
S-X Rule 6-03g

[If applicable:] Distributions that represent returns of capital in excess of cumulative profits and losses are credited to investment cost rather than investment income. Dividends are recorded on the ex-dividend date and interest is recognized on an accrual basis.

ASC 946-830-45-34

[If applicable:] Withholding taxes on foreign dividends have been provided for in accordance with the Fund's understanding of the applicable country's tax rules and rates.

ASC 946-320-35-20

[If applicable:] Discounts and premiums to the face amount of debt securities are accreted and amortized using the effective interest rate method over the lives of the respective debt securities. *[If applicable:]* Premiums to the face amount of callable debt securities that have noncontingent call features that are callable at fixed prices and on preset dates are amortized using the effective interest rate method to the next call date when a call option at a specified price becomes exercisable. If there is no remaining premium or if there are no further call dates, the Fund resets the effective yield using the payment terms of the debt security.

ASC 946-320-35-17 to 19,
ASC 946-320-05-8,
ASC 310-10-35-53C,
ASC 946-320-30-4

[If applicable:] Interest income is no longer accrued, and interest receivable is written off when deemed uncollectible. *[If applicable:]* Discounts to the face amount of debt securities are not accreted and amortized to the extent that interest income is not expected to be realized.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

ASC 230-10-50-1

Cash, cash equivalents and restricted cash

Cash represents cash on hand and demand deposits held at financial institutions. Cash equivalents include short-term highly liquid investments of sufficient credit quality *[A fund may expand on this to specify the types of instruments classified as cash equivalents]* that are readily convertible to known amounts of cash and have original maturities of three months or less. Cash equivalents are carried at cost, plus accrued interest, which approximates fair value. Cash equivalents are held to meet short-term liquidity requirements, rather than for investment purposes. Cash and cash equivalents are held at major financial institutions and are subject to credit risk to the extent those balances exceed applicable Federal Deposit Insurance Corporation (FDIC) or Securities Investor Protection Corporation (SIPC) limitations.

ASC 275-10-50-16 to 18

[If applicable, where concentration in a particular money market fund issuer recorded in cash equivalents is a vulnerability from concentration under ASC 275] Cash equivalents also include \$XXX,XXX invested in Money Market Fund A, which represents X% of partners' capital. *[Alternatively, this disclosure can be made directly on the schedule of investments.]*

Restricted cash is subject to legal or contractual restrictions by third parties as well as restrictions as to withdrawal or use, including restrictions that require the funds to be used for a specified purpose and restrictions that limit the purpose for which the funds can be used. The Fund considers *[The Fund should include a description of what balance sheet items are restricted]* to be restricted cash.

ASC 326-20-30-1 to 10; ASC 326-20-35-1

[In addition, a fund should disclose the nature of restrictions on cash, cash equivalents, and amounts described as restricted cash.]

Current expected credit losses

[Include if the Fund has material expected credit losses for financial assets measured at amortized cost and evaluate whether additional disclosures required under Topic 326 apply]

The Fund accounts for estimated credit losses on financial assets measured at an amortized cost basis under the current expected credit loss model in accordance with ASC Subtopic 326-20. The Fund estimates expected credit losses over the life of its financial assets as of the reporting date based on relevant information about past events, current conditions, and reasonable and supportable forecasts. The Fund records the estimate of expected credit losses as an allowance for credit losses, which is a valuation account that adjusts the amortized cost basis of the financial asset. Changes in the allowance for credit losses are reported as an expense in the statement of operations.

Foreign currency translation

ASC 946-830-45-37

Assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the date of valuation. Transactions denominated in foreign currencies, including purchases and sales of investments and income and expenses, are translated into U.S. dollar amounts on the date of those transactions. Adjustments arising from foreign currency transactions and translation of assets and liabilities denominated in foreign currencies are reflected in the statement of operations.

[Include if the Fund does not separately report foreign currency exchange effects from realized and unrealized gains and losses from investments:]

ASC 946-220-50-2, ASC 946-830-50-1

The Fund does not isolate that portion of the results of operations arising from the effect of changes in foreign exchange rates on investments from fluctuations arising from changes in market prices of investments held. Those fluctuations are included in net realized and unrealized gain or loss from investments in the statement of operations.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

ASC 946-220-45-6,
ASC 946-830-45-38

Reported net realized gain (loss) from foreign currency transactions arises from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net change in unrealized gain (loss) from translation of assets and liabilities in foreign currencies arises from changes in the fair values of assets and liabilities, other than investments in securities at the end of the period, resulting from changes in exchange rates.

[Include if the Fund separately reports foreign currency exchange effects from realized and unrealized gains and losses from investments:]

ASC 946-220-50-2,
ASC 946-830-50-1

The Fund isolates that portion of the results of operations arising from the effect of changes in foreign exchange rates on investments from fluctuations arising from changes in market prices of investments held.

ASC 946-220-45-6,
ASC 946-830-45-36

Reported net realized gain (loss) from foreign currency transactions arises from sales of portfolio securities; sales and maturities of short-term securities; sales of foreign currencies; currency gains or losses realized between the trade and settlement dates on securities transactions; and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net change in unrealized gain (loss) from translation of assets and liabilities in foreign currencies arises from changes in the fair values of assets and liabilities, including investments in securities, resulting from changes in exchange rates.

Fair value—Hierarchy of fair value

The Fund determines fair value based on assumptions that market participants would use in pricing an asset or liability in the principal or most advantageous market. When considering market participant assumptions in fair value measurements, the following fair value hierarchy distinguishes between observable and unobservable inputs, which are categorized in one of the following levels:

Level 1—Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund is able to access.

Level 2—Inputs, other than quoted prices included in Level 1, that are observable either directly or indirectly. These inputs may include (a) quoted prices for similar assets in active markets, (b) quoted prices for identical or similar assets in markets that are not active, (c) inputs other than quoted prices that are observable for the asset, or (d) inputs derived principally from or corroborated by observable market data by correlation or other means.

Level 3—Inputs that are unobservable and significant to the entire fair value measurement.

[If applicable:] Investments in private investment companies measured using net asset value (NAV) as a practical expedient are not categorized within the fair value hierarchy.

The availability of valuation techniques and observable inputs can vary from investment to investment and are affected by a wide variety of factors, including the type of investment, whether the investment is new and not yet established in the marketplace, the liquidity of markets, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, determining fair value requires more judgment. Because of the inherent uncertainty of valuation, such estimates may be materially higher or lower than the values that would have been used had a ready market for the investments existed. Therefore, the degree of judgment exercised by the Fund in determining fair value is greatest for investments categorized in Level 3.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

In some circumstances, the inputs used to measure fair value might be categorized within different levels of the fair value hierarchy. In those instances, the fair value measurement is categorized in its entirety in the fair value hierarchy based on the lowest-level input that is significant to the fair value measurement.

Fair value—Valuation techniques and inputs

ASC 820-10-50-2(bbb)

[The following includes examples of valuation techniques and inputs used by investment companies. Certain investment types are included solely for the purpose of providing illustrative examples of valuation techniques and inputs and are not included elsewhere in the illustrative financial statements. These examples do not include all possible investment types or valuation techniques and inputs that may apply to a particular type of investment. A fund's disclosures should be tailored to describe the valuation techniques and inputs used under the specific facts and circumstances of the fund, including the extent to which valuations are obtained from third-party pricing services or broker quotations.]

When determining fair value, the Fund uses valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The valuation techniques used by the Fund to determine fair value are considered to be market or income approaches.

The market approach includes valuation techniques that use prices and other relevant information generated by market transactions involving identical or comparable assets, liabilities, or a group of assets and liabilities. The Fund generally uses the market approach to value *[Include categories of investments valued using a market approach as applicable, such as the following:]* exchange-traded securities and exchange-traded derivatives.

[Alternative language for the market approach specific to nonmarketable or privately held investments:] The market approach includes valuation techniques that use observable market data (e.g., current trading and/or acquisition multiples) of comparable companies and applying the data to key financial metrics of the investment. The comparability (as measured by size, growth profile, and geographic concentration, among other factors) of the identified set of comparable companies to the investment is considered in applying the market approach. The Fund generally uses the market approach to value *[Include other categories of investments as applicable such as:]* equity investments in private operating companies.

