# Agenda

## ■ Level Setting

- The Current Trade Landscape
- Intersection with Tax, Transfer Pricing, and Business Issues

## ■ Mitigation Strategies and Considerations

- Unbundling Non-Dutiable Costs
- Transfer Pricing - Function/Risk Changes
- First Sale
- Onshoring vs. Offshoring
- Other Focus Areas

## ■ Best Practices

- Employing Strategies in Light of Current Uncertainties

## ■ Q&A

01

# Level Setting

# The Current Trade Landscape

## Country-Based Tariffs

### All Countries

**Reciprocal IEEPA 10%**  
Except MX/CA & USMCA goods  
(All) Except 20% US Content  
\*country specific rates paused\*

### Canada

**Border IEEPA 25%**  
10% on energy and potash  
Except USMCA eligible goods

### Mexico

**Border IEEPA 25%**  
10% on potash  
Except USMCA eligible goods

### China

**Fentanyl IEEPA 20%**  
**Reciprocal IEEPA 10%**  
**Sec. 301 7.5-100%**  
\*de minimis excluded

## Industry-Based Tariffs

### IN EFFECT

**Aluminum**  
25%

### IN EFFECT

**Steel**  
25%

### IN EFFECT

**Autos\***  
25%

### IN EFFECT

**Parts**  
25%

### ANNOUNCED After April 2<sup>nd</sup>

**Venezuela Oil\*\***  
25%

### IN EFFECT / THREATENED\*\*\*

**China Maritime**

### THREATENED

**Pharmaceuticals**

### THREATENED

**Semiconductors**

### THREATENED

**Copper**

### Threatened

**Lumber**

### THREATENED

**Critical Minerals**

### THREATENED

**Trucks**

### THREATENED

**Commercial Aircraft**

\* Except USMCA U.S. Content

\*\* All imports from a country that imports  
VE oil directly or indirectly

\*\*\* Will gradually increase over the next 6  
three years

# Intersection with Tax, Transfer Pricing, and Business Issues

The pricing of intragroup COGS can directly impact both a business' corporate tax liabilities (i.e., transfer pricing) and its indirect tax liabilities (through tariffs duties).

## Stylized Example

ALP = \$90m – \$95m\*

Foreign Co  
(Country X)

US Co  
(US)

CIT rate = 15%

COGS = \$50m

CIT rate = 21%

US sales = \$100m

Tariff (a) = 0%

Tariff (b) = 10%

Duties went up because of the higher ALP

Pre-Tariffs  
(\$m)

Post-Tariffs  
(\$m)

US CIT (21%)

US Duty (0%)

Foreign CIT (15%)

Total Tax

US CIT (21%)

US Duty (10%)

Foreign CIT (15%)

Total (Tax + Tariffs)

Low Price ↓

High Price ↑

9.5

6.8

17.4

Total liability increased

## Business and Operational Considerations

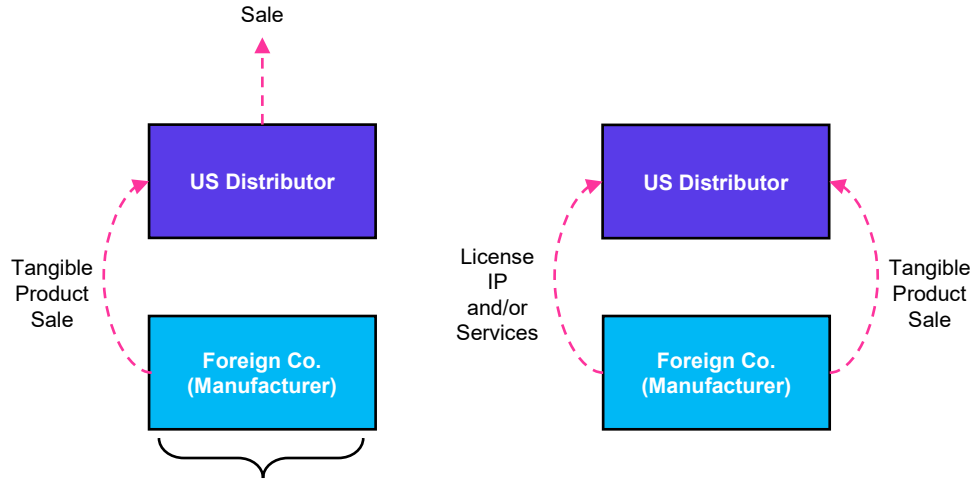

02

# Mitigation Strategies and Considerations

# Unbundling Non-Dutiable Costs

Sells tangible products with embedded intangible property (IP), including:

