

Tariff Refund and Post-Summary Correction Filing

**Unlock speed, accuracy, and savings with
data-driven tariff recovery services**

Many importers are discovering significant opportunities to recover overpaid tariffs through post summary corrections (PSCs). Traditionally, this process is manual, slow, and costly—original entry filers can charge companies a per amendment cost as high, or higher, than the consumption entry fee, and process each one individually, resulting in long delays, especially for companies with thousands of entries with refund opportunities.

**Tariff refund management:
Technology-enabled efficiency**

KPMG has developed a technology-enabled tool that transforms the burdensome tariff refund process. Leveraging Digital Gateway, the KPMG proprietary tax planning, reporting, and compliance portal, we automate the filing of PSCs directly with US Customs and Border Protection (CBP), eliminating manual data entry and dramatically increasing speed, accuracy, and compliance.

Key benefits:

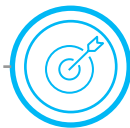

Acceleration:

Process thousands of amendments more efficiently—recently, KPMG processed 28,000 amendments for a leading automotive client faster than traditional non-automated filing methods enabling reimbursement quicker and easier than conventional methods.

Cost efficiency:

Our automated process reduces traditional third-party fees dramatically (over 30 percent in many cases), and includes flexible pricing options such as fixed and/or contingent fee arrangements.

Accuracy and compliance:

Our quality checks, data management, and experienced team provides high-quality filings, reducing compliance risk and increasing refund opportunities.

Strategic support:

Beyond filing, our team uses the KPMG Tariff Modeler to identify refund opportunities and provide tariff modeling to improve your tariff recovery strategy.

Ideal for high-volume importers

Our service is especially valuable for companies in automotive, aerospace and defense, manufacturing, oil and gas, technology, semiconductor, chemicals, and other sectors with large volumes of import transactions. Whether you know where the refund opportunities are or need help identifying them, KPMG can support both the strategy and the execution.

Why KPMG?

- Proven results with major clients in various industries
- Accelerated recovery enabling faster access to refunds
- Technology-enabled automation and lower transactional costs than traditional broker processes
- Ability to identify additional savings and recovery, leveraging analytics and technology, to find opportunities others may miss
- Flexible engagement models to fit your needs

Take action now

Customs entry filers are having a hard time keeping up with capacity, resulting in unnecessary cost increases and time delays. Our innovative recovery tool delivers faster, more accurate, and more cost-effective tariff refund claims.