The income approach includes valuation techniques that measure the present value of anticipated future economic benefits (i.e., net cash flows). The estimated net cash flows are forecast over the expected remaining economic life and discounted to present value using a discount rate commensurate with the level of risk associated with the expected cash flows. The Fund generally uses the income approach to *[Include categories of investments valued using an income approach as applicable, such as:]* value equity and debt investments in private operating companies.

ASC 946-325-35-1

Cryptocurrency

[Refer to KPMG's Issues In-Depth: Accounting for crypto intangible assets by investment companies, for an overview of accounting for crypto intangible assets by investment companies] Crypto assets are stated at fair value and generally valued using prices as reported on reputable and liquid exchanges and *[Include accounting policy of investment company to determine the cut-off to value its cryptocurrency assets, for example whether the Fund uses the market prices of its crypto assets at a time other than close of its reporting period such as:]* may involve utilizing an average of bid and ask quotes using prices provided by such exchanges at a specified time of determination on the last day of its reporting period.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

When determining a principal market for cryptocurrencies, the Fund identifies publicly available, well established cryptocurrency exchanges that are accessible to the Fund, and considers factors including the recent price activity of an exchange, liquidity, and security and stability of an exchange, to determine which exchanges to utilize.

While some crypto assets are traded in active markets and are valued based on quoted prices other crypto assets may be more thinly-traded or subject to irregular trading activity. To the extent that crypto assets are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Crypto assets traded on inactive markets are generally categorized in Level 2 of the fair value hierarchy.

Marketable equity securities

The Fund values equity securities that are traded on a national securities exchange at their last reported sales price. The Fund generally values equity securities traded in over-the-counter (OTC) markets and listed securities for which no sale was reported on that date at *[the price within the bid-ask spread that best represents fair value] [their last reported bid price if held long, and last reported ask price if sold short]*. To the extent that equity securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy. Equity securities traded on inactive markets or valued by reference to similar instruments are generally categorized in Level 2 of the fair value hierarchy.

Private operating companies

Investments in private operating companies may consist of common stock, preferred stock, and debt of privately owned portfolio companies. At each measurement date, the Fund reviews the valuation of each investment and records adjustments as necessary to reflect the expected exit value of the investment under current market conditions. Ongoing reviews by the Fund's management are based on an assessment of the type of investment, the stage in the lifecycle of the portfolio company, and trends in the performance and credit profile of each portfolio company as of the measurement date. The *[Fund values] [Fund uses an independent pricing service to value]* private operating companies using an income approach or a market approach. In certain instances, the Fund may use multiple valuation approaches for a particular investment and estimate its fair value based on a weighted average or a selected outcome within a range of multiple valuation results. The decision to use a valuation approach will depend on the investment type and the information available.

When applying valuation techniques used to determine fair value, the Fund assumes a reasonable period of time for estimating cash flows and considers the financial condition and operating results of the portfolio company, the nature of the investment, restrictions on marketability, market conditions, foreign currency exposures, and other factors. When determining the fair value of investments, the Fund exercises significant judgment and uses the best information available as of the measurement date. Due to the inherent uncertainty of valuations, the fair values reflected in the financial statements as of the measurement date may materially differ from (1) values that would have been used had a readily available market existed for those investments and (2) the values that may ultimately be realized.

[Examples of income approach disclosures:] Inputs used under an income approach may include annual projected cash flows for each investment through their expected remaining economic life discounted to present value using appropriate risk-adjusted discount rates. These cash flow assumptions may be probability weighted to reflect the risks associated with achieving expected performance levels across various business scenarios. Inputs used under an income approach may include an assessment of the credit profile of the portfolio company as of the measurement date, the operating performance of the portfolio company, trends in the liquidity and financial leverage ratios

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

as of the measurement date, and an assessment of the portfolio company's business enterprise value, liquidation value, and debt repayment capacity of each subject debt investment. In addition, inputs may include an assessment of potential yield adjustments for each debt investment based on trends in the credit profile of the portfolio company and trends in the interest rate environment as of the measurement date.

[Examples of market approach disclosures:] Inputs used under a market approach may include valuation multiples applied to corresponding performance metrics, such as earnings before interest, taxes, depreciation, and amortization (EBITDA); revenue; or net earnings. The selected valuation multiples were estimated through a comparative analysis of the performance and characteristics of each investment within a range of comparable companies or transactions in the observable marketplace. In addition, recent merger and acquisition transactions of comparable companies may be used as a basis to develop implied valuation multiples. Investment valuations using the market approach may also consider factors such as liquidity, credit, and market risk factors of the portfolio company.

[Examples of probability-weighted expected return method disclosures:] The probability-weighted expected return method is based on an estimate of expected fair value as analyzed through various liquidity scenarios. Fair value is determined for a given scenario at the time of the future liquidity event and discounted back to the valuation date using a risk-adjusted discount rate. To determine fair value, the present values under each scenario are weighted based on the expected probability of each scenario occurring.

[Examples of option pricing model disclosures:] The option pricing model treats a portfolio company's common stock and preferred stock as call options on the enterprise or equity value of the portfolio company, with exercise or strike prices based on the characteristics of each series or class of equity in the portfolio company's capital structure (e.g., the liquidation preference of a given series of preferred stock). This method is sensitive to certain key assumptions, such as volatility and time to exit, that are not observable.

Investments in private operating companies are generally categorized in Level 3 of the fair value hierarchy.

Convertible debt

The Fund's investments in convertible debt issued by private operating companies represent hybrid financial instruments that combine elements of debt and equity, allowing the holder to convert the debt into equity, typically at a future financing event or upon maturity. The terms of conversion, including the conversion price and any applicable caps or discounts, are usually predetermined in the initial agreement. Convertible debt may accrue interest until conversion and offers investors potential upside participation in the private operating company's growth while providing greater downside protection than an equity investment would.

While certain convertible debt investments could potentially be repaid prior to conversion, the Fund may also make convertible debt investments in early-stage companies with the intention to convert to equity at the next financing round and with the understanding that the company would not be able to repay the principal balance in cash at maturity without a financing round occurring. These expected exit scenarios are considered when the Fund values each investment. The transaction price, excluding transaction costs, is typically the Fund's best estimate of fair value at the investment date. When evidence supports a change in fair value from the transaction price, adjustments are made to reflect expected exit values in the investment's principal market under current market conditions. Investments in convertible debt are generally classified in level 2 or 3 of the fair value hierarchy.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

Simple agreements for future equity ("SAFEs")

The Fund's investments in SAFEs issued by private operating companies give the Fund rights for future equity in the portfolio company without specifying a price per share at the time of the initial investment. The Fund generally receives shares in the portfolio company when a future financing round or other liquidity event occurs in exchange for cancellation of the original SAFE. These investments generally do not accrue interest. The Fund may make SAFE investments in early-stage companies with the intention to convert to equity at the next financing round and with the understanding that the company would not be able to repay the principal balance in cash without a financing round occurring. The transaction price, excluding transaction costs, is typically the Fund's best estimate of fair value at the investment date. When evidence supports a change in fair value from the transaction price, adjustments are made to reflect expected outcomes in the investment's principal market under current market conditions. SAFEs are generally classified in level 3 of the fair value hierarchy.

Restricted securities of public companies

Restricted securities of public companies cannot be offered for sale to the public until the issuer complies with certain statutory or contractual requirements. The Fund generally values restricted securities of public companies at a discount to similar publicly traded companies when the restriction is specific to the security. The Fund considers the type and duration of the restriction, but in no event does the valuation exceed the listed price on any major securities exchange.

Restricted securities of public companies are generally categorized in Level 2 of the fair value hierarchy. However, to the extent that significant inputs used to determine liquidity discounts are unobservable, restricted securities in public companies may be categorized in Level 3 of the fair value hierarchy.

Warrants

The Fund values warrants that are traded on an exchange at their last reported sales price. The Fund values OTC or nontraded warrants using the Black-Scholes option pricing model, which takes into account the contract terms (including the strike price and contract maturity) and multiple inputs (including time value, volatility, equity prices, interest rates, and currency rates). Warrants that are traded on an exchange in an active market are generally classified in Level 1 of the fair value hierarchy. Warrants that are traded on the OTC market are generally classified in Level 2 or 3 of the fair value hierarchy.