- Non-product costs (e.g., shipping, warehousing, etc.)
- Patents and production Know-How
- Brands and trademarks
- Right to sale
- Software and digital content

## Strategy

- Unbundle the purchase price of imports (COGs) to invoice separately for costs, services and/or royalties that are currently embedded in the import price

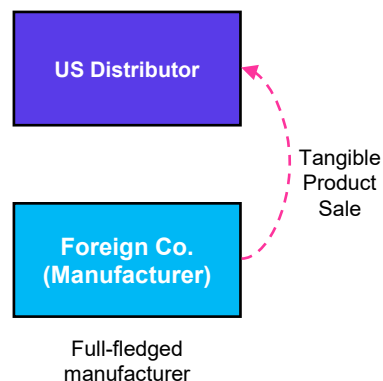

## Considerations

- Trade and customs guidance (nexus to import)
- Transfer price for royalties/ services and potential increased compliance
- Withholding tax, BEAT, foreign tax credit ("FTC"), deductibility, and/or Subpart F ramifications
- ERP and other business impacts
- Identification of other non-dutiable costs (freight, fuel, warehousing)
- Consider when U.S. is exporter (to potentially mitigate foreign reciprocal tariffs costs)

# Transfer Pricing - Function/Risk Changes

## Change in Distribution Functions

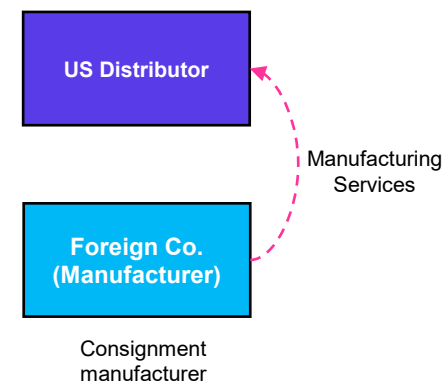

### Strategy

- Convert limited-risk distributor to a routine distributor (“RD”) entitled to higher (but still routine) returns.

### Considerations

- RD needs to have sufficient substance control and bear additional risk of loss
- Exit tax challenges
- Impact of the change on the benchmark analysis

