## The shift towards digital tax is happening now. Are you ready to begin your journey?

Growing amounts of data, continuous regulatory changes, reporting complexities, and digitization are putting pressure on tax leaders across all areas of tax.

### Data access, quality, and management present major challenges for tax professionals.

One of the biggest obstacles for tax leaders when collecting data is the collation of information from multiple data sources for tax calculations and reporting. Data often resides across varying systems, and locating and accessing the correct information can be challenging. Furthermore, this process is manual, which can lead to potential errors, lack of control, and security vulnerabilities. Due to complexities and strict regulations related to tax, ERP systems struggle to provide organizations with the necessary tools for their direct and indirect tax needs.

### Tax authorities and governments are already going digital.

Tax authorities and governments are embracing technologies including GenAI to improve their ability to access data and information. They are leveraging powerful analytics and AI algorithms to integrate information and understand reporting. This new level of scrutiny requires tax leaders to reevaluate their tax strategies, invest in new technologies to keep pace.

### Investing in innovative tax tools and technologies can help tax leaders to address their tax needs.

Over the past decade, there have been incremental steps towards tax digitization with the emergence of self-service tools but amidst the technology evolution, there is a huge opportunity for tax leaders to harness the value of digital technologies by taking advantage of their capabilities in data management, analytics, automation, and intelligence they can bring to tax. The growing availability of APIs drives innovation and offers the flexibility to customize technology solutions to meet specific business needs. APIs enable companies to integrate best-in-class applications into existing systems, creating a tailored technology ecosystem that supports strategic objectives.

**With connected thinking, KPMG LLP and Thomson Reuters are helping organizations Digitize Tax.**

## We are business-led, technology-enabled, data-driven

In the complex and fast-moving world of tax and digitization, staying ahead requires more than just keeping up with changes - it requires foresight, agility, and most importantly, a partner who can navigate the complexities alongside you. That's why KPMG is dedicated to being the leading implementers for Thomson Reuters' next-generation suite of products. These innovative solutions provide significant benefits for both direct and indirect tax processes, allowing businesses to streamline operations, increase efficiency and enhance automation.

It's the combination of our tax technical expertise, industry experience, specialized data strategy, and market-leading technology knowledge of the ONESOURCE technology platform from Thomson Reuters that sets this relationship apart.

Through connected thinking, we help our clients to rethink and customize their tax strategy, redefine their processes, provide the right tools to empower the people, and implement the Thomson Reuters technology platform with the out-of-the-box functionality, supported by APIs customized to meet their exact tax needs.

**This agile, scalable approach will not only help prepare the tax function for the future but enable organizations to take advantage of the immediate benefits today.**

### The connected thinking approach

KPMG can help organizations Rethink Tax.

## An environment for continuous innovation and ongoing support

Our commitment to your success extends beyond implementation. We provide ongoing support and advice to help you adapt to changes and continuously optimize your tax operations. Investing in the next generation of solutions will prepare you for long-term success, allowing you to adapt quickly as the technology and tools advance. As our client, we welcome you to join us in our transformation roadmap so that you can take advantage of the latest technologies.

**As your implementation partner, we can help you harness maximum value from the platform.**

### KPMG teams with Thomson Reuters

With KPMG, you're not just adopting new technology - we are committed to transforming your tax operations. Together with Thomson Reuters, we're redefining the future of tax technology.

**Take the first step towards a more efficient and strategic tax function.