Private investment companies

The Fund values private investment companies using the NAV provided by the underlying private investment companies as a practical expedient. The Fund applies the practical expedient to private investment companies on an investment-by-investment basis, and consistently with the Fund's entire position in a particular investment, unless it is probable that the Fund will sell a portion of an investment at an amount different from the NAV of the investment. *[See Appendix A for additional disclosures for investments in private investment companies that are not valued using NAV as a practical expedient.]*

ASC 946-235-50-5(b)

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

Special-purpose vehicles

Special-purpose vehicles (SPVs) consist of *[common stock, limited partnership interests, etc.]* in unconsolidated entities that invest directly or indirectly in private equity or debt securities, real estate, or intangible property. The valuation of the Fund's investments in SPVs may depend on whether the SPV is required to be accounted for as an investment company under ASC Topic 946.

If an SPV is accounted for as an investment company, the Fund generally values the investment, as a practical expedient, using the NAV provided by the SPV when the NAV is calculated in a manner consistent with GAAP for investment companies. The Fund applies the practical expedient to eligible SPVs on an investment-by-investment basis and consistently with the Fund's entire position in a particular investment, unless it is probable that the Fund will sell a portion of an investment at an amount different from the NAV of the investment.

If an SPV is not accounted for as an investment company, the SPV may be valued in its entirety using an income approach or a market approach. *[See Private Operating Companies for examples of valuation techniques and inputs that may apply to investments in SPVs.]* In certain instances, an SPV may be valued based on an evaluation of the net assets of the SPV, whereby the assets and liabilities of the SPV are valued based on each underlying investment within the SPV, incorporating valuations that consider financing and sales transactions with third parties, expected cash flows, and market-based information including comparable transactions and performance multiples, among other factors.

SPVs are generally categorized in Level 3 of the fair value hierarchy. *[Note: This does not apply to investments in SPVs valued using NAV as a practical expedient.]*

Contingent consideration

[If applicable:] The Fund recognizes contingent consideration from the sale of liquidated investments as an investment measured at fair value. *[Describe the valuation inputs and techniques used to measure contingent consideration recognized as an investment.]*

AAG-INV 7.189

Income taxes

[The following example includes required disclosures when a fund has incurred a liability for unrecognized tax benefits. A fund may tailor its disclosures where appropriate if it has not incurred a liability for unrecognized tax benefits.]

The Fund does not record a provision for U.S. federal, state, or local income taxes, because the partners report their share of the Fund's income or loss on their income tax returns. *[If applicable:]* However, certain U.S. dividend income and interest income may be subject to a maximum 30% withholding tax for limited partners that are foreign entities or foreign individuals. *[If applicable:]* Further, certain non-U.S. dividend income and interest income may be subject to a tax at prevailing treaty or standard withholding rates with the applicable country or local jurisdiction. The Fund files an income tax return in the U.S. federal jurisdiction and may file income tax returns in various U.S. states *[If applicable:]* and foreign jurisdictions. Generally, the Fund is subject to income tax examinations by *[Federal]* *[Foreign jurisdictions]* for years after 20XX.

ASC 740-10-50-15(e)

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

[See Appendix E for additional accounting policy language when a Fund has consolidated tax blocker entities.]

The Fund is required to determine whether its tax positions are more likely than not to be sustained upon examination by the applicable taxing authority based on the technical merits of the position.

Tax positions not deemed to meet a more likely than not threshold would be recorded as a tax expense in the current year.

At December 31, 20XX, the Fund recorded a liability for unrecognized tax benefits of \$XXX,000 related to its tax positions. *[Include a description of the uncertainty in tax positions, for example, investment gains from certain foreign jurisdictions where the Fund has elected not to file an income tax return.]*

[The following are examples that may apply to the Fund's assessment of possible changes in unrecognized tax benefits over the next 12 months:]

ASC 740-10-50-15(d)

The Fund has determined that it is reasonably possible that the total amount of the unrecognized tax benefits will *[increase] [decrease]* by approximately *[Include an amount or a range of the reasonably possible changes in unrecognized tax benefits]* within the next 12 months as a result of *[Describe the nature of events that can cause a significant change in unrecognized tax benefits, including, but not limited to, settlements, expiration of statutes of limitations, changes in tax law, and new authoritative rulings].*

The Fund has determined that it is reasonably possible that the total amount of the unrecognized tax benefits will *[increase] [decrease]* within the next 12 months as a result of *[Describe the nature of events that can cause a significant change in unrecognized tax benefits, including, but not limited to, settlements, expiration of statutes of limitations, changes in tax law, and new authoritative rulings].* Until formal resolutions are reached between the Fund and tax authorities, the amount of a possible ultimate settlement with respect to the effect on unrecognized tax benefits is not readily determinable.

The Fund does not expect that its assessment related to unrecognized tax benefits will materially change over the next 12 months. However, the Fund's conclusions may be subject to review and adjustment at a later date based on factors including, but not limited to, the nexus of income among various tax jurisdictions; compliance with U.S. federal, U.S. state, and foreign tax laws; and changes in the administrative practices and precedents of the relevant taxing authorities.

ASC 740-10-50-15(c), ASC 740-10-50-19

The Fund recognizes interest and penalties related to unrecognized tax benefits in interest expense and other expenses, respectively. During the year ended December 31, 20XX, the Fund recognized \$XX,XXX and \$XXX,XXX, respectively, related to interest and penalties. At December 31, 20XX, the Fund accrued \$XX,XXX and \$XX,XXX, respectively, for the payment of interest and penalties.

[The Bipartisan Budget Act of 2015 (the Budget Act) provides for assessment and collection of imputed underpayment of tax, interest and penalties at the partnership level. A fund that is subject to imputed underpayments at the partnership level under the Budget Act collection mechanism should consider appropriate disclosures of its partnership status under the tax law (e.g. the existence of the collection mechanism and the fund's ability to elect out or make a 'push-out election') and potential partner obligations resulting from imputed underpayments.]

If a fund is able to make a push-out election, it should consider disclosing the status of tax audits and its assessment of its partners' potential obligations.

If a fund is unable to make the push-out election or has forfeited its right to make the election, the recognition and disclosure guidance under ASC Topic 450, Contingencies, would apply.]

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

2. Summary of significant accounting policies (continued)

ASC 720-15-25-1
ATQA 4110.01

Organization costs

Organization costs are expensed as incurred.

Syndication costs

Syndication costs represent costs incurred in connection with the syndication of limited partnership interests. These costs are reflected as a direct reduction of partners' capital. Approximately \$150,000 was incurred for syndication costs in the initial year of the Fund.

Due diligence costs and broken deal costs

Costs and expenses incurred related to sourcing, investigating, identifying, analyzing, and pursuing potential portfolio investments are expensed as incurred, with amounts included in due diligence costs and broken deal costs in the statement of operations.

Recent accounting standards

[The following are examples of recent accounting standards. These examples are not inclusive of all recent accounting standards that may apply to a fund. In addition, the content of the disclosures may vary between funds, depending on the effective date of adoption, the transition method applied for a change in accounting principle, and the effects of the change on the financial statements, including any changes to prior-period information as a result of retrospective application. In addition, ASC Topic 250, Accounting Changes and Error Corrections, includes accounting and disclosure guidance when a change in accounting principle is required by a newly issued Codification update.]

ASC 250-10-50-1

[Non-public entities are only required to disclose a change in accounting principle in the period of adoption. Disclosure of accounting standards that will become effective in future periods is optional.]