## Change in Manufacturing Functions

### Strategy

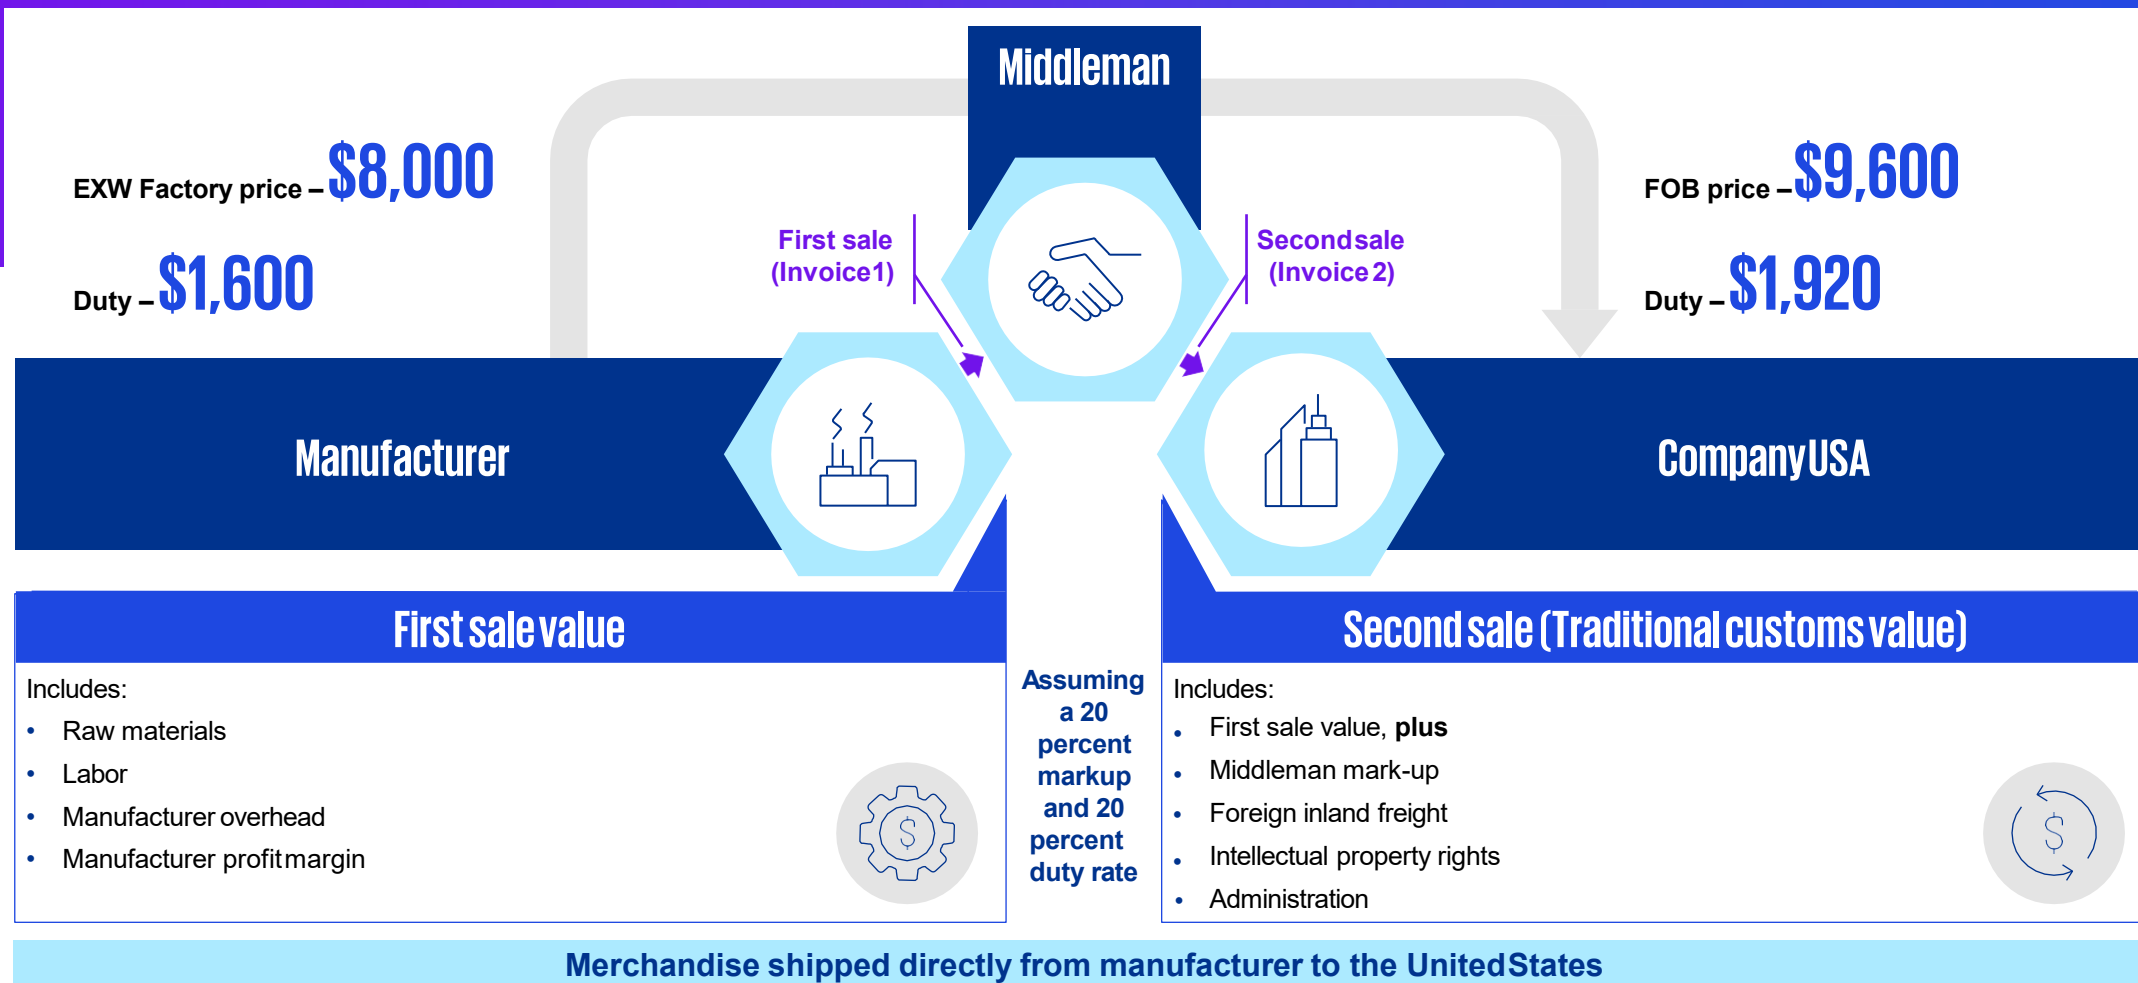

- Convert manufacturer into consignment manufacturer with legal title to semi-finished and finished goods remaining with Principal (i.e., US Distributor) throughout process.
- Consider, for example, opting out of the Mexican Maquiladora Tax Regime (“MTR”):
  - The MTR has become less attractive as the APA alternative was repealed and the Safe Harbor leads to double-digit returns to the manufacturer

### Considerations

- Transfer pricing – manufacturing fee potentially based on local costs
- Tariffs apply on the importation of the physical goods into the U.S.
- Permanent Establishment and FTC implications

