

AI Powered K-1/K-3 Workflow

via Digital Gateway

K-1, K-3, and State Scanning, the GenAI Way

Our **AI Powered K-1/K-3 Workflow** is more than just automation—it's an agile leap forward in tax document processing. Save time and have confidence in our streamlined workflow that efficiently transforms extracted data into high value analytics.

An efficient, centralized, time-saving experience

One ecosystem: Digital Gateway (DG) provides a single entry and exit point for tax document collaboration, processing, delivery, and reporting.

Simple, streamlined workflow: Provide your K-1s in DG. A GenAI-enabled engine scans, extracts, and transforms the data, which automatically integrates into our tax worksheet engine—reducing manual effort and accelerating processing.

Delivery: Access reports, analytics, and dashboards in DG, which delivers valuable insights from the extracted Federal K-1/K-3, State, and Footnote detail.

Greater accuracy & scalability with GenAI

High accuracy: The GenAI scanning solution achieves **>98%**¹ granular accuracy in data extraction from Federal K-1/K-3 and State K-1 detail, outperforming other solutions in the market.

Diagnostics: Intelligent checks highlight international reporting requirements and validate K-1/K-3 data, minimizing exposure to tax penalties and filing issues.

AI supported by human intelligence: Every output is reviewed by the KPMG Tax Center of Excellence to help ensure quality before delivery.