In December 2023, the FASB issued ASU 2023-09, *Income Taxes (Topic 740): Improvements to Income Tax Disclosures*. The ASU requires the annual financial statements to include income taxes paid disaggregated by jurisdiction. ASU 2023-09 is effective for the Fund's annual reporting periods beginning after December 15, 2025. Adoption is either with a prospective method or a fully retrospective method of transition. Early adoption is permitted. The Fund is currently evaluating the effect that adoption of ASU 2023-09 will have on its financial statements.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

3. Fair value measurements

Fair value hierarchy

The Fund's assets recorded at fair value have been categorized based on a fair value hierarchy as described in the Fund's significant accounting policies in note 2. The following table presents information about the Fund's assets measured at fair value as of December 31, 20XX:

(in thousands)	Level 1	Level 2	Level 3 ⁽¹⁾	Total
Investments, at fair value				
Common stock	\$270,500	\$—	\$85,500	\$356,000
Preferred stock	—	—	389,090	389,090
Notes	—	—	20,000	20,000
Warrants	—	—	4,250	4,250
Contingent consideration	—	—	100	100
Total investments, at fair value	\$270,500	\$—	\$498,940	\$769,440
Crypto assets, at fair value				
Cryptocurrencies	\$11,200	—	—	\$11,200

⁽¹⁾ The number of classes may need to be greater for fair value measurements categorized within Level 3 of the fair value hierarchy, because those measurements have a greater degree of uncertainty and subjectivity. Determining appropriate classes of assets and liabilities for which disclosures about fair value measurements should be provided requires judgment. See Appendix A for sample disclosures if the Fund had investments in private investment companies.

Contractual sale restrictions

[For investment companies, adoption of ASU 2022-03 should only be applied prospectively to restrictions that are entered into or modified on or after the date of adoption. If a fund's previous accounting policy prior to this ASU's adoption was to apply a discount for contractual sale restrictions, that previous accounting policy should be applied until the restriction expires or is modified. In cases where a discount continues to be applied, those funds should also disclose the following:]

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

3. Fair value measurements (continued)

The Fund adopted the amendments in ASU 2022-03, Fair Value Measurement (Topic 820): Fair Value Measurement of Equity Securities Subject to Contractual Sale Restrictions, as of *[Month, Day]*, 20XX. The ASU applies to investment companies prospectively for new contractual restrictions. As such, contractual sale restrictions on the sale of an equity security that have been entered into on or after the date of adoption are not considered in measuring the fair value of the equity security, however the Fund's preexisting accounting policy remains in effect with regard to any contractual sale restrictions entered into prior to the date of adoption ("preexisting contractual sale restrictions") unless modified on or after the date of adoption.

[The following paragraphs are examples of two different potentially applicable required disclosures under this guidance. The first paragraph addresses disclosures relevant to equity securities where a discount continues to be applied as the contractual sale restriction existed prior to the date of adoption. The second paragraph addresses disclosures relevant to all equity securities subject to contractual sale restrictions regardless of accounting treatment:]

ASC 820-10-65-13(d)

As of December 31, 20XX, the Fund held equity securities subject to preexisting contractual sale restrictions resulting from *[Management should disclose the nature of the restriction]* with a fair value of \$XX,XXX for which the Fund continues to apply a discount. The preexisting contractual sale restriction is set to expire on June 30, 20XX. *[Management should also disclose the circumstances, if any, that could cause a lapse in the restriction(s).]*

ASC 820-10-50-6B

As of December 31, 20XX, the Fund held equity securities subject to contractual sale restrictions resulting from *[Management should disclose the nature and remaining duration of the restriction]* with a fair value of \$XX,XXX, that were executed or modified subsequent to adoption. The contractual sale restriction is set to expire on June 30, 20XX. *[Management should disclose the circumstances, if any, that could cause a lapse in the restriction(s). Additionally, if a fund has multiple investments in equity securities subject to contractual sale restrictions, the entity shall consider the disaggregated disclosure guidance in ASC 820-10-50-1D when making its disclosures.]*

ASC 820-10-50-2G

Changes in Level 3 measurements

The following table presents changes in assets classified in Level 3 of the fair value hierarchy during the year ended December 31, 20XX attributable to the following:

(in thousands)	Common stock	Preferred stock	Notes	Warrants
Purchases	\$1,200	\$12,000	\$15,000	\$1,100
Transfers into Level 3	—	—	—	—
Transfers out of Level 3	—	—	—	—

Transfers between Levels 3 and *[1][2] [relate to when an investment becomes quoted in an active market, which the Fund has the ability to access] [relate to when the liquidity restrictions are reduced or eliminated].*

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

3. Fair value measurements (continued)

Significant unobservable inputs

The following table summarizes the valuation techniques and significant unobservable inputs used for the Fund's investments that are categorized in Level 3 of the fair value hierarchy as of December 31, 20XX:

(In thousands)	Fair Value at December 31, 20XX	Valuation Technique	Unobservable inputs	Range of Inputs (weighted average)*
Assets				
Investments, at fair value				
Equity securities (common stock and preferred stock)	\$213,290	Discounted cash flow model	Terminal value growth rate	X%-X%(X%)
			Discount rate/ weighted average cost of capital	X%-X%(X%)
	120,000	Market comparable companies	EBITDA valuation multiples	X-X(X)
			Last 12 months revenue multiples	X-X(X)
			Discounts for lack of marketability	X%-X%(X%)
Contingent consideration	100	Discounted cash flow model	Probability of success	X%-X%(X%)
			Discount rates	X%-X%(X%)
Notes	12,000	Discounted cash flow model	Discount rates	X%-X%(X%)
	8,000	Market comparable companies	Discount margin	X%-X%(X%)
			Market yield/yield to maturity	X%-X%(X%)
			Discounts for lack of marketability	X%-X%(X%)
Warrants	4,250	Option pricing model	Industry volatility	X%-X%(X%)
			Estimated time to exit	X-X months (X months)

*[*Note: To satisfy the requirement to provide quantitative information about significant unobservable inputs used for Level 3 fair value measurements, a fund may disclose either or both the range and/or the weighted average of significant unobservable inputs used to develop Level 3 fair value measurements by class, or disclose the quantitative significant unobservable inputs for each individual Level 3 fair value measurement.]*

ASC 820-10-50-2(bbb)

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

3. Fair value measurements (continued)

[If a portion of Level 3 investments was not valued using internally developed unobservable inputs, include language to reconcile the difference, such as the following, if not included in the preceding table:] Certain of the Fund's Level 3 investments have been valued using unadjusted inputs that have not been internally developed by the Fund, including third-party transactions and quotations. As a result, fair value assets of approximately \$141,300,000 have been excluded from the preceding table.

[Consider using this language when there is no disclosure of any unobservable inputs (and no table):] The Fund's Level 3 investments of approximately \$XXX as of December 31, 20XX have been valued using unadjusted inputs that have not been internally developed by the Fund, including third-party transactions and quotations. As a result, the Fund has excluded disclosure of the significant unobservable inputs to these prices because they were not internally developed by the Fund.

ASC 820-10-50-2(bbb)

Change in valuation technique

[Example disclosure of a change in either or both a valuation approach and a valuation technique for measurements categorized in Level 2 and 3 of the fair value hierarchy:] During the year ended December 31, 20XX, the Fund changed the valuation technique used to value *[Describe the class to which the change in valuation approach or valuation technique applies]* from *[Describe the previous valuation approach and/or valuation technique]* to *[Describe the change in valuation approach and/or valuation technique, including the use of an additional valuation technique]*.

The Fund believes the change in valuation technique and its application results in a measurement that is equally or more representative of the fair value in the circumstances because of *[Disclose the reasons for the change in valuation approach or valuation technique, which may result from events such as development of new markets, new information becomes available, information previously used is no longer available, valuation techniques improve, or changes in market conditions]*. *[If the change in valuation approach or technique affects only a portion of a class, consider presenting the amount, as of the reporting date, of the portion affected by the change.]*

Private Equity, L.P.

4. Measurement of in-scope crypto assets

ASC 350-60-50-1

The Fund holds investments in crypto assets that are within the scope of ASC 350-60 (in-scope crypto assets). These assets are recorded at fair value. The Fund's significant in-scope crypto assets, which are determined to be those that represent more than 5% of the Fund's net assets, are disclosed in the Condensed Schedule of Investments.