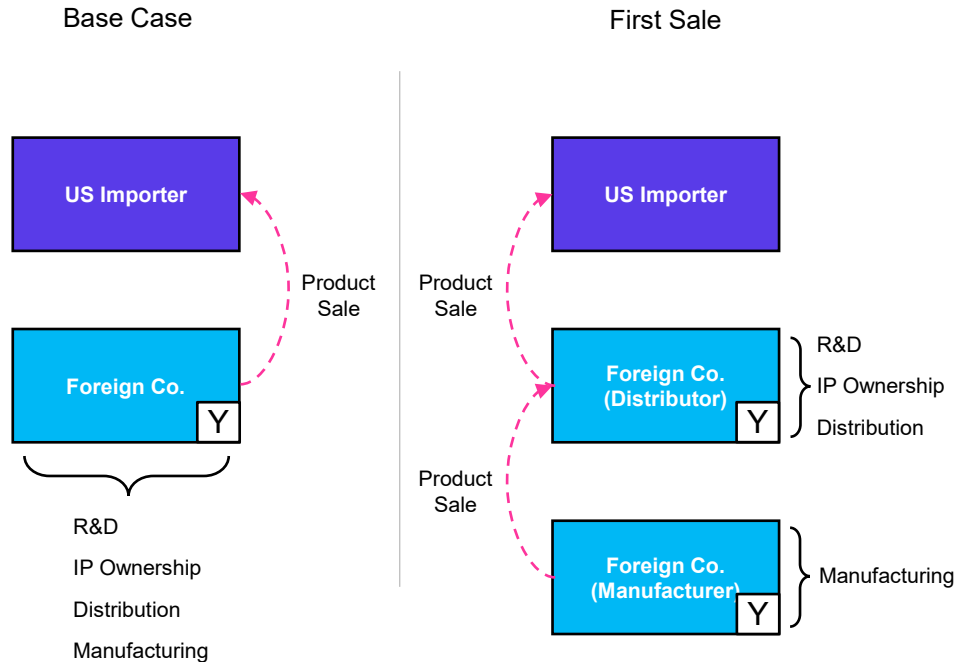

# First Sale Principle – Basics

# First Sale – Using a Foreign Distributor

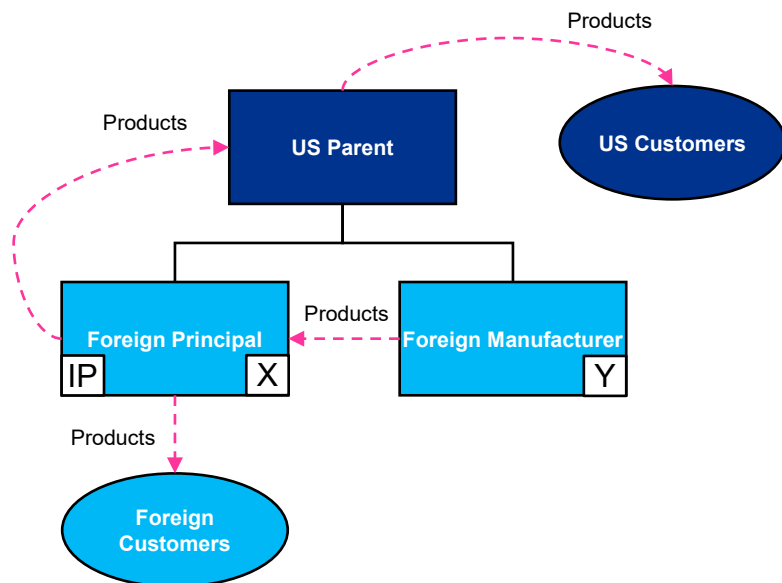

## Overview

- Consider bifurcating the manufacturing and distribution functions into two legal entities and using First Sale Price for customs valuation

## Considerations

- Application of First Sale requirements for customs purposes
- Transfer pricing – determining Foreign Co. Distributor profit
- Sourcing and Subpart F considerations, including same country exception
- Exception to Section 1059A
- Local country implementation (invoicing, systems, local tax, etc.)
- What if Distributor is located in a third country?

# Onshoring vs. Offshoring (Manufacturing and/or Intangibles)

Country X = 15% tax rate

Country Y = 30% tax rate

## Considerations

- Potentially mitigates tariffs on imported goods to be sold in US
- Reciprocal tariffs on goods exported from the US to foreign jurisdictions
- Corporate income tax rate arbitrage
- Impact of potential US tax law changes (e.g., R&D expensing, bonus depreciation, domestic manufacturing incentive, anti-roundtripping or anti-base erosion provisions)
- Exit tax considerations
- Onshore manufacturing only, IP only, or both?
- Business Issues, including labor costs, reproducing a workforce in place, talent acquisition, unwinding/selling factory, sourcing, warehousing, logistics, etc.

# Other Focus Areas

- Country of Origin
- Accelerating Imports into the United States
- Exploring Alternative Sources of Supply and/or Manufacturing Capacity in other Countries
- Free Trade Zones

03

# Best Practices

# Best Practices and Other Considerations

- Establish Cross-Functional Tariff Response Team and Related Governance
  - Tax, Trade Compliance, Supply Chain, Legal, Finance
- Cleanse Data & Establish Good Hygiene for Data Acquisition and Maintenance
- Quantify Potential US and Foreign Tariff Impact and Regularly Update as Trade Reform Continues to Unfold
- Scenario Planning and Related Modeling– Assessing both the Tariff and Tax impacts associated with Mitigation Strategies Under Consideration to Understand the Overall Effect on the Company
- Identify “No Regrets” Planning
- Develop Short-Term and Longer-Term Tariff Response Playbook
- US Customs Reconciliation Program
- Global Trade Automation and Related Technology

# 04 Q&A
