

KPMG Renewable and Emerging Energies Practice

The clear advantages of bringing KPMG along on your journey

The Emerging Energy Landscape

The emerging global energy landscape is driven by the need to enhance energy efficiency, resiliency, and security. Global interest in reducing carbon emissions continues to climb in parallel. Our team and our firm believe strongly in an “all of the above” approach wherein energy industry incumbents and newcomers are scaling proven solutions and introducing innovative technologies. As industry leaders, we look forward to supporting your business as you scale and evolve to push the envelope of energy.

A dedicated team professionals

With thousands of energy focused professionals nationally, we place a strategic priority on clients like you. Our professionals share your passion and entrepreneurial spirit and are trained specifically to understand the unique challenges of your venture.

Ready to serve your evolving needs

Different needs arise at each milestone in the development of energy solutions. Our services are structured to help you proactively address each step along the way.

We will coordinate services for efficient delivery

Our approach includes a primary point of contact to proactively coordinate our Audit, Tax, and Advisory teams. Our cross-functional teams work together to provide efficiency and holistic guidance.

Call us when you need us

Dynamic energy solutions require companies to be nimble as business challenges arise. To meet this need, we provide flexible, on-call access to experienced professionals for questions regarding financial reporting matters, such as revenue recognition, accounting for stock based compensation, and accounting for significant non-routine transactions. We are also available through tax implications real time and planning for potential opportunities.

Who else can we call for you?

Through our energy practice, you have access to our vast network of industry professionals. Whether you need support on a business issue, planning and structuring a transaction, introduction to investors, or help identifying top talent, our network is available to offer insights and support your goals.

We will listen to you

We customize our service methodology to meet the specific needs of renewable energy companies. This results in more efficient, higher quality engagements.

Global perspectives, local resources

With access to over 230,000 professionals in 145 countries worldwide through our network of member firms, we offer global resources and local perspectives wherever you need us.

Renewable and emerging energies practice

Our services

Audit

With deep industry-specific knowledge and experience, KPMG has an understanding of your business that provides you with a quality audit and insight. And together, they give you the ability to effectively navigate change, manage risk, and move forward with clarity.

Tax

To simplify increasing complexity and meet new challenges, many organizations are seeking tax services that can help navigate existing and changing needs—the type of services delivered by the Tax professionals at KPMG.

- Tax credit structuring strategy & credit eligibility optimization
- Domestic content documentation, cost-segregation & project tax-credit eligibility analysis
- Prevailing Wage and Apprenticeship (PWA) and Davis Bacon Compliance
- Tax equity financing, renewable asset valuation, and basis optimization
- Planning for credit transferability, including documentation, assistance with registration and readiness assessments for sellers of credits

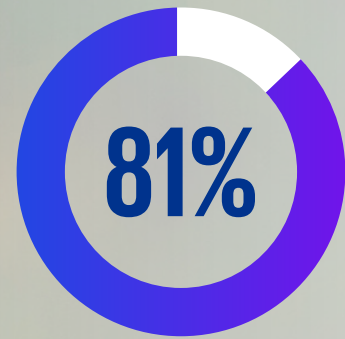

Advisory

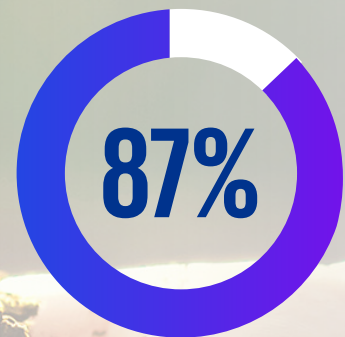

We offer industry specific financial, transactional, and technical experience in areas including management consulting, risk consulting, and deal advisory to help you enhance your organization's financial performance and reporting, regulatory compliance, and business value creation.

- IPO advisory services—accounting and reporting and SOX
- Technical accounting
- Acquisition due diligence including quality of earnings (QofE)
- Capital projects—strategy, finance, major projects and governance
- Structured finance, securitization strategies & capital market reporting compliance

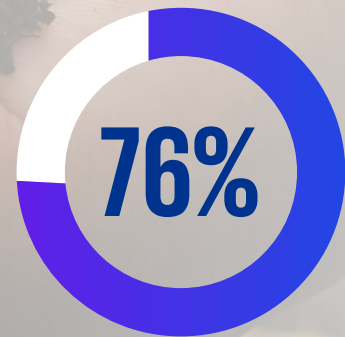

We provide professional services to

of F1000 energy companies

of F1000 power and utility companies

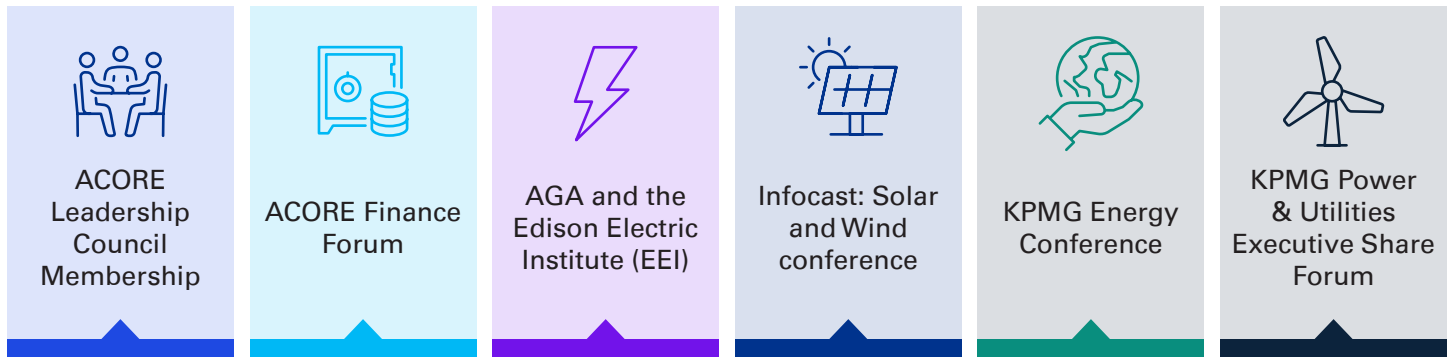

of F1000 natural resource companies

A commitment to renewable energy

As a leading adviser to the energy industry, we believe it is our role to support our communities with forward-looking insights and perspectives. KPMG's prominent role in the marketplace enables us to keep our clients abreast of emerging trends, new regulations, and other important market dynamics. The following are examples of the leading organizations we sponsor and the programs, events, and publications we produce.

Industry involvement

Why KPMG?

Amid booming demand for energy, KPMG is at the forefront of helping organizations navigate new energy development and energy efficiency. With an industry-based structure, we bring together versatile, multidisciplinary teams comprising audit, advisory and tax professionals who have the precise skill sets needed to serve the sector as it grows and matures. This approach gives us a broader view to look at challenges and opportunities from falling renewable costs, innovative new technologies, changing asset valuations, pressure on suppliers, and more. We look forward to speaking with you about the future of the energy industry and your important role in it.

We are thought leaders

The adoption of wind, solar and other renewables is accelerating as costs fall, reliability increases, and global interest in reducing carbon emissions continues to climb. Capacity is increasing, but not fast enough. Our team and our firm believe strongly in the future of renewable energy, and as industry leaders, we share our knowledge around the world and across sectors.