(The following alternative presentation is applicable if the Fund does not elect to present the cost and fair value of each significant in-scope crypto asset on the Condensed Schedule of Investments (CSOI):)

The Fund holds investments in crypto assets that are within the scope of ASC 350-60. These assets are recorded at fair value. The following table provides a disaggregation of these assets, presenting the cost basis and fair value for each holding:

In-Scope Crypto Asset	Cost Basis		Fair Value	
Cryptocurrency A- 1,200 units	\$	5,000,000	\$	6,000,000
Other		5,000,000		5,200,000
Total In-Scope Crypto Assets	\$	10,000,000	\$	11,200,000

ASC 350-60-50-6, 50-7

[If applicable, the fund shall disclose in-scope crypto assets that are subject to contractual sale restrictions including their fair value, nature and duration of the restriction(s) and circumstances that could cause the restriction(s) to lapse]

ASC 350-60-50-3

[At annual reporting periods, an entity shall provide a reconciliation in the aggregate of activity from the opening to the closing balances of in-scope crypto assets] For the year ended December 31, 20XX, the Fund recognized gains and losses on the sale of in-scope crypto assets, which are included in "Net realized gain (loss) on investments" in the Statement of Operations. The Fund uses the specific identification method to determine the cost basis of the in-scope crypto assets relieved upon sale. The table below presents a reconciliation of the opening and closing balances of the Fund's in-scope crypto assets held during the year:

	Units		Fair Value	
Beginning balance at January 1, 20XX	100	\$		800,000
Purchases	2,400	\$		12,000,000
Sale proceeds	(150)			(2,000,000)
Net realized gain (loss)				150,000
Net change in unrealized gain				250,000
Ending balance at December 31, 20XX	\$	2,350	\$	11,200,000

ASC 350-60-50-4

Additions are the result of *[description of the nature of activities - if applicable: purchases, receipts from customers, or mining activities, air drops, non cash transfers]* while dispositions are the result of *[description of the nature of activities - if applicable: sales, or use as payment for services, non cash transfers]*. For the year-ended December 31, 20XX, the Fund recognized net realized gains of \$150,000, which represents the net of cumulative realized gains of \$165,000 and cumulative realized losses of \$15,000.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

5. Due from cryptocurrency exchanges

The Fund custodies crypto assets with *[include custodian of the investment company:]* (the Custodian) for which qualified custody is available. *[If a Fund has self-custody of private keys for its crypto assets wallets, the disclosure should be tailored to address ASC 275 risks and uncertainties disclosures particular to self-custody of crypto assets.]* The Fund is subject to counterparty risk with cryptocurrency exchanges and custodians with whom it enters into cryptocurrency transactions. A significant concentration of the Fund's cryptocurrency assets may be held by a single custodian or in a single location, making them vulnerable to losses due to hacking, password loss, compromised access credentials, malware, or cyberattacks. While the Custodian maintains insurance policies related to loss and theft of crypto assets, the Fund is subject to risk to the extent that losses exceed the coverage amounts. As of December 31, 20XX, all of the Fund's investments in crypto assets are held by the Custodian.

ASC 825-10-50-20

[If applicable] Due from cryptocurrency exchanges includes funds held at crypto asset exchanges which amounts to \$92,000 as of December 31, 20XX. Amounts held in custody of crypto asset exchanges are not insured.

ASC 825-10-50-21

6. Concentration of credit risk

The Fund is subject to credit risk to the extent any financial institution with which it conducts business is unable to fulfill contracted obligations on its behalf. Management monitors the financial condition of those financial institutions and does not anticipate any losses from these counterparties.

ASC 815-10-50-1A,
ASC 815-10-50-5

7. Warrants

The Fund may receive warrants from portfolio companies upon an investment in the debt or equity of a portfolio company. The warrants provide the Fund with exposure to and potential gains upon equity appreciation of the portfolio company's share price.

The value of a warrant has two components: time value and intrinsic value. A warrant has a limited life and expires on a certain date. As the expiration date of a warrant approaches, the time value of a warrant will decline. In addition, if the stock underlying the warrant declines in price, the intrinsic value of an in-the-money warrant will decline. Further, if the price of the stock underlying the warrant does not exceed the strike price of the warrant on the expiration date, the warrant will expire worthless. As a result, the Fund could potentially lose its entire investment in a warrant.

The Fund is exposed to counterparty risk from the potential failure of an issuer of warrants to settle its exercised warrants. The maximum risk of loss from counterparty risk to the Fund is the fair value of the contracts. The Fund considers the effects of counterparty risk when determining the fair value of its investments in warrants. See Note 2 for additional information about warrant contracts, including information about realized and unrealized gains and losses. *[Entities should consider the need for disclosure of the volume of warrant activity in accordance with ASC Section 815-10-50.]*

8. Escrow proceeds receivable

During 20XX, the Fund completed the sale of its investment in *[insert company name(s)]*. A portion of proceeds from the sale of the portfolio company is held in escrow as recourse for indemnity claims that may arise under the sale agreement. Amounts held in escrow are held at estimated realizable value and included in net realized gain on investments. As of December 31, 20XX, the carrying amount of escrow proceeds receivable is \$XX,000.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

9. Contingent consideration

Contingent consideration refers to additional amounts from liquidated investments that management believes may be realized at future dates and/or as future events occur. The terms of these milestones are generally defined in the sales/liquidation agreements of the liquidated investment.

The amount of the actual milestone payments ultimately received by the Fund may vary depending on whether the future milestone events occur. *[If milestones are significant, consider disclosing key provisions, including amounts and dates expected as well as probability of receipt.]*

10. Line of credit

[If applicable:] On December XX, 20XX, the Fund entered into a line of credit agreement with *[insert bank name]*, which provides a \$XX million credit facility for the Fund and expires on *[Date, Year]*. The line of credit is collateralized by certain assets of the Fund. On December XX, 20XX, the Fund drew down \$XX million under this line of credit and repaid the \$XX million on January XX, 20XX. Interest accrues at X.X% per annum.

[If applicable:] On December XX, 20XX, the Fund entered into a \$XX million promissory note and security agreement (the Note) with an unrelated third party to provide short-term liquidity. The Note is secured by certain investments of the Fund and is due on *[insert date]*. Interest accrues at X.X% per annum. At December 31, 20XX, the amount of the Note was \$XXX,XXX.

ASC 450-20-50-4

11. Commitments and contingencies

[The following disclosures are examples of long-term commitments and contingencies, which may occur for an investment company. The appropriate disclosures to be included should be tailored based on the facts and circumstances of the Fund:]

[If applicable:] In the normal course of business, the Fund has been named as a defendant in various matters. Management of the Fund, after consultation with legal counsel, believes that the resolution of these matters will not have a material adverse effect on the financial condition and results of operations or cash flows of the Fund.

ASC 460-10-50-4

[If applicable:] The Fund has provided general indemnifications to the General Partner, any affiliate of the General Partner, and any person acting on behalf of the General Partner or that affiliate when they act, in good faith, in the best interest of the Fund. The Fund is unable to develop an estimate of the maximum potential amount of future payments that could potentially result from any hypothetical future claim but expects the risk of having to make any payments under these general business indemnifications to be remote.

ASC 440-10-50-1(f)

[If applicable:] As of December 31, 20XX, the Fund is subject to the following commitments:

* Investment 1: Per the (Investment 1 name) Series B Preferred Stock Purchase Agreement, the Fund may be obligated to fund an additional \$XX,XXX,000 contingent on the company achieving certain milestones.

* Investment 2: Per the (Investment 2 name) Series Seed Preferred Stock Purchase Agreement, the Fund may be obligated to fund an additional \$XX,XXX,000, subject to certain closing conditions.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

11. Commitments and contingencies (continued)

ASC 946-20-50-15

[If applicable:] The Fund provides financial support to its investees *[Note: Examples of financial support to investees may include loans, capital commitments, and guarantees. This can also include situations in which the Fund assisted an investee in obtaining financial support. This disclosure is not intended to include financial transactions entered into with an investee with the primary objective of obtaining returns from capital appreciation or investment income.]* in the normal course of executing its investment strategies.

ASC 946-20-50-15
ASC 946-20-50-16

Financial support the Fund either provided to investees during the year ended December 31, 20XX or will be contractually required to provide to investees subsequent to December 31, 20XX is as follows:

Type	Amounts provided in the current period		Amounts contractually required but not yet provided	Reasons for providing support
	Amounts contractually required	Amounts not contractually required		
<i>[Describe the type of financial support]</i>	\$—	\$—	\$—	<i>[Describe the primary reasons for providing financial support]</i>
<i>[Describe the type of financial support]</i>	\$—	\$—	\$—	<i>[Describe the primary reasons for providing financial support]</i>

ASC 505-10-50-3

12. Partners' capital

[The following disclosures are examples of the pertinent rights and privileges of the Fund's capital structure. These disclosures should be tailored to reflect the provisions in the Fund's legal documents:]

ASC 946-205-50-25

Committed capital

At December 31, 20XX, the Fund has total commitments of \$XXX,XXX,XXX of which \$XXX,XXX,XXX is committed by the limited partners. The General Partner may call capital up to the amount of unfunded commitments to enable the Fund to make investments, pay fees and expenses, or provide reserves. No limited partner is required to fund an amount in excess of its unfunded commitment. At December 31, 20XX, the Fund's unfunded commitments amounted to \$XXX,XXX,XXX, of which \$XXX,XXX,XXX is unfunded from the limited partners. The ratio of total contributed capital to total committed capital is X.X%.

