

Your strategic wingman

KPMG is a global, strategic consulting firm accelerating change for the Department of the Air Force.

The appearance of U.S. Department of Defense (DoD) visual information does not imply or constitute DoD endorsement.

Empowering Airmen and Guardians with next-generation innovation Today's vision, tomorrow's reality

Whether it's making digital twins for the sustainment of combat systems or steering the transformation of human capital, medical, aviation, financial, intelligence, cyber, or logistics systems and processes, KPMG is helping the Department of the Air Force, at all levels, embrace the data-driven, digital world of the future, today.

Several of our transformational capabilities are highlighted below.

Strategic transformation and mission insights

Our Air Force and Space Force knowledge and consulting tradecraft can accelerate transformation at any level.

Strategic analysis, planning, implementation

Starting with a current-state analysis/stakeholder engagement, build/execute, your strategic plan and Plan of Action and Milestones. Underpin it with data analytics, process mapping, and knowledge management.

Mission insights

Enhance any mission with data collection, strategic analysis, organization design optimization (intel, cyber, aviation, logistics, HR, finance).

Facilitated events

We can orchestrate your workshop or planning team event and host it "off site" style at any one of our world class locations.

Data and analytics, digital twins, modeling and simulation

Make digital twins of program assets and processes., and then run models and simulations to forecast outcomes based on planned or unplanned changes.

Digital fleet management

Digital twins of any ops (depots, training, HR) for scheduling, forecasting demand, and analyzing COAs years in advance. Keep OEMs honest with independent forecasts of production scenarios based on variables (e.g., supply, labor, and outages).

Intelligent forecasting

Turn your data into a strategic asset. Treat data sources as "signals," and use advanced analytic techniques to transform signals into information to forecast mission outcomes.

Financial management transformation

KPMG can help develop and execute your transformation strategy, promote accountability, and strengthen your Planning Programming Budget and Execution (PPBE) .

Technology-enabled FM, audit ready

Modernize legacy processes and apply modern accounting tech such as AI-enabled financial management (FM) models, predictive analytics, robotic process automation, and G-Invoicing. Be audit ready every day! Get beyond FM crisis management and integrate audit readiness into daily ops with KPMG's proactive approach.

PPBE

Modernize PPBE infrastructure to ensure your POM and PB positions are accurately recorded for transfer to OSD. Apply what-if scenarios and improve cost estimating, data analytics, dashboarding, and the use of Department of Defense databases.

Human capital transformation

Drive mission outcomes by analyzing and changing the strategy, processes, and technology supporting how Airmen and Guardians are led and developed.

Workforce analysis, strategy, and transformation

Assess the impact of the force development environment (next-gen training, aircrew shortages, Generation Alpha, new eval systems, retention obstacles, etc.) and create a data-driven strategy to recruit, develop, and retain the force you need with deliberate talent management, workforce/succession planning.

Digital HR services-personnel and learning systems

Implement Airmen/Guardian-centered technology development, and strategy, selection and planning (brand agnostic) to include cloud-based, nonproprietary solutions.

Supply chain transformation

Transform supply chains from mission barriers to mission advantage assets, even during contested ops.

Technology-enabled and predictive

Kill the bottlenecks! With advanced data analytics, automation, and AI, KPMG solutions enable real-time visibility and insightful forecasts, all while fostering regulatory compliance, security, and resilience.

KPMG Supply Chain Risk Management framework

A comprehensive framework that includes systematic identification, assessment, and mitigation, and tailors SCRM to meet the specific needs of your organization.

Cybersecurity

Embed innovative cybersecurity into all digital transformations and tech modernizations.

Zero Trust and cyber resilience

Evaluate, implement, and integrate Zero Trust pillars drawing on leading practices across the DoD and industry. Develop responsive, adaptive systems that maintain high performance in degraded environments.

Identity as the Anchor

Build, deploy ICAM solutions enabling contextually aware, conditionally driven, risk-based decisions for all access requests.

Change management and strategic communications

Accelerating change requires a structured approach and proven methodologies to make the changes stick with minimal burden.

KPMG's five-phase change methodology

Our methodology helps you change the culture, as well as your processes or technology, by making the change: Clear, Known, Real, Happen, and Stick.

Communicating the change

We combine our nationally certified change specialists with high-performing, former Airmen and Guardians to effectively deliver the "why" and the "what's in it for me."

Robotic process automation (RPA)

Use RPA to automate repetitive, rules-based tasks, such as moving information from one system to another, pulling from a database or the web, or uploading info from spreadsheets. Let the human-in-the-loop focus on the most complex tasks.

Automate spend data reporting

Categorize procurement transactions as they happen and let your people focus on spend analysis.

Autogenerate database reporting

Stop wasting time collecting database information. Autogenerate the report and spend more time making sense of the data.

Smart depot, smart warehouse

Revolutionize logistics with innovative technology that amplifies your existing information systems and introduces top-of-the-line automation.

Integrated information systems

Harness the power of cutting-edge techniques to link shop floor control, inventory, planning, and financial elements for flawless operational efficiency, real-time asset tracking, and strategic forecasting.

5G-enabled, advanced automation

Transform task-centric processes into system-driven strategies by employing 5G autonomous materiel handling, real-time performance sensors for continuous monitoring of operations and equipment health, and robotic process automation.

Digital transformation

Transform to a digitally-enabled, mission-driven workflow with technology aligned with your strategy. The smart application of technology can reduce costs, keep you on schedule, and enhance performance.

Find out what technology you need and what you don't

New technology is essential for survival, but what is right for you? Cloud, AI, 5G, virtual reality, RPA? Find out what fits and then apply it smartly.

Break vendor lock

Move away from proprietary systems to commercially available applications and supporting infrastructure, and get the most out of what you buy.
