# Supply Chain Illumination: A Clear Path to Visibility

Overview

Supply chain illumination improves the visibility of the extended supply base, enabling optimization, risk management, and enhanced operational efficiency. By illuminating each step in the supply chain, organizations can map, trace, predict, shape, and react to supply chain dynamics more effectively. We have pioneered supply chain visibility solutions with government agencies, completing over 17,000 risk assessments, significantly enhancing compliance and resilience by proactively managing risks.

Improved Supply Chain Visibility

1 MAP your supply chain

2 TRACE the custody of your goods and services

3 Risk Index

PREDICT the performance of your supply chain

4 SHAPE your supply chain to reduce risk and improve performance

5 REACT to disruptions and changes in your supply chain

Enables Significant Benefits

- Improve visibility leads to better understand how goods are procured, built, and transported across the supply chain

- Decrease risks in the supply chain by understanding the chain of custody and shaping your supply chain

- Increase performance and agility by detecting and reacting to changes

- Improve collaboration and customer satisfaction through improved commitments and transparency

National Industrial Base

Improved supply chain visibility, enabled by advanced commercial technologies and integrated approaches, empower both defense and civilian sectors to build more agile and adaptable operations, leading to substantial gains in performance and risk management.

Defense: Supply chain visibility in the defense sector ensures that the Department of Defense (DoD) and other military agencies can maintain readiness and operational strength in a contested environment by having a clear view of the flow of materials and components.

Civilian: In the civilian sector, supply chain visibility supports efficient public service delivery by providing transparency and accountability throughout the supply chain.

Our Value

| We deliver results that matter | We know how your agency works | We get the best out of technology – ours, yours, and theirs | We know how to get things done | We're on your side, all the way |