Capital contributions

Capital contributions are due from the partners within 10 business days of advance notice from the General Partner and are subject to certain limitations. Capital contributions receivable represents capital calls that were past due as of December 31, 20XX, but for which the Fund *[received payment in Month Year OR believes there is substantial evidence of ability and intent to pay within a reasonably short period of time after the reporting date]*. The Fund has certain remedies available for defaulting partners.

[If applicable:] Limited partners have committed capital to the Fund. If capital calls are not timely funded, the Fund may be unable to successfully carry out its investment operations.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

ASC 946-20-50-5

12. Partners' capital (continued)

[If applicable:] Certain amounts of the General Partner's capital contributions may be deemed to have been satisfied by applying a cashless contribution to the General Partner, and as such, the actual amount of the General Partner's cash contributions may be less than its pro rata capital commitment amount.

[If applicable:] The Fund may, in its sole discretion, accept securities, crypto assets and other non-monetary assets as an "in-kind contribution" in lieu of, or in addition to, cash, to satisfy capital commitments. Both the asset received and the contribution of equity are recorded at fair value *[Describe if in-kind contributions are recorded based on the fair value as of the date of the contribution or at a different amount as permitted by the Limited Partnership Agreement and agreed upon between the limited partner and the Fund, and if applicable, describe the accounting for any differences between the fair value of the in-kind distribution and the amount recorded as the capital contribution from the limited partner]*.

[If applicable:] For the year ended December 31, 20XX, the Fund accepted in-kind contributions of \$X,XXX,000 in the form of *[Describe type of in-kind consideration received, such as securities or crypto assets]*.

ASC 946-20-25-7

Allocation of partnership profits and losses

Net investment income or loss, net realized gain or loss, and change in unrealized gain or loss on investments are allocated to the partners pro rata in proportion to their respective capital contributions; however, the limited partners' allocation of profits and losses is divided between the limited partners and the General Partner as follows:

- I. 100% to all partners until all the partners have received an amount equal to the capital contributed
- II. 100% to limited partners until the limited partners have received an aggregate amount equal to an 8% cumulative internal rate of return, compounded annually, on the outstanding balance of the limited partners' capital contributions
- III. 100% to the General Partner until the General Partner has received 20% of the aggregate amount allocated to the limited partners pursuant to clause (II) above
- IV. Thereafter, 80% to the limited partners and 20% to the General Partner.

ASC 946-20-50-5

The allocation of profits and losses in clauses III and IV represents carried interest to the General Partner.

[If applicable:] If the balance of the General Partner's capital account has been reduced to less than 1% of the total partners' capital, an amount (the contingent loss) necessary to bring the General Partner's capital account balance to 1% of the total partners' capital will be reallocated from the capital accounts of the limited partners to the General Partner's capital account.

[If applicable:] As of December 31, 20XX, there was no contingent loss allocation.

Or:

[If applicable:] As of December 31, 20XX, a cumulative contingent loss of \$XXX,XXX has been allocated to the limited partners.

Capital distributions

[If applicable:] The Fund is required to make an annual mandatory distribution to each partner within 90 days after the end of each fiscal year to satisfy the individual partner tax liabilities generated by the Fund during the year. The General Partner, in its own discretion, may make additional distributions subject to certain restrictions.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

ASC 946-20-50-5

12. Partners' capital (continued)

Distributions are made to the partners pro rata in proportion to their respective capital contributions; however, the limited partners' shares of any distributions are divided between the limited partners and the General Partner in the same manner as the allocation of partnership profits and losses.

ATQA 6910.29

Carried interest

The capital accounts reflect the carried interest to the General Partner as if the Fund had realized all assets and settled all liabilities at the fair value reported in the financial statements and allocated all gains and losses and distributed the net assets to the partners at the reporting date consistent with the provisions of the partnership's governing documents. The carried interest to the General Partner will remain provisional until final liquidation of the Fund.

ATQA 6910.29

Clawback

[If applicable:] On termination of the Fund, if there has been any distribution of carried interest to the General Partner and if the distributions received by the limited partners have been insufficient to provide the required return of capital and preferred return, the General Partner will be obligated to return previously received carried interest payments (the "clawback") to the limited partners.

The clawback is limited to the after-tax amount of carried interest previously distributed to the General Partner.

[If applicable:] The capital accounts reflect a clawback of \$XXX,XXX to be returned to the Fund as if the Fund were to liquidate as of December 31, 20XX. The clawback will remain provisional until final liquidation of the Fund.

ASC 946-20-50-5

13. Management fee

[Please review the Fund's Agreement for the specific terms. The disclosure below is only an example:]

The Fund pays an annual management fee, calculated and payable on a quarterly basis, to the Investment Manager. The management fee is based on an annual rate of 2% of the aggregate capital commitments of the limited partners. After reaching the investment period termination date on *[Month, Date, Year]*, the management fee will be based on the amount of invested capital.

[For funds where the General Partner's requirement to fund its portion of a capital call for management fees can be reduced due to the general partner not being charged management fees, consider disclosing the relevant provisions in the Fund's Agreement and its impact, such as illustrated below. This disclosure should be appropriately tailored to reflect the Fund's specific facts and circumstances. Note: this example fact pattern has not been reflected within the included core financial statements:] To account for the fact that the Fund does not pay a management fee with respect to the General Partner's interest or contributions to the Fund (such foregone amount shall be referred to as *["Management Fee Savings"]*) without a corresponding reduction in the amount of the General Partner's contributions to the Fund, the General Partner may cause the Fund to return to the General Partner any capital contributions made by the General Partner to the Fund until, as of any time, such aggregate returns to the General Partner (such amount shall be referred to as *["Special General Partner*

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

ASC 946-20-50-5

13. Management fee (continued)

Distributions) equal the cumulative amount of *Management Fee Savings* as of such time. During the year ended December 31, 20XX, *Special General Partner Distributions* of \$XXX,XXX were recorded on the statement of changes in partners' capital and *Management Fee Savings* were \$XXX,XXX. As of December 31, 20XX, cumulative *Special General Partner Distributions* since inception is \$XXX and cumulative *Management Fee Savings* since inception is \$XXX.

From time to time, the Investment Manager, General Partner, or any affiliate of the Fund may enter into specific transactions and receive a fee for their services. A portion [XX%] of that fee is applied to reduce future management fees payable by the Fund to the Investment Manager. For the year ended December 31, 20XX, the Investment Manager earned \$XX,XXX,XXX as a result of these transactions, of which XX% has been applied as a reduction to management fee expense. For the year ended December 31, 20XX, the net management fee charged to the Fund was \$XX,XXX,XXX.

Management fee payable of \$XX,XXX,XXX represents the management fee due to the Investment Manager and is expected to be paid in *Month, Year*.

If applicable: At the discretion of the General Partner and Investment Manager, certain limited partners have special management fee arrangements.

ASC 850-10-50-1 to 3

14. Related-party transactions

The Fund considers the General Partner and the Investment Manager, their principal owners, members of management, and members of their immediate families, as well as entities under common control, to be related parties to the Fund. Amounts due from and due to related parties are generally settled in the normal course of business without formal payment terms.

If applicable: Certain limited partners are related parties of the General Partner. The aggregate value of limited partners' capital owned by related parties at December 31, 20XX is approximately \$XXX,XXX.

If applicable: Certain members of the General Partner serve as members of the boards of directors of certain investments aggregating approximately XX% of total capital in which the Fund holds investment positions.

If applicable: The Fund has amounts due from related parties for advances in the normal course of business. As of December 31, 20XX, \$XX,XXX is receivable from related parties. Amounts are noninterest bearing and are due on demand.

If applicable: Additionally, the Fund may coinvest with other entities with the same General Partner as the Fund. *If applicable:* At December 31, 20XX, the Fund held an investment with a fair value of \$XXX,XXX that was coinvested with affiliated funds. *If applicable:* At December 31, 20XX, the Fund had no investments that were coinvested with affiliated funds.

If applicable: Certain expenses of the Fund *specifically professional fees* may initially be invoiced to the Investment Manager *or General Partner* and subsequently charged to the Fund. Due to related parties reported in the statement of assets and liabilities represents these amounts payable to the Investment Manager *or General Partner* for reimbursement of those expenses.

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

ASC 850-10-50-1 to 3 14. Related-party transactions (continued)

[If applicable:] The General Partner generally allocates investments between the Fund and other entities for which it serves as the General Partner on a pro rata basis based on capital commitments. To maintain pro rata allocations, the Fund may sell securities to, or purchase securities from, these other entities. These transactions are generally executed at the closing price on the trade date, or for illiquid securities, at fair value as determined by the General Partner.

[If applicable:] During 20XX, the Fund entered into purchase and sale transactions with [Entity Name], an affiliated entity that is also managed by the General Partner. Total purchases and sales at fair value of approximately \$XXX,XXX and \$XXX,XXX, respectively, were made with this related party. Transactions with related parties resulted in net gains (losses) of \$XXX,XXX, which are included in net realized gain (loss) on investments in the statement of operations. The value of these transactions was determined using the Fund's normal investment valuation policies.

[If applicable:] The Fund is considered the continuation fund of *[Predecessor Fund]* "the Predecessor Fund". During 20XX, the General Partner of the Predecessor Fund formed the Fund to purchase the remaining investment(s) from the Predecessor Fund for \$X.XM (the "Continuation Fund Transaction"). As the Continuation Fund Transaction was not between entities that were under common control, the Fund recorded the assets received at the transaction price at the date of the transfer. *[If applicable:]* The General Partner obtained a third-party fairness opinion to provide transparency that this transaction was fair from a financial standpoint to its partners. *[If applicable:]* The formation of the Fund provided all partners of the Predecessor Fund with the opportunity to liquidate their remaining interest in the Predecessor Fund or rollover their capital into this Fund. The closing of the transaction was completed on *[Month, Date, Year]*. For partners who elected to liquidate their interest from the Predecessor Fund, a final cash distribution was made on *[Month, Date, Year]* from the Predecessor Fund. Partners who elected to roll their capital became partners in this Fund.

[A Fund is required to perform an analysis as to whether the predecessor fund and continuation fund are under common control, considering the guidance in ASC 805-50-15-6 and ASC 805-50-30-5. The above example assumes that the predecessor fund and continuation fund are determined not to be under common control. In cases where the predecessor fund and continuation fund are determined to be under common control, the continuation fund would recognize the investments at the carrying amount of those investments in the accounts of the predecessor fund as of the date of transfer. The below example can be used to describe that treatment.]

As the Continuation Fund Transaction was between entities that were under common control, the Fund recorded the assets received at their carrying amounts as recorded by the Predecessor Fund at the date of the transfer.

15. Significant risks and uncertainties

[Consider whether significant risks and uncertainties resulting from certain significant estimates or vulnerability from certain concentrations exist as of the date of the financial statements that are subject to the disclosure requirements under ASC Topic 275 if not already disclosed elsewhere in the financial statements. The appropriate disclosure should be tailored based on the facts and circumstances of the Fund.]

Private Equity, L.P.

Notes to financial statements

December 31, 20XX

ASC 946-205-45-2

16. Financial highlights

Financial highlights for the year ended December 31, 20XX are as follows:

Internal rate of return, since inception:	
Beginning of year	23.0%
End of year	18.6%

ASC 946-205-50-10 and
12 through 14

Ratios to average limited partners' capital:	
Expenses before carried interest to General Partner	2.6%
Offset expenses	(1.2%)
Carried interest to General Partner	1.1%
Expenses, including carried interest to General Partner	2.5%
Net investment loss	0.5%

[Refer to the KPMG Illustrative Financial Statements for Hedge Funds for presentation examples of financial highlights for more than one class or series of partners.]

ASC 946-205-50-4
ASC 946-205-50-15

Financial highlights are calculated for the limited partner class taken as a whole. *[If applicable:]* An individual limited partner's return and ratios may vary based on different management fee and carried interest arrangements.

ASC 946-205-50-24

The internal rate of return (IRR) of the limited partner class since inception of the Fund is net of carried interest to the general partner and computed based on the actual dates of capital contributions and distributions and the ending aggregate limited partners' capital balance (residual value).

ASC 946-205-50-13

The net investment loss ratio does not reflect the effect of carried interest to the general partner.

ASC 946-205-50-10
ASC 946-205-50-13

[For periods less than one year:] The ratios, excluding nonrecurring expenses and carried interest to the general partner, have been annualized.

ASC 855-10-50-1 and 2 17. Subsequent events

These financial statements were approved by management and available for issuance on *[Month, Date, Year]*. Subsequent events have been evaluated through this date.

[Consider if disclosure of subsequent events would be necessary to keep the financial statements from being misleading. Management should consider all events that have occurred subsequent to year end and if they are material or of importance to users of the financial statements.]

Organization

ASC 946-235-50-5(a)

[This note may be used to describe the structure of a fund of funds:] Fund of Funds, L.P. (the Fund), a Delaware investment limited partnership, commenced operations on *[Month, Date, Year]*. The Fund was organized with the objective of obtaining capital appreciation solely through investments in private equity funds. The Fund is managed by General Partner, LLC (the General Partner) and Investment Manager, LLC (the Investment Manager). *[If applicable:]* The Investment Manager is registered with the U.S. Securities and Exchange Commission as an investment adviser under the Investment Advisers Act of 1940.

[Include the following paragraph to the Private investment companies section of Fair value—Valuation techniques and inputs in note 2 if the Fund has investments that were not valued using the practical expedient:]

ASC 820-10-50-2(bbb), ASC 946-235-50-5(b)

The Fund values investments in private investment companies that do not qualify for the practical expedient based on the Fund's estimates of secondary market transactions for those investments. Those estimates are typically based on adjustments to the NAV per share (or its equivalent) using inputs such as transactions in principal-to-principal or brokered markets; benchmarks, indexes, expected returns and historical returns of comparable funds; features of the investment; expected discounted future cash flows; and overall market conditions. Investments in private investment companies that are not valued using the practical expedient are typically classified in Level 3 of the fair value hierarchy.

[Include the following paragraph as part of related-party disclosures if the Fund is invested in another investment company that is affiliated through common management and/or control.]

ASC 850-10-50-1

The Fund had an investment in Related Fund, L.P., an affiliated investment company, of approximately \$X,XXX,000, as of December 31, 20XX. *[Include a description of any liquidity provisions of the related-party fund, such as the following example:]* The Fund may redeem its investment in Related Fund, L.P. on a quarterly basis following a 30-day notice period.

The management agreement of the affiliated investment company provides for compensation to the manager in the form of fees of X.X% annually of net assets and incentive allocation or fees of XX% of net profits earned (subject to a loss carryforward). For the year ended December 31, 20XX, the Fund was charged management and incentive fees of \$XXX,000 and \$XXX,000, respectively.

and (b)
ASC 820-10-50-6A(a)
ASC 820-10-50-8

Fair value hierarchy

The Fund's assets recorded at fair value have been categorized based on a fair value hierarchy as described in the Fund's significant accounting policies in note 2. The following table presents information about the Fund's assets measured at fair value as of December 31, 20XX:

(In thousands)	Level 1	Level 2	Level 3	Investments measured at net asset value	Total
Investments, at fair value					
Private investment companies					
Buyout	\$—	\$—	\$—	72,424,000	72,424,000
Technology sector	—	—	—	93,323,000	93,323,000
Distressed investing	—	—	—	24,799,000	24,799,000
Total investments, at fair value	\$—	\$—	\$—	\$190,546,000	\$190,546,000

ASC 946-210-50-9

The following table summarizes the Fund's investments in other private investment companies as of December 31, 20XX. Other private investment companies in which the Fund invested 5% or more of its net assets, as disclosed in the condensed schedule of investments, are individually identified, while smaller investments are aggregated. The Fund's investments in private investment companies are not redeemable.

Investments in private investment companies (continued)

Condensed schedule of investments (continued)

December 31, 20XX

Other disclosures

[The following paragraph is an example of valuation processes for investments in private investment companies. This note should be tailored to describe the Fund's specific policies and procedures:]

The Fund is subject to credit risk to the extent that the investment managers of the underlying private investment companies are unable to fulfill their obligations according to their organizational documents.

The Fund, through its investments in private investment companies, is subject to risk inherent when investing in securities and private investments. In connection with its investments, the Fund is subject to the market and credit risk of those investments held or sold short by the private investment companies. Due to the nature of the Fund's investments, the risks described above are limited to the Fund's investment balances and unfunded commitments to private investment companies.

[If applicable:] At December 31, 20XX, certain investments in private investment companies were managed by the same underlying investment manager, representing approximately XX% of the Fund's *[partners' capital]* *[net assets]*.

ASC 820-10-50-6A(h)

[If applicable, additional disclosure is required if a reporting entity determines that it is probable that it will sell a group of investments, but if the individual investments have not been identified (e.g., if a reporting entity decides to sell 20% of its investments in private equity funds but the individual investments to be sold have not been identified), the reporting entity is required to disclose its plans to sell and any remaining actions required to complete the sale(s).]

[The following are example accounting policies over proceeds received from investments in private investment companies:]

The Fund allocates proceeds received from redemptions and distributions from private investment companies under the specific identification method, by following the character of the distribution that is reported by the underlying private investment company, either on the capital distribution notice or periodic statements.

[Or]

Realized gains and losses on redemptions or distributions from private investment companies are determined using an average cost basis. Specifically, the Fund relieves cost in proportion to the percentage the distribution value represents of the investment's fair value immediately prior to the distribution.

Statement of changes in partners' capital

Year ended December 31, 20XX

	General partner	Limited partners	Total
Partners' capital, beginning of year	\$75,884,000	\$682,957,000	\$758,841,000
Capital contributions	850,000	84,150,000	85,000,000
Capital distributions	(973,000)	(96,288,000)	(97,261,000)
Allocation of net income ⁽¹⁾			
Pro rata allocation	407,000	40,253,000	40,660,000
Carried interest to General Partner	8,051,000	(8,051,000)	—
Net income	8,458,000	32,202,000	40,660,000
Partners' capital, end of year	\$84,219,000	\$703,021,000	\$787,240,000

⁽¹⁾ ASC 946-205-45-5 permits nonregistered investment partnerships to combine the statement of changes in net assets with the statement of changes in partners' capital if the information in ASC 946-205-45-3 is presented. AAG-INV, Chapter 7, states that this alternative presentation may be used when the information in ASC 946-205-45-3 is presented in the financial statements and it is considered more meaningful to users of the financial statements.

See accompanying notes to the financial statements.

Appendix E

Example income tax disclosures

Year ended December 31, 20XX

[The following example includes required disclosures when a non-taxable partnership presents consolidated financial statements that include taxable blocker entities. The inclusion of taxable blocker entities in consolidated financial statements requires incremental disclosures of significant accounting policies related to income taxes as well as various additional disclosures required by ASC 740 that are generally made through a separate note as presented here. The appropriate disclosures to meet these requirements should be tailored to the entity's individual circumstances and may vary from entity to entity:]

Summary of significant accounting policies

Income taxes

[The following paragraph provides an example to be tailored as needed and added to the income tax portion of the summary of significant accounting policies disclosure to describe the applicable tax exposure for consolidated financial statements that include one or more Delaware limited liability company that has elected to be treated as a corporation:]

The Fund has set up certain wholly owned and controlled subsidiaries, Subsidiary A LLC, Subsidiary B LLC, and Subsidiary C LLC (hereafter, the "Blocker Entities") to facilitate certain investments in private operating companies. The Blocker Entities are organized as Delaware limited liability companies and have each elected to be treated as a corporation and therefore subject to applicable federal and state income taxes. Under the election of corporate tax status, the income, gains, losses, deductions and expenses of the Blocker Entities will not be passed through to the Fund. The Fund and the Blocker Entities file U.S. federal income tax returns as well as in various state and/or local jurisdictions in which they have nexus.

[The following paragraph provides an example to be tailored as needed and added to the income tax portion of the summary of significant accounting policies disclosure to describe applicable tax exposure for consolidated financial statements that include one or more foreign corporations:]

[If applicable] Certain of the Blocker Entities, including Subsidiary D, Ltd. and Subsidiary E, Ltd., are foreign corporations domiciled in **[foreign jurisdiction]** and may incur tax on income that is effectively connected with the conduct of a U.S. trade or business ("ECI"), tax on income that is Fixed or Determinable, Annual, or Periodic ("FDAP") and is from U.S. sources, and/or branch profits tax on dividend equivalents to the partners. ECI is taxed at a flat rate of 21%. FDAP income and branch profits tax on dividend equivalents are taxed at the statutory rate of 30% or a lower treaty rate, as applicable.

[The following paragraph can be added to the income tax portion of the summary of significant accounting policies disclosure to describe the accounting policy used to account for income taxes of the blocker entities:]

Income taxes are accounted for by the Blocker Entities under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Appendix E

Example income tax disclosures (continued)

Year ended December 31, 20XX

Summary of significant accounting policies (continued)

Income taxes (continued)

[The following note provides an example income tax note demonstrating required disclosures under ASC 740 when a non-taxable partnership presents consolidated financial statements that include taxable U.S. blocker entities:]

ASC 740-10-50-2
ASC 740-10-50-8
ASC 740-10-50-13

[If applicable:] As of December 31, 20XX, the Fund has a net deferred tax liability included in the consolidated statement of assets and liabilities of \$xxx relating to a gross deferred tax liability from unrealized gains on investments of \$xxx in excess of net deferred tax assets related to net operating loss carryforwards and/or capital loss carryforwards for federal and/or state income tax purposes which it expects to partially offset future taxable income and gains of \$xxx. **[Include a description of any other causes of the deferred tax assets or liabilities].**

The following table presents information about the gross deferred tax liability of the Blocker Entities as of December 31, 20XX:

Deferred tax liability, beginning of year	\$ XXX
Net change in deferred tax liability	XXX
Deferred tax liability, end of year	\$ XXX

ASC 740-10-50-2

The following table presents information about the deferred tax asset of the Blocker Entities as of December 31, 20XX:

Gross deferred tax asset	\$ XXX
Less: valuation allowance	XXX
Net deferred tax asset	\$ XXX

The net change in the total valuation allowance for the year ended December 31, 20XX was an increase of \$XXX.

ASC 740-10-50-3

The valuation allowance at December 31, 20XX was primarily related to federal and/or state net operating loss carryforwards and/or capital loss carryforwards that, in the judgment of management, are not more-likely-than-not to be realized. In assessing the realizability of deferred tax assets, management considers whether it is more-likely-than-not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities (including the impact of available carryback and carryforward periods), projected future taxable income, and tax-planning strategies in making this assessment. In order to fully realize the deferred tax asset, the Blocker Entities will need to generate future taxable income of approximately \$XXX prior to the expiration of the net operating loss carryforwards and/or capital loss carryforwards in 20XX. Based upon the projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more-likely-than-not that the Fund will realize the benefits of these deductible differences, net of the existing valuation allowances at December 31, 20XX. The amount of the deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carryforward period are reduced.

Appendix E

Example income tax disclosures (continued)

Year ended December 31, 20XX

Summary of significant accounting policies (continued)

Income taxes (continued)

ASC 740-10-50-9

The following table presents information about the current and deferred portions of the Blocker Entities' income tax expense included in the consolidated statement of operations for the year ended December 31, 20XX:

	Current	Deferred	Total
Federal	\$ XXX	\$ XXX	\$ XXX
State	XXX	XXX	XXX
Net income tax expense	\$ XXX	\$ XXX	\$ XXX

ASC 946-220-45-4,
ASC 946-220-45-6,
and
ASC 946-740-35-1

The above amounts reflect the net change in deferred tax liabilities related to unrealized gains on investments held by the Blocker Entities. These amounts have been recorded on the consolidated statement of operations within net change in unrealized gain from investments as a reduction to the gross change in unrealized gain from investments.
